Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
498	Solid Friction Damping of Mechanical Vibrations. 1976 , 14, 1675-1682		397
497	On-line end-to-end congestion control.		7
496	.		2
495	User independent protocol system for network security.		0
494	Managing radio network congestion in UTRA-FDD. 2002 , 38, 1384		3
493	On stability of REM algorithm with uniform delay.		
492	Decentralized traffic control in data networks-a methodological overview.		
491	. <i>IEEE Transactions on Automatic Control</i> , 2002 , 47, 945-959	5.9	484
490	.		21
489	Admissible short-time uncertainty in networked control systems. 2002 , 119, 301-303		
488	Anti-windup compensator for active queue management in TCP networks. <i>Control Engineering Practice</i> , 2003 , 11, 1127-1142	3.9	14
487	Fairness and Stability of End-to-End Congestion Control*. <i>European Journal of Control</i> , 2003 , 9, 159-176	2.5	119
486	Internet-like protocols for the control and coordination of multiple agents with time delay. 2003 ,		5
485	Unresponsive flows and AQM performance.		32
484	Attitude alignment of a team of UAVs under decentralized information structure.		13
483	Stability of networked control systems in the presence of packet losses.		61
482	Practical aspects of video data transfer to network storage using 802.11 WLAN technology for low-end consumer digital cameras. 2003 , 49, 902-910		4

481	A genetic algorithm for the design of a fuzzy controller for active queue management. 2003 , 33, 313-324	25
480	A self-tuning structure for adaptation in TCP/AQM networks.	2
479	.	1
478	A duality model of TCP and queue management algorithms. 2003 , 11, 525-536	374
477	Statistical effects of control parameters on throughput of window-based transport method.	0
476	Efficient optimization of constrained nonlinear resource allocation.	7
475	On the design of AQM supporting TCP flows using robust control theory.	
474	End to end congestion control and active queue management.	
473	On the predictability of data network traffic.	6
472	Robustness of real and virtual queue based active queue management schemes.	4
471	H/sup /spl infin//-performance analysis of robust controllers designed for AQM.	
470	Connectivity-through-time protocols for dynamic wireless networks to support mobile robot teams.	6
469	A new TCP/AQM for stable operation in fast networks.	26
468	On the core of the multicommodity flow game. 2003 ,	6
467	Adaptive AIMD congestion control. 2003 ,	6
466	Distributed consensus protocols for coordinating buyers.	5
465	Robust mobile robotic formation control using Internet-like protocols.	
464	A unifying passivity framework for network flow control. 2003 ,	31

463	Controlling Internet queue dynamics using recursively identified models. 2003,		1
462	Jointly optimal congestion control and power control in wireless multihop networks.		3
461	Improving the static output feedback stabilizability of linear systems by introducing delays and time-varying gains: A comparison. 2003, 36, 357-362		
460	FAST TCP: motivation, architecture, algorithms, performance.		39
459	A robust approach to active queue management control in networks.		5
458	On a hybrid model for max-min congestion controllers. 2004,		
457	An adaptive control scheme for stabilizing TCP.		1
456	Robust output feedback active queue management control in TCP networks. 2004,		9
455	Analysis and improvement on the robustness of AQM in DiffServ networks. 2004,		
454	Bow ties, metabolism and disease. 2004, 22, 446-50		351
453	Simultaneous routing and resource allocation via dual decomposition. 2004, 52, 1136-1144		340
452	A scheduled controller design of congestion control considering network resource constraints. 2004, 149, 61-68		2
451	Positive matrices associated with synchronised communication networks. 2004, 393, 47-54		20
450	Stability of the Internet congestion control with diverse delays. <i>Automatica</i> , 2004, 40, 1533-1541	5.7	35
449	A unifying passivity framework for network flow control. <i>IEEE Transactions on Automatic Control</i> , 2004, 49, 162-174	5.9	133
448	Balancing supply and demand of bandwidth in wireless cellular networks: utility maximization over powers and rates.		26
447	To layer or not to layer: balancing transport and physical layers in wireless multihop networks.		45
446	Delay robustness of a class of nonlinear systems and applications to communication networks. 2004,
