

# Oxidative stress and vascular aging

Diabetes Research and Clinical Practice

54, S73-S80

DOI: [10.1016/s0168-8227\(01\)00338-2](https://doi.org/10.1016/s0168-8227(01)00338-2)

Citation Report

#	ARTICLE	IF	CITATIONS
2	Influence of aging and calorie restriction on MAPKs activity in rat kidney. <i>Experimental Gerontology</i> , 2002, 37, 1041-1053.	1.2	68
3	Molecular inflammation hypothesis of aging based on the anti-aging mechanism of calorie restriction. <i>Microscopy Research and Technique</i> , 2002, 59, 264-272.	1.2	271
4	Calorie restriction modulates redox-sensitive AP-1 during the aging process. <i>Age</i> , 2002, 25, 123-130.	3.0	3
5	Modulation of glutathione and thioredoxin systems by calorie restriction during the aging process. <i>Experimental Gerontology</i> , 2003, 38, 539-548.	1.2	88
6	Aging Increases Neuronal Nitric Oxide Release and Superoxide Anion Generation in Mesenteric Arteries from Spontaneously Hypertensive Rats. <i>Journal of Vascular Research</i> , 2003, 40, 509-519.	0.6	29
7	Antioxidants: A Possible Role in Kidney Protection. <i>Kidney and Blood Pressure Research</i> , 2003, 26, 303-314.	0.9	53
8	Senescent Impairment in Synergistic Cytokine Pathways That Provide Rapid Cardioprotection in the Rat Heart. <i>Journal of Experimental Medicine</i> , 2004, 199, 797-804.	4.2	48
9	Alteration of soluble adhesion molecules during aging and their modulation by calorie restriction. <i>FASEB Journal</i> , 2004, 18, 320-322.	0.2	98
10	Vascular Aging: Molecular Modulation of the Prostanoid Cascade by Calorie Restriction. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2004, 59, B876-B885.	1.7	39
11	Induction of endothelial apoptosis by 4-hydroxyhexenal. <i>FEBS Journal</i> , 2004, 271, 1339-1347.	0.2	48
12	Induction of endothelial iNOS by 4-hydroxyhexenal through NF- $\kappa$ B activation. <i>Free Radical Biology and Medicine</i> , 2004, 37, 539-548.	1.3	50
13	Synthesis, characterisation and ferric ion complexation studies of chelating probes for oxidative stress. <i>Transition Metal Chemistry</i> , 2004, 29, 315-319.	0.7	4
14	NF- $\kappa$ B activation mechanism of 4-hydroxyhexenal via NIK/IKK and p38 MAPK pathway. <i>FEBS Letters</i> , 2004, 566, 183-189.	1.3	87
15	An age-related decline in endothelial function is not associated with alterations in l-arginine transport in humans. <i>Journal of Hypertension</i> , 2004, 22, 321-327.	0.3	19
16	Protective Effects of Broccoli ( <i>Brassica oleracea</i> ) and Its Active Components against Radical-Induced Oxidative Damage. <i>Journal of Nutritional Science and Vitaminology</i> , 2005, 51, 142-147.	0.2	25
17	Ageing affects nitric oxide synthase, cyclooxygenase and oxidative stress enzymes expression differently in mesenteric resistance arteries. <i>Autonomic and Autacoid Pharmacology</i> , 2005, 25, 155-162.	0.5	30
18	Estrogen-induced contraction of coronary arteries is mediated by superoxide generated in vascular smooth muscle. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2005, 289, H1468-H1475.	1.5	55
19	Vascular Dementia Prevention: A Risk Factor Analysis. <i>Cerebrovascular Diseases</i> , 2005, 20, 91-100.	0.8	128

#	ARTICLE	IF	CITATIONS
20	Metal ion chelating peptides with superoxide dismutase activity. <i>Biomedicine and Pharmacotherapy</i> , 2005, 59, 158-162.	2.5	26
21	The Molecular Inflammatory Process in Aging. <i>Antioxidants and Redox Signaling</i> , 2006, 8, 572-581.	2.5	386
22	Identification and Characterization of Antioxidants from <i>Sophora flavescens</i> . <i>Biological and Pharmaceutical Bulletin</i> , 2006, 29, 1911-1915.	0.6	53
23	T-kininogen induces endothelial cell proliferation. <i>Mechanisms of Ageing and Development</i> , 2006, 127, 282-289.	2.2	10
24	Adaptive mechanisms to oxidative stress during aging. <i>Mechanisms of Ageing and Development</i> , 2006, 127, 436-443.	2.2	133
25	Tissue specific and non-specific changes in gene expression by aging and by early stage CR. <i>Mechanisms of Ageing and Development</i> , 2006, 127, 905-916.	2.2	47
26	Upregulation of Aortic Adhesion Molecules During Aging. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2006, 61, 232-244.	1.7	60
27	Age- and gender-related oxidative status determined in healthy subjects by means of OXY-SCORE, a potential new comprehensive index. <i>Biomarkers</i> , 2006, 11, 562-573.	0.9	59
28	The inflammatory process in aging. <i>Reviews in Clinical Gerontology</i> , 2006, 16, 179.	0.5	23
29	Identification of a new functional splice variant of the enzyme methionine sulphoxide reductase A (MSRA) expressed in rat vascular smooth muscle cells. <i>Free Radical Research</i> , 2007, 41, 1233-1245.	1.5	11
30	Amla ( <i>Emblica officinalis</i> Gaertn.) prevents dyslipidaemia and oxidative stress in the ageing process. <i>British Journal of Nutrition</i> , 2007, 97, 1187-1195.	1.2	91
31	Amla ( <i>Emblica officinalis</i> Gaertn.) Attenuates Age-Related Renal Dysfunction by Oxidative Stress. <i>Journal of Agricultural and Food Chemistry</i> , 2007, 55, 7744-7752.	2.4	75
32	An integrated view of oxidative stress in aging: basic mechanisms, functional effects, and pathological considerations. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2007, 292, R18-R36.	0.9	695
