

CITATION REPORT

List of articles citing

Relationship between body composition and bone mineral content in young and elderly women

DOI: 10.1080/03014460210137819

Annals of Human Biology, 2002, 29, 559-65.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
