

CITATION REPORT

List of articles citing

Distributed and overlapping representations of faces and objects in ventral temporal cortex

DOI: 10.1126/science.1063736
Science, 2001, 293, 2425-30.

Version: 2024-04-24

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 391 Decoding digits and dice with Magnetoencephalography: Evidence for a shared representation of magnitude. 0
- 390 Neural responses to naturalistic clips of behaving animals in two different task contexts.
- 389 Occipitotemporal Representations Reflect Individual Differences in Conceptual Knowledge. 0
- 388 Multivariate directed connectivity analysis (MDCA) enables decoding of directed interactions in neural and social networks.
- 387 Spatial and Temporal Cortical Variability Track with Age and Affective Experience During Emotion Regulation in Youth.

- 386 Representation of auditory motion directions and sound source locations in the human planum temporale.
- 385 Animacy and real world size shape object representations in the human medial temporal lobes. ○
- 384 GLMdenoise improves multivariate pattern analysis of fMRI data.
- 383 A double dissociation in sensitivity to verb and noun semantics across cortical networks.
- 382 Simple but Robust Improvement in Multivoxel Pattern Classification. ○
- 381 The capacity for correlated semantic memories in the cortex.
- 380 Thought experiment: Decoding cognitive processes from the fMRI data of one individual.
- 379 Integrating Time-Space and Orientation. A Case Study on fMRI + DTI Brain Data. **2019**, 397-427 1
- 378 Fast temporal dynamics and causal relevance of face processing in the human temporal cortex. ○
- 377 Effects of individuation and grouping on face representations in the visual cortex.
- 376 Dissociating refreshing and elaboration and their impacts on memory.
- 375 Changes in thalamocortical connectivity as a potential mechanism of cross-modal plasticity in congenitally blind individuals.
- 374 Intersubject MVPD: Empirical Comparison of fMRI Denoising Methods for Connectivity Analysis.
- 373 Atlas-based classification algorithms for identification of informative brain regions in fMRI data.
- 372 A simulation-based approach to improve decoded neurofeedback performance.
- 371 Neural distinctiveness declines with age in auditory cortex and is associated with auditory GABA levels. ○
- 370 Transformation of event representations along middle temporal gyrus.
- 369 Combined neural tuning in human ventral temporal cortex resolves the perceptual ambiguity of morphed 2-D images.

- 368 Predictability changes what we remember in familiar temporal contexts.
- 367 Common spatiotemporal processing of visual features shapes object representation.
