Citation Report
List of articles citing

Community structure in social and biological networks

DOI: 10.1073/pnas.122653799
Proceedings of the National Academy of Sciences of the United States of America, 2002, 99, 7821-6.

Version: 2024-04-17

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
2270	Far Infrared Spectroscopy by Fabry-Perot Interferometer. III. **1980**, 19, 2523-2524		4
2269	Development of an engine simulation program and its application to stratified charge SI engines. **1999**, 22, 159		2
2268	Range-based attack on links in scale-free networks: are long-range links responsible for the small-world phenomenon?. **2002**, 66, 065103		71
2267	Edge overload breakdown in evolving networks. **2002**, 66, 036119		88
2266	Modeling of growing networks with communities.		
2265	Roles for the two-hybrid system in exploration of the yeast protein interactome. **2002**, 1, 561-6		87
2264	Hierarchical organization of modularity in metabolic networks. **2002**, 297, 1551-5		3010
2263	Spread of epidemic disease on networks. **2002**, 66, 016128		1918
2262	A stochastic approach for modeling and computing Web communities.		1
2261	Foreword. **2002**, 84, 687-689		1
2260	The navigability of strong ties: Small worlds, tie strength, and network topology. **2002**, 8, 72-81		47
2259	Beyond anarchy: Self-organized topology for peer-to-peer networks. **2003**, 9, 49-53		7
2258	A method for classifying metabolites in topological pathway analyses based on minimization of pathway number. **2003**, 70, 255-70		39
2257	Comparison of the transition state ensembles for folding of Im7 and Im9 determined using all-atom molecular dynamics simulations with phi value restraints. **2004**, 54, 513-25		38
2256	The Structure and Function of Complex Networks. **2003**, 45, 167-256		11277
2255	Properties of highly clustered networks. **2003**, 68, 026121		304
2254	Mixing patterns in networks. **2003**, 67, 026126		1656

2253	Compartments revealed in food-web structure. **2003**, 426, 282-5		493
2252	Why social networks are different from other types of networks. **2003**, 68, 036122		778
2251	Subnetwork hierarchies of biochemical pathways. **2003**, 19, 532-8		245
2250	Assessing experimentally derived interactions in a small world. *Proceedings of the National Academy of Sciences of the United States of America*, **2003**, 100, 4372-6	11.5	318
2249	Protein complexes and functional modules in molecular networks. *Proceedings of the National Academy of Sciences of the United States of America*, **2003**, 100, 12123-8	11.5	1098
2248	Network landscape from a Brownian particle's perspective. **2003**, 67, 041908		95
2247	Distance, dissimilarity index, and network community structure. **2003**, 67, 061901		173
2246	Modularity and extreme edges of the internet. **2003**, 90, 148701		147
2245	Spontaneous structure formation in a network of dynamic elements. **2003**, 67, 046226		36
2244	Self-similar community structure in a network of human interactions. **2003**, 68, 065103		871
2243	Structures and relative free energies of partially folded states of proteins. *Proceedings of the National Academy of Sciences of the United States of America*, **2003**, 100, 14817-21	11.5	67
2242	COMMUNITY STRUCTURE IN JAZZ. **2003**, 06, 565-573		713
2241	Modular organization of cellular networks. *Proceedings of the National Academy of Sciences of the United States of America*, **2003**, 100, 1128-33	11.5	572
2240	Dendrogram Seriation Using Simulated Annealing. **2003**, 2, 95-104		9
2239	Risk trading, network topology and banking regulation. **2003**, 3, 306-319		30
2238	Bridging the gap between data acquisition and inference ontologies: toward ontology-based link discovery. **2003**, 5071, 116		3
2237	Network Brownian Motion: A New Method to Measure Vertex-Vertex Proximity and to Identify Communities and Subcommunities. **2004**, 1062-1069		56
2236	Small-world file-sharing communities.		85

2235	AutoPart: Parameter-Free Graph Partitioning and Outlier Detection. **2004**, 112-124		48
2234	Leadership statistics in random structures. **2004**, 65, 151-157		13
2233	Information Dynamics in the Networked World. **2004**, 371-398		21
2232	Scale-free trees: the skeletons of complex networks. **2004**, 70, 046126		84
2231	Networking genetic regulation and neural computation: directed network topology and its effect on the dynamics. **2004**, 70, 061908		13
2230	Networks, dynamics, and modularity. **2004**, 92, 188701		95
2229	Modularity from fluctuations in random graphs and complex networks. **2004**, 70, 025101		550
2228	Method to find community structures based on information centrality. **2004**, 70, 056104		179
2227	Defining and identifying communities in networks. *Proceedings of the National Academy of Sciences of the United States of America*, **2004**, 101, 2658-63	11.5	1540
2226	Networking the seceder model: Group formation in social and economic systems. **2004**, 70, 036108		38
2225	Widespread occurrence of the inverse square distribution in social sciences and taxonomy. **2004**, 69, 035101		14
2224	Coauthorship networks and patterns of scientific collaboration. *Proceedings of the National Academy of Sciences of the United States of America*, **2004**, 101 Suppl 1, 5200-5	11.5	1077
2223	Identifying the role that animals play in their social networks. **2004**, 271 Suppl 6, S477-81		430
2222	The interactome as a tree--an attempt to visualize the protein-protein interaction network in yeast. **2004**, 32, 4804-11		36
2221	Design of a directed molecular network. *Proceedings of the National Academy of Sciences of the United States of America*, **2004**, 101, 10872-7	11.5	170
2220	TopNet: a tool for comparing biological sub-networks, correlating protein properties with topological statistics. **2004**, 32, 328-37		58
2219	Control of yeast filamentous-form growth by modules in an integrated molecular network. **2004**, 14, 380-90		72
2218	The metabolic world of Escherichia coli is not small. *Proceedings of the National Academy of Sciences of the United States of America*, **2004**, 101, 1543-7	11.5	256
