

CITATION REPORT

List of articles citing

Aerobic degradation of dinitrotoluenes and pathway for bacterial degradation of 2,6-dinitrotoluene

DOI: 10.1128/aem.66.5.2139-2147.2000

Applied and Environmental Microbiology, 2000, 66, 2139-47.

Source: <https://exaly.com/paper-pdf/32148713/citation-report.pdf>

Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

6 Metabolism of Aromatic Compounds. 586-595

5 The metabolic redox regime of *Pseudomonas putida* tunes its evolvability towards novel xenobiotic substrates.

4 Evaluating the aerobic xylene-degrading potential of the intrinsic microbial community of a legacy BTEX-contaminated aquifer by enrichment culturing coupled with multi-omics analysis: uncovering the role of *Hydrogenophaga* strains in xylene degradation.. *Environmental Science and Pollution Research*, **2022**, 1 5.1 1

3 Trends in environmental monitoring of high explosives present in soil/sediment/groundwater using LC-MS/MS. *Mass Spectrometry Reviews*, 11

2 Photolysis by UVA-visible light and thermal degradation of TNT in aqueous solutions according to aerodynamic thermal breakup droplet ionization mass spectrometry. *Journal of Photochemistry and Photobiology A: Chemistry*, **2022**, 432, 114079 4.7 0

1 Removal of 2,4,6-Trinitrotoluene by Extended Aeration Activated Sludge: Optimizing by Artificial Neural Network. 0
