Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
214	FREE FIELD VIBRATIONS DURING THE PASSAGE OF A THALYS HIGH-SPEED TRAIN AT VARIABLE SPEED. 2001 , 247, 131-144		130
213	An efficient formulation of Krylov's prediction model for train induced vibrations based on the dynamic reciprocity theorem. 2001 , 110, 1379-90		36
212	2.5-D FEM APPLICATION FOR PREDICTING TRACK-GROUND VIBRATION DUE TO HIGH-SPEED TRAIN AND MITIGATION BY WIB PROCEDURE. 2002 , 2002, 247-255		5
211	Periodically supported beam on a visco-elastic layer as a model for dynamic analysis of a high-speed railway track. 2003 , 40, 5723-5752		95
210	Simulation of track-ground vibrations due to a high-speed train: the case of X-2000 at Ledsgard. 2003 , 261, 503-526		109
209	Numerical prediction of low-frequency ground vibrations induced by high-speed trains at Ledsgaard, Sweden. 2003 , 23, 425-433		54
208	Three-Dimensional Analyses of Wave Barriers for Reduction of Train-Induced Vibrations. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2004 , 130, 740-748	3.4	46
207	A theoretical study on the influence of the track on train-induced ground vibration. 2004 , 272, 909-936		119
206	Freefield vibrations due to dynamic loading on a tunnel embedded in a stratified medium. 2005 , 283, 173-199		121
205	A 3D BEM-FEM methodology for simulation of high speed train induced vibrations. 2005 , 25, 289-301		66
204	Stability of a two-mass oscillator moving on a beam supported by a visco-elastic half-space. 2005 , 42, 1187-1207		40
203	Substructure Simulation of Inhomogeneous Track and Layered Ground Dynamic Interaction under Train Passage. 2005 , 131, 699-711		111
202	Ground Motion Induced by Train Passage. 2006 , 132, 201-210		14
201	Response of periodic structures due to moving loads. 2006 , 334, 347-352		33
200	An analytical model for train-induced ground vibrations from railways. 2006 , 292, 221-241		73
199	An analytical model for ground vibrations from accelerating trains. 2006 , 293, 587-598		26
198	Ground vibration generated by trains in underground tunnels. 2006 , 294, 706-736		126

197	The experimental validation of a numerical model for the prediction of railway induced vibrations. 2006 , 297, 512-535	182
196	The control of ground-borne vibrations from railway traffic by means of continuous floating slabs. 2006 , 297, 946-961	114
195	Validation of an empirical model for prediction of train-induced ground vibrations. 2006 , 26, 983-990	22
194	Stress changes in the ground below ballasted railway track during train passage. 2007 , 221, 247-262	115
193	Studying Characteristics of Train-Induced Ground Vibrations Adjacent to an Elevated Railway by Field Experiments. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2007 , 133, 1302-1307	24
192	Prediction of train-induced vibrations inside buildings using transfer functions. 2007 , 27, 93-98	16
191	Shinkansen high-speed train induced ground vibrations in view of viaduct-ground interaction. 2007 , 27, 506-520	34
190	Efficiency of trenches along railways for trains moving at sub- or supersonic speeds. 2007 , 27, 625-641	35
189	The effect of the interface conditions on the dynamic response of a beam on a half-space to a moving load. 2007 , 26, 33-54	42
188	Assessment of design parameters of a slab track railway system from a dynamic viewpoint. 2007 , 306, 361-371	75
187	Analyses of wave field from high-speed train on viaduct at shallow/deep soft grounds. 2008 , 310, 631-649	15
186	Experimentally investigating finite element accuracy for ground vibrations induced by high-speed trains. 2008 , 30, 733-746	37
185	Dynamic response of high-speed ballasted railway tracks: 3D periodic model and in situ measurements. 2008 , 28, 118-131	51
184	Train-Induced Vibrations on Urban Metro and Tram Turnouts. 2009 , 135, 397-405	14
183	Wave barrier of limelement columns against train-induced ground-borne vibrations. 2009 , 29, 1027-1033	30
182	Vibrations induced by harmonic loadings applied at circular rigid plate on half-space medium. 2009 , 323, 257-269	5
181	Track displacement and energy loss in a railway embankment. 2010 , 163, 3-12	13
180	Identification of effective properties of the railway substructure in the low-frequency range using a heavy oscillating unit on the track. 2010 , 80, 959-968	5

179	Theoretical modeling and characteristic analysis of moving-train induced ground vibrations. 2010 , 329, 819-832	53
178	Identification of substructure properties of railway tracks by dynamic stiffness measurements and simulations. 2010 , 329, 3999-4016	28
177	Measurements of transient ground movements below a ballasted railway line. 2010 , 60, 667-677	58
176	Erschütterungsschutz. 2010 , 691-745	
175	On the interest of integrating vehicle dynamics for the ground propagation of vibrations: the case of urban railway traffic. 2010 , 48, 1553-1571	38
174	Analysis of dynamic compressive stress induced by passing trains in permafrost subgrade along Qinghai-Tibet Railway. 2011 , 65, 465-473	13
173	Effects of a multi-layered poro-elastic ground on attenuation of acoustic waves and ground vibration. 2011 , 330, 1403-1418	2
172	Dynamic effects of moving loads on road pavements: A review. 2011 , 31, 547-567	138
171	Free field vibrations caused by high-speed lines: Measurement and time domain simulation. 2011 , 31, 692-707	93
170	Assessment Spectra for Structures Subject to Passing Underground Trains. 2011 , 82, 784-789	
169	A two-step time simulation of ground vibrations induced by the railway traffic. 2012 , 226, 454-472	33
168	Railway train induced ground vibrations in a low VS soil layer overlying a high VS bedrock in eastern Canada. 2012 , 36, 1-11	5
167	Subgrade stiffening next to the track as a wave impeding barrier for railway induced vibrations. 2013 , 48, 119-131	62
166	Isolation of Train-Induced Ground-Borne Vibration by Trenches on a Poroelastic Half-Space. 2013 , 139, 580-593	7
165	Vibration analysis of pile-supported embankments under high-speed train passage. 2013 , 55, 92-99	36
164	Dynamic response of a poroelastic half-space to accelerating or decelerating trains. 2013 , 332, 2777-2794	13
163	Noise and Vibration from Railroad Traffic. 2013 , 393-487	5
162	Numerical Analysis of Dynamic Response and Influence Factors on PCC Pile Composite Foundation of High Speed Railway. 2013 ,	

161	Evaluation of PCC Pile Method in Mitigating Embankment Vibrations from a High-Speed Train. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2013 , 139, 2225-2228	3-4	24
160	Vibrations Induced by Harmonic Loadings Applied at Circular Plate on Layered Medium. 2013 , 29, 197-206		2
159	Experimental study of ground vibrations induced by Brussels IC/IR trains in their neighbourhood. 2013 , 14, 99-105		18
158	Three-dimensional dynamic analyses of track-embankment-ground system subjected to high speed train loads. 2014 , 2014, 924592		8
157	Railway-induced ground vibrations – a review of vehicle effects. 2014 , 2, 69-110		187
156	Full-scale model testing on a ballastless high-speed railway under simulated train moving loads. 2014 , 66, 368-384		120
155	The influence of source-receiver interaction on the numerical prediction of railway induced vibrations. 2014 , 333, 2520-2538		53
154	Mitigation of Ground Vibration Generated by High-Speed Trains on Saturated Poroelastic Ground with Under-Sleeper Pads. 2014 , 140, 12-22		6
153	Propagation Characteristics of Elastic Wave in High-Speed Railway Embankment and Its Application to Defect Detection. 2014 ,		2
152	Solutions for Triangularly Distributed Harmonic Loadings on Axially Symmetric Area in Layered Half-Space. 2015 , 31, 631-638		
151	Theoretical analysis on ground vibration attenuation using sub-track asphalt layer in high-speed rails. 2015 , 23, 214-219		11
150	Modelling the Environmental Effects of Railway Vibrations from Different Types of Rolling Stock: A Numerical Study. 2015 , 2015, 1-15		21
149	Numerical investigation of piled raft foundation in mitigating embankment vibrations induced by high-speed trains. 2015 , 22, 4434-4444		8
148	Combined paraxial-consistent boundary conditions finite element model for simulating wave propagation in elastic half-space media. 2015 , 70, 80-92		7
147	Experimental and numerical evaluation of the effectiveness of a stiff wave barrier in the soil. 2015 , 77, 238-253		57
146	Dynamic response of a tunnel buried in a saturated poroelastic soil layer to a moving point load. 2015 , 77, 348-359		28
145	Mitigation of railway induced ground vibration by heavy masses next to the track. 2015 , 75, 158-170		39
144	Dynamic response of a thawing soil around the tunnel under the vibration load of subway. 2015 , 73, 2473-2482		17

143	Field experiment and numerical study on active vibration isolation by horizontal blocks in layered ground under vertical loading. 2015 , 69, 251-261		35
142	Spatial correlation between land subsidence and urbanization in Beijing, China. 2015 , 75, 2637-2652		35
141	Critical speed of railway tracks. Detailed and simplified approaches. <i>Transportation Geotechnics</i> , 2015 , 2, 30-46	4	62
140	Numerical analysis of soil vibrations due to trains moving at critical speed. 2016 , 11, 281-294		25
139	Simulating train moving loads in physical model testing of railway infrastructure and its numerical calibration. 2016 , 11, 231-242		26
138	Vertical Random Vibration Analysis of Track-Subgrade Coupled System in High Speed Railway with Pseudoexcitation Method. 2016 , 2016, 1-12		1
137	Dynamic response of an infinite beam supported by a saturated poroelastic halfspace and subjected to a concentrated load moving at a constant velocity. 2016 , 88-89, 35-55		13
136	Investigation into Impact of Train Speed for Behavior of Ballasted Railway Track Foundations. 2016 , 143, 1152-1159		5
135	Critical Velocity of High-speed Train Running on Soft Soil and Induced Dynamic Soil Response. 2016 , 143, 1034-1042		15
134	An optimized method to evaluate the performance of trench isolation for railway-induced vibration. 2016 , 94, 92-102		9
133	The effect of boundary conditions, model size and damping models in the finite element modelling of a moving load on a track/ground system. 2016 , 89, 12-27		34
132	On implicit integration of the bounding surface model based on swell/shrink rules. 2016 , 40, 8671-8684		3
131	A full-scale physical model test apparatus for investigating the dynamic performance of the slab track system of a high-speed railway. 2016 , 230, 554-571		20
