Version: 2024-04-26

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

2224	Introduction: putting it together. 2002 , 32, 5-8	4
2223	Question 1 How does one find a gene of interest and determine that gene's structure? Once the gene has been located on the map, how does one easily examine other genes in that same region?. 2002 , 32, 9-17	
2222	Question 2 How can sequence-tagged sites within a DNA sequence be identified?. 2002 , 32, 18-20	
2221	Question 3 During a positional cloning project aimed at finding a human disease gene, linkage data have been obtained suggesting that the gene of interest lies between two sequence-tagged site markers. How can all the known and predicted candidate genes in this interval be identified? What	
2220	Question 4 A user wishes to find all the single nucleotide polymorphisms that lie between two sequence-tagged sites. Do any of these single nucleotide polymorphisms fall within the coding region of a gene? Where can any additional information about the function of these genes be found?. 2002 , 32, 29-32	
2219	Question 5 Given a fragment of mRNA sequence, how would one find where that piece of DNA mapped in the human genome? Once its position has been determined, how would one find alternatively spliced transcripts?. 2002 , 32, 33-39	
2218	Question 7 How would an investigator easily find compiled information describing the structure of a gene of interest? Is it possible to obtain the sequence of any putative promoter regions?. 2002 , 32, 44-48	
2217	Question 8 How can one find all the members of a human gene family?. 2002 , 32, 49-52	1

2216	Question 9 Are there ways to customize displays and designate preferences? Can tracks or features be added to displays by users on the basis of their own research?. 2002 , 32, 53-56	
2215	Question 10 For a given protein, how can one determine whether it contains any functional domains of interest? What other proteins contain the same functional domains as this protein? How can one determine whether there is a similarity to other proteins, not only at the sequence level, but also at the structural level?. 2002 , 32, 57-62	1
2214	Question 11 An investigator has identified and cloned a human gene, but no corresponding mouse ortholog has yet been identified. How can a mouse genomic sequence with similarity to the human gene sequence be retrieved?. 2002 , 32, 63-65	
2213	Question 12 How does a user find characterized mouse mutants corresponding to human genes?. 2002 , 32, 66-69	0
2212	Question 13 A user has identified an interesting phenotype in a mouse model and has been able to narrow down the critical region for the responsible gene to approximately 0.5 cM. How does one find the mouse genes in this region?. 2002 , 32, 70-73	
2211	Commentary: keeping biology in mind. 2002 , 32, 74-75	15
2210	Characterization of 458 single nucleotide polymorphisms of disease candidate genes in the Korean population. 2003 , 48, 213-216	23
2209	Evolutionary algorithms for the selection of single nucleotide polymorphisms. 2003 , 4, 30	14
2208	Molecular basis of inherited diseases: a structural perspective. 2003 , 19, 505-13	86

2065	The UCSC Genome Browser Database: update 2006. <i>Nucleic Acids Research</i> , 2006 , 34, D590-8	20.1	733
2064	Database resources of the National Center for Biotechnology Information. <i>Nucleic Acids Research</i> , 2006 , 34, D173-80	20.1	394
2063	SNPmasker: automatic masking of SNPs and repeats across eukaryotic genomes. <i>Nucleic Acids Research</i> , 2006 , 34, W651-5	20.1	14
2062	Genotyping pooled DNA using 100K SNP microarrays: a step towards genomewide association scans. <i>Nucleic Acids Research</i> , 2006 , 34, e27	20.1	77
2061	SNPeffect v2.0: a new step in investigating the molecular phenotypic effects of human non-synonymous SNPs. 2006 , 22, 2183-5		76
2060	The Continuing Evolution of Forensic DNA Profiling - From STRS to SNPS. 2006 , 38, 59-74		5
2059	SEAN: SNP prediction and display program utilizing EST sequence clusters. 2006 , 22, 495-6		30
2058	Predicting the insurgence of human genetic diseases associated to single point protein mutations with support vector machines and evolutionary information. 2006 , 22, 2729-34		551
2057	Variants in the GH-IGF axis confer susceptibility to lung cancer. 2006 , 16, 693-701		93
2056	RTPrimerDB: the real-time PCR primer and probe database, major update 2006. <i>Nucleic Acids Research</i> , 2006 , 34, D684-8	20.1	98
2055	Allelic recombination and de novo deletions in sperm in the human beta-globin gene region. 2006 , 15, 1099-111		58

2054 Gene-based large scale LD-mapping of rheumatoid arthritis-associated genes. **2006**, 43-57

2053 Integrating large-scale genotype and phenotype data. **2006**, 10, 545-54

8

2052 A Neural Network Model for Maximizing Prediction Accuracy in Haplotype Tagging SNP Selection. **2006**,

2051 A SNP in the flt-1 promoter integrates the VEGF system into the p53 transcriptional network. **2006**, 103, 1406-11

68

2050 SNP@Domain: a web resource of single nucleotide polymorphisms (SNPs) within protein domain structures and sequences. *Nucleic Acids Research*, **2006**, 34, W642-4

20.1 17

2049 SNP500Cancer: a public resource for sequence validation, assay development, and frequency analysis for genetic variation in candidate genes. *Nucleic Acids Research*, **2006**, 34, D617-21

20.1 229

2048 Activating transcription factor 6 (ATF6) sequence polymorphisms in type 2 diabetes and pre-diabetic traits. **2007**, 56, 856-62

28

2047 Multigene amplification and massively parallel sequencing for cancer mutation discovery. **2007**, 104, 9387-92

143

2046 MutDB: update on development of tools for the biochemical analysis of genetic variation. *Nucleic Acids Research*, **2008**, 36, D815-9

20.1 28

2045 A gentle introduction to SNP analysis: resources and tools. **2007**, 5, 1123-38

16

2044 Automatic extraction of protein point mutations using a graph bigram association. **2007**, 3, e16

35

2043 A survey of genomic properties for the detection of regulatory polymorphisms. **2007**, 3, e106

22

2042 Functional impact of missense variants in BRCA1 predicted by supervised learning. **2007**, 3, e26

47

2041 Comparative genomics search for losses of long-established genes on the human lineage. **2007**, 3, e247

93

2040 SNP mining porcine ESTs with MAVIANT, a novel tool for SNP evaluation and annotation. **2007**, 23, i387-91

26

2039 Functional nonsynonymous single nucleotide polymorphisms from the TGF-beta protein interaction network. **2007**, 29, 109-17

9

2038 SNP2NMD: a database of human single nucleotide polymorphisms causing nonsense-mediated mRNA decay. **2007**, 23, 397-9

12

2037 PolyDoms: a whole genome database for the identification of non-synonymous coding SNPs with the potential to impact disease. *Nucleic Acids Research*, **2007**, 35, D700-6
