Version: 2024-04-10

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
2287	A comparison of algorithms for maximum entropy parameter estimation. 2002 ,		177
2286	Developments in linear and integer programming. 2002 , 53, 1065-1071		3
2285	SNOPT: An SQP Algorithm for Large-Scale Constrained Optimization. 2002 , 12, 979-1006		1073
2284	An algorithm for nonlinear optimization using linear programming and equality constrained subproblems. <i>Mathematical Programming</i> , 2003 , 100, 27	2.1	19
2283	Mathematical programs with equilibrium constraints (MPECs) in process engineering. 2003 , 27, 1381-1392		75
2282	Inverse q-Columns Updating Methods for solving nonlinear systems of equations. 2003 , 158, 317-337		2
2281	GALAHAD, a library of thread-safe Fortran 90 packages for large-scale nonlinear optimization. 2003 , 29, 353-372		122
2280	Discrete Newton's method with local variations for solving large-scale nonlinear systems. 2003 , 52, 417-440		6
2279	A Lagrangean Relaxation Based Algorithm for Solving Set Partitioning Problems. 2004 ,		5
2278	Rank Reduction of Correlation Matrices by Majorization. 2004 ,		1
2277	New limited memory bundle method for large-scale nonsmooth optimization. 2004 , 19, 673-692		68
2276	Statistical Models for Empirical Search-Based Performance Tuning. 2004 , 18, 65-94		59
2275	STRSCNE: A Scaled Trust-Region Solver for Constrained Nonlinear Equations. 2004 , 28, 31-50		46
2274	Active set strategies in an ellipsoid algorithm for nonlinear programming. 2004 , 31, 941-962		2
2273	A starting point strategy for nonlinear interior methods. 2004 , 17, 945-952		19
2272	Rank reduction of correlation matrices by majorization. 2004 , 4, 649-662		42
2271	Nonlinear Optimization with Many Degrees of Freedom in Process Engineering. 2004 , 43, 6803-6812		11

2270	On the performance of switching BFGS/SR1 algorithms for unconstrained optimization. 2004 , 19, 153-164	3
2269	A Multidimensional Filter Algorithm for Nonlinear Equations and Nonlinear Least-Squares. 2004 , 15, 17-38	67
2268	The Scaling and Squaring Method for the Matrix Exponential Revisited. 2005 , 26, 1179-1193	331
2267	A simplicial branch-and-bound algorithm for solving quadratically constrained quadratic programs. <i>Mathematical Programming</i> , 2005 , 103, 251-282	2.1 100
2266	A comparison of complete global optimization solvers. <i>Mathematical Programming</i> , 2005 , 103, 335-356	2.1 92
2265	Sensitivity of trust-region algorithms to their parameters. 2005 , 3, 227-241	27
2264	Comparative Assessment of Algorithms and Software for Global Optimization. 2005 , 31, 613-633	27
2263	A Numerical Evaluation of Several Stochastic Algorithms on Selected Continuous Global Optimization Test Problems. 2005 , 31, 635-672	385
2262	Numerical Comparison of Augmented Lagrangian Algorithms for Nonconvex Problems. 2005 , 31, 31-55	70
2261	Software Quality Assurance for Mathematical Modeling Systems. 2005 , 267-284	
2260	Relax-and-Cut for Capacitated Network Design. 2005 , 47-58	16
2259	Decision-Aiding Methodology for the School Bus Routing and Scheduling Problem. 2005 , 39, 477-490	79
2258	An Interior Point Method for Mathematical Programs with Complementarity Constraints (MPCCs). 2005 , 15, 720-750	68
2257	A Filter-Trust-Region Method for Unconstrained Optimization. 2005 , 16, 341-357	63
2256	A Globally Convergent Linearly Constrained Lagrangian Method for Nonlinear Optimization. 2005 , 15, 863-897	35
2255	A Note on Trust-Region Radius Update. 2005 , 16, 548-562	13
2254	Strategies for Scaling and Pivoting for Sparse Symmetric Indefinite Problems. 2005 , 27, 313-340	49
2253	Practical active-set Euclidian trust-region method with spectral projected gradients for bound-constrained minimization. 2005 , 54, 305-325	19

2252	A New Conjugate Gradient Method with Guaranteed Descent and an Efficient Line Search. 2005 , 16, 170-192	604
2251	SNOPT: An SQP Algorithm for Large-Scale Constrained Optimization. 2005 , 47, 99-131	1289
2250	A server for automated performance analysis of benchmarking data. 2006 , 21, 105-120	15
2249	Multiscale Optimization Methods and Applications. 2006 ,	6
2248	Recent Advances in Bound Constrained Optimization. 2005 , 67-82	3
2247	Experimental Research in Evolutionary Computation. 2006 ,	2
2246	Optimality Measures for Performance Profiles. 2006 , 16, 891-909	22
2245	A New Active Set Algorithm for Box Constrained Optimization. 2006 , 17, 526-557	162
2244	Finding Optimal Algorithmic Parameters Using Derivative-Free Optimization. 2006 , 17, 642-664	87
2243	Interior Methods for Mathematical Programs with Complementarity Constraints. 2006 , 17, 52-77	120
2242	Implicit-Factorization Preconditioning and Iterative Solvers for Regularized Saddle-Point Systems. 2006 , 28, 170-189	44
2241	Numerical Optimization. 2006 ,	23
2240	Algorithm 851. 2006 , 32, 113-137	241
2239	Shifted limited-memory variable metric methods for large-scale unconstrained optimization. 2006 , 186, 365-390	15
2238	An acceleration of gradient descent algorithm with backtracking for unconstrained optimization. 2006 , 42, 63-73	39
2237	Double-Regularization Proximal Methods, with Complementarity Applications. 2006 , 33, 115-156	9
2236	Solving Convex MINLP Optimization Problems Using a Sequential Cutting Plane Algorithm. 2006 , 34, 63-83	14
2235	On the implementation of an interior-point filter line-search algorithm for large-scale nonlinear programming. <i>Mathematical Programming</i> , 2006 , 106, 25-57	2.1 4467

2234	An interior algorithm for nonlinear optimization that combines line search and trust region steps. <i>Mathematical Programming</i> , 2006 , 107, 391-408	2.1	584
2233	New algorithms for singly linearly constrained quadratic programs subject to lower and upper bounds. <i>Mathematical Programming</i> , 2006 , 106, 403-421	2.1	95
2232	A subspace implementation of quasi-Newton trust region methods for unconstrained optimization. 2006 , 104, 241-269		28
2231	Global convergence of a modified Fletcher-Reeves conjugate gradient method with Armijo-type line search. 2006 , 104, 561-572		151
2230	Solving Noisy, Large-Scale Fixed-Point Problems and Systems of Nonlinear Equations. 2006 , 40, 44-63		19
2229	A Testbed of Simulation-Optimization Problems. 2006 ,		29
2228	Computational enhancements in low-rank semidefinite programming. 2006 , 21, 493-512		18
2227	FILTRANE, a Fortran 95 filter-trust-region package for solving nonlinear least-squares and nonlinear feasibility problems. 2007 , 33, 3		16
2226	A filter-trust-region method for simple-bound constrained optimization. 2007 , 22, 835-848		8
2225	Some descent three-term conjugate gradient methods and their global convergence. 2007 , 22, 697-711		91
2224	Limited memory solution of bound constrained convex quadratic problems arising in video games. 2007 , 41, 19-34		5
2223	Optimization in SciDAC applications. 2007 , 78, 012052		1
2222	Enabling high performance computational science through combinatorial algorithms. 2007 , 78, 012058		
2221	Object Library of Algorithms for Dynamic Optimization Problems: Benchmarking SQP and Nonlinear Interior Point Methods. 2007 , 17, 515-537		8
2220	Iterative Solution of Augmented Systems Arising in Interior Methods. 2007 , 18, 666-690		25
2219	Greedy Coarsening Strategies for Nonsymmetric Problems. 2007 , 29, 2115-2143		5
2218	Integer Programming and Combinatorial Optimization. 2007 ,		2
2217	Experiences of sparse direct symmetric solvers. 2007 , 33, 18		8

2216	A numerical evaluation of sparse direct solvers for the solution of large sparse symmetric linear systems of equations. 2007 , 33, 10		95
2215	A Two-Term PRP-Based Descent Method. 2007 , 28, 1217-1230		76
2214	A multilevel Crout ILU preconditioner with pivoting and row permutation. 2007 , 14, 771-789		14
2213	A multi-iterate method to solve systems of nonlinear equations. 2007 , 183, 20-41		6
2212	Steplength selection in interior-point methods for quadratic programming. 2007 , 20, 516-523		3
2211	Efficient rank reduction of correlation matrices. 2007 , 422, 629-653		44
2210	Globalization strategies for Newton-Krylov methods for stabilized FEM discretization of Navier-Stokes equations. 2007 , 226, 2317-2340		9
2209	Developments in matching and scaling algorithms. 2007 , 7, 1010801-1010802		1
2208	ILU++: A new software package for solving sparse linear systems with iterative methods. 2007 , 7, 2020123-2020124		9
2207	Nonlinear optimization with GAMS /LGO. 2007 , 38, 79-101		31
2206	A particle swarm pattern search method for bound constrained global optimization. 2007 , 39, 197-219		212
2205	Matching-based preprocessing algorithms to the solution of saddle-point problems in large-scale nonconvex interior-point optimization. 2007 , 36, 321-341		126
2204	Progress in the dual simplex method for large scale LP problems: practical dual phase 1 algorithms. 2007 , 37, 49-65		37
2203	Nonmonotone projected gradient methods based on barrier and Euclidean distances. 2007 , 38, 305-327		9
2202	Active-constraint variable ordering for faster feasibility of mixed integer linear programs. <i>Mathematical Programming</i> , 2007 , 110, 445-474	2.1	29
2201	On the solution of large-scale SDP problems by the modified barrier method using iterative solvers. <i>Mathematical Programming</i> , 2007 , 109, 413-444	2.1	38
2200	Augmented Lagrangian methods under the constant positive linear dependence constraint qualification. <i>Mathematical Programming</i> , 2007 , 111, 5-32	2.1	92
2199	Globally convergent limited memory bundle method for large-scale nonsmooth optimization. <i>Mathematical Programming</i> , 2007 , 109, 181-205	2.1	64

2198	A globally convergent inexact Newton method with a new choice for the forcing term. 2007 , 157, 193-205	5
2197	A globally convergent Newton-GMRES method for large sparse systems of nonlinear equations. 2007 , 57, 235-252	59
2196	Sequential penalty quadratic programming filter methods for nonlinear programming. 2007 , 8, 118-129	22
2195	A framework for scalable greedy coloring on distributed-memory parallel computers. 2008 , 68, 515-535	33
2194	A Dai-Yuan conjugate gradient algorithm with sufficient descent and conjugacy conditions for unconstrained optimization. 2008 , 21, 165-171	23
2193	Structured minimal-memory inexact quasi-Newton method and secant preconditioners for augmented Lagrangian optimization. 2008 , 39, 1-16	20
2192	How good are projection methods for convex feasibility problems?. 2008 , 40, 1-12	12
2191	Dynamic updates of the barrier parameter in primal-dual methods for nonlinear programming. 2008 , 41, 1-25	17
2190	Further development of multiple centrality correctors for interior point methods. 2008 , 41, 277-305	36
2189	Progress in the dual simplex algorithm for solving large scale LP problems: techniques for a fast and stable implementation. 2008 , 41, 185-204	45
2188	Another hybrid conjugate gradient algorithm for unconstrained optimization. 2008 , 47, 143-156	40
2187	Subspace Barzilai-Borwein Gradient Method for Large-Scale Bound Constrained Optimization. 2008 , 58, 275-290	14
2186	A derivative-free algorithm for systems of nonlinear inequalities. 2008 , 2, 521-534	1
2185	A filter inexact-restoration method for nonlinear programming. 2008 , 16, 126-146	1
2184	Symmetric Permutations for I-Matrices to Avoid Small Pivots During Incomplete Factorization. 2008 , 8, 10821-10822	
2183	A new family of penalties for augmented Lagrangian methods. 2008 , 15, 925-944	5
2182	A quasi-Newton trust region method with a new conic model for the unconstrained optimization. 2008 , 204, 373-384	12
2181	A new trust region filter algorithm. 2008 , 204, 485-489	6

2180	An algorithmic framework for convex mixed integer nonlinear programs. 2008 , 5, 186-204	509
2179	Generalized filtering algorithms for infeasibility analysis. 2008 , 35, 1446-1464	7
2178	Two descent hybrid conjugate gradient methods for optimization. 2008 , 216, 251-264	17
2177	A limited memory BFGS-type method for large-scale unconstrained optimization. 2008 , 56, 1001-1009	39
2176	Integer programming solution approach for inventory-production distribution problems with direct shipments. 2008 , 15, 259-281	6
2175	Disk Packing in a Square: A New Global Optimization Approach. 2008 , 20, 516-524	39
2174	ORBIT: Optimization by Radial Basis Function Interpolation in Trust-Regions. 2008 , 30, 3197-3219	144
2173	A scaled nonlinear conjugate gradient algorithm for unconstrained optimization. 2008 , 57, 549-570	18
2172	A filter algorithm: comparison with NLP solvers. 2008 , 85, 667-689	2
2171	A Recommendation System for Preconditioned Iterative Solvers. 2008 ,	3
2170	Algorithm 875. 2008 , 34, 1-20	21
2169	Spectral conjugate gradient methods with sufficient descent property for large-scale unconstrained optimization. 2008 , 23, 275-293	55
2168	High Performance Computing for Computational Science - VECPAR 2008. 2008 ,	3
2167	Performance Profile Assessment of Electromagnetism-like Algorithms for Global Optimization. 2008 ,	3
2166	A Lifted Linear Programming Branch-and-Bound Algorithm for Mixed-Integer Conic Quadratic Programs. 2008 , 20, 438-450	79
2165	Dynamic Control of Infeasibility in Equality Constrained Optimization. 2008 , 19, 1299-1325	17
2164	A Truncated Descent HS Conjugate Gradient Method and Its Global Convergence. 2009 , 2009, 1-13	
2163	Nonlinear Conjugate Gradient Methods with Sufficient Descent Condition for Large-Scale Unconstrained Optimization. 2009 , 2009, 1-16	23

2162	A globally convergent trust region multidimensional filter SQP algorithm for nonlinear programming. 2009 , 86, 2201-2217		5
2161	Numerical solution of KKT systems in PDE-constrained optimization problems via the affine scaling trust-region approach View all notes . 2009 , 86, 2122-2142		
2160	A deficient-basis dual counterpart of Paparrizos, Samaras and Stephanides Primal-dual simplex-type algorithm View all notes . 2009 , 24, 187-204		24
2159	A numerical evaluation of preprocessing and ILU-type preconditioners for the solution of unsymmetric sparse linear systems using iterative methods. 2009 , 36, 1-26		3
2158	Encyclopedia of Optimization. 2008 , 2938-2953		4
2157	A Conjugate Gradient Method for Unconstrained Optimization Problems. 2009 , 2009, 1-14		7
2156	Computing proximal points of nonconvex functions. <i>Mathematical Programming</i> , 2009 , 116, 221-258	2.1	58
2155	A modified PRP conjugate gradient method. 2009 , 166, 73-90		52
2154	Trust-region quadratic methods for nonlinear systems of mixed equalities and inequalities. 2009 , 59, 859-876		30
2153	On HSS-based iteration methods for weakly nonlinear systems. 2009 , 59, 2923-2936		49
2152	A general algorithm for solving two-stage stochastic mixed 0-1 first-stage problems. 2009 , 36, 2590-2600		29
2151	Dealing with singularities in nonlinear unconstrained optimization. 2009 , 196, 33-42		3
2150	Improved convergence order for augmented penalty algorithms. 2009 , 44, 373-383		3
2149	Numerical comparison of merit function with filter criterion in inexact restoration algorithms using hard-spheres problems. 2009 , 44, 427-441		12
2148	Two modified Dai-Yuan nonlinear conjugate gradient methods. 2009 , 50, 1-16		12
2147	Solving Bilevel Linear Programs Using Multiple Objective Linear Programming. 2009 , 140, 197-212		28
2146	Hybrid Conjugate Gradient Algorithm for Unconstrained Optimization. 2009 , 141, 249-264		34
2145	BFC-MSMIP: an exact branch-and-fix coordination approach for solving multistage stochastic mixed 0-1 problems. 2009 , 17, 96-122		23

2144	Modified nonlinear conjugate gradient methods with sufficient descent property for large-scale optimization problems. 2009 , 3, 11-21	103
2143	SCIP: solving constraint integer programs. 2009 , 1, 1-41	641
2142	Information-based branching schemes for binary linear mixed integer problems. 2009 , 1, 249-293	32
2141	Optimization Strategies for Two-Mode Partitioning. 2009 , 26, 155-181	26
2140	New line search methods for unconstrained optimization. 2009 , 38, 29-39	30
2139	Acceleration of conjugate gradient algorithms for unconstrained optimization. 2009 , 213, 361-369	34
2138	Globally convergent PolakRibièrePolyak conjugate gradient methods under a modified Wolfe line search. 2009 , 215, 3082-3090	18
2137	Global convergence of a tri-dimensional filter SQP algorithm based on the line search method. 2009 , 59, 235-250	15
2136	A new LiuStorey type nonlinear conjugate gradient method for unconstrained optimization problems. 2009 , 225, 146-157	9
2135	BFGS trust-region method for symmetric nonlinear equations. 2009 , 230, 44-58	41
2134	A globally convergent BFGS method with nonmonotone line search for non-convex minimization. 2009 , 230, 95-106	9
2133	Accelerated conjugate gradient algorithm with finite difference Hessian/vector product approximation for unconstrained optimization. 2009 , 230, 570-582	13
2132	A conjugate gradient method with descent direction for unconstrained optimization. 2009 , 233, 519-530	67
2131	The Scaling and Squaring Method for the Matrix Exponential Revisited. 2009 , 51, 747-764	114
2130	How much do approximate derivatives hurt filter methods?. 2009 , 43, 309-329	1
2129	Branch-and-Cut Algorithmic Framework for 0-1 Mixed-Integer Convex Nonlinear Programs. 2009 , 48, 9119-9127	3
2128	Likelihood Gradient Evaluation Using Square-Root Covariance Filters. 2009 , 54, 646-651	27
2127	Dynamic Optimization of Nonlinear Processes with an Enhanced Scatter Search Method. 2009 , 48, 4388-4401	88

2126	Benchmarking Derivative-Free Optimization Algorithms. 2009 , 20, 172-191		312
2125	On Descent Spectral CG Algorithms for Training Recurrent Neural Networks. 2009 ,		2
2124	. 2009 ,		9
2123	Identifying Structure of Nonsmooth Convex Functions by the Bundle Technique. 2009 , 20, 820-840		16
2122	A nearly exact method for solving large-scale TRS. 2009 ,		
2121	Adaptive Barrier Update Strategies for Nonlinear Interior Methods. 2009 , 19, 1674-1693		57
2120	A reduction type penalty algorithm for nonlinear semi-infinite programming*. 2009 , 42, 40-45		
2119	References. 2010 , 655-741		
2118	Preconditioned conjugate gradient algorithms for nonconvex problems with box constraints. 2010 , 116, 149-175		2
2117	New accelerated conjugate gradient algorithms as a modification of Dai-Yuan's computational scheme for unconstrained optimization. 2010 , 234, 3397-3410		13
2116	A new two-step gradient-type method for large-scale unconstrained optimization. 2010 , 59, 3301-3307		10
2115	An inexact Newton method for nonconvex equality constrained optimization. <i>Mathematical Programming</i> , 2010 , 122, 273-299	2.1	30
2114	A retrospective trust-region method for unconstrained optimization. <i>Mathematical Programming</i> , 2010 , 123, 395-418	2.1	11
2113	Global minimization using an Augmented Lagrangian method with variable lower-level constraints. <i>Mathematical Programming</i> , 2010 , 125, 139-162	2.1	83
2112	Locating leak detecting sensors in a water distribution network by solving prize-collecting Steiner arborescence problems. <i>Mathematical Programming</i> , 2010 , 124, 119-141	2.1	8
2111	On solving trust-region and other regularised subproblems in optimization. 2010 , 2, 21-57		41
2110	Alternating direction augmented Lagrangian methods for semidefinite programming. 2010 , 2, 203-230		196
2109	Starting-point strategies for an infeasible potential reduction method. 2010 , 4, 131-146		8

2108	Continuous GRASP with a local active-set method for bound-constrained global optimization. 2010 , 48, 289-310	5
2107	A Non-monotone Line Search Algorithm for Unconstrained Optimization. 2010 , 42, 38-53	15
2106	Spectral Scaling BFGS Method. 2010 , 146, 305-319	19
2105	A truncated Newton method in an augmented Lagrangian framework for nonlinear programming. 2010 , 45, 311-352	14
2104	Convergence analysis of a modified BFGS method on convex minimizations. 2010 , 47, 237-255	59
2103	Proximal methods for nonlinear programming: double regularization and inexact subproblems. 2010 , 46, 279-304	4
2102	Partial spectral projected gradient method with active-set strategy for linearly constrained optimization. 2010 , 53, 23-52	8
2101	Sufficient descent nonlinear conjugate gradient methods with conjugacy condition. 2010 , 53, 113-131	22
2100	Accelerated hybrid conjugate gradient algorithm with modified secant condition for unconstrained optimization. 2010 , 54, 23-46	26
2099	dsoa: The implementation of a dynamic system optimization algorithm. 2010 , 31, 231-247	5
2098	A Matrix Partitioning Interface to PaToH in MATLAB. 2010 , 36, 254-272	5
2097	A comparative study of particle swarm optimization and its variants for phase stability and equilibrium calculations in multicomponent reactive and non-reactive systems. 2010 , 289, 110-121	40
2096	A curvilinear method based on minimal-memory BFGS updates. 2010 , 217, 882-892	3
2095	Relax and fix heuristics to solve one-stage one-machine lot-scheduling models for small-scale soft drink plants. 2010 , 37, 684-691	45
2094	On BFC-MSMIP strategies for scenario cluster partitioning, and twin node family branching selection and bounding for multistage stochastic mixed integer programming. 2010 , 37, 738-753	22
2093	Faster MIP solutions via new node selection rules. 2010 , 37, 1544-1556	8
2092	Numerical comparisons of two effective methods for mixed complementarity problems. 2010 , 234, 667-683	5
2091	Notes on the DaiYuanYuan modified spectral gradient method. 2010 , 234, 2986-2992	17

2090	A linear programming-based optimization algorithm for solving nonlinear programming problems. 2010 , 200, 658-670	6
2089	Accelerated scaled memoryless BFGS preconditioned conjugate gradient algorithm for unconstrained optimization. 2010 , 204, 410-420	45
2088	Global convergence of a robust filter SQP algorithm. 2010 , 206, 34-45	16
2087	Using truncated conjugate gradient method in trust-region method with two subproblems and backtracking line search. 2010 , 29,	2
2086	Efficient Pricing and Greeks in the Cross-Currency LIBOR Market Model. 2010 ,	4
2085	MODIFIED LIMITED MEMORY BFGS METHOD WITH NONMONOTONE LINE SEARCH FOR UNCONSTRAINED OPTIMIZATION. 2010 , 47, 767-788	17
2084	A Heuristic for Nonlinear Global Optimization. 2010 , 22, 59-70	24
2083	FilMINT: An Outer Approximation-Based Solver for Convex Mixed-Integer Nonlinear Programs. 2010 , 22, 555-567	70
2082	A Line Search Algorithm for Unconstrained Optimization. 2010 , 03, 503-509	7
2081	Two Modified Polak-Ribière-Polyak-Type Nonlinear Conjugate Methods with Sufficient Descent Property. 2010 , 31, 892-906	6
2080	Automatic dataflow application tuning for heterogeneous systems. 2010 ,	7
2079	A Generalized Wedelin Heuristic for Integer Programming. 2010 , 22, 93-107	5
2078	Using performance profiles to analyze the results of the 2006 CEC constrained optimization competition. 2010 ,	27
2077	An Inexact Bundle Approach to Cutting-Stock Problems. 2010 , 22, 131-143	5
2076	An Adaptive Constraint Handling Technique for Evolutionary Algorithms. 2010 ,	
2075	Probabilistic performance profiles for the experimental evaluation of stochastic algorithms. 2010 ,	5
2074	Adaptive limited memory bundle method for bound constrained large-scale nonsmooth optimization. 2010 , 59, 945-962	10
2073	Combination of Metaheuristic and Exact Algorithms for Solving Set Covering-Type Optimization Problems. 2010 , 22, 603-619	28

2072	Adaptive Techniques for Improving the Performance of Incomplete Factorization Preconditioning. 2010 , 32, 84-110	21
2071	A Fast Algorithm for Sparse Reconstruction Based on Shrinkage, Subspace Optimization, and Continuation. 2010 , 32, 1832-1857	144
2070	On Two-Dimensional Sparse Matrix Partitioning: Models, Methods, and a Recipe. 2010 , 32, 656-683	62
2069	Global Convergence of a New Hybrid Gauss-Newton Structured BFGS Method for Nonlinear Least Squares Problems. 2010 , 20, 2422-2441	17
2068	A New Relaxation Scheme for Mathematical Programs with Equilibrium Constraints. 2010 , 20, 2504-2539	45
2067	A New Perry Conjugate Gradient Method with the Generalized Conjugacy Condition. 2010 ,	7
2066	A Truncated SQP Method Based on Inexact Interior-Point Solutions of Subproblems. 2010 , 20, 2584-2613	19
2065	An adaptive retrospective trust region method for unconstrained optimization. 2010 ,	
2064	Variable-Stepsize Interpolating Explicit Parallel Peer Methods with Inherent Global Error Control. 2010 , 32, 1695-1723	20
2063	Numerical study of augmented Lagrangian algorithms for constrained global optimization. 2011 , 60, 1359-1378	15
2062	Efficient Preconditioner Updates for Shifted Linear Systems. 2011 , 33, 1785-1809	23
2061	A VaR Black-Sitterman model for the construction of absolute return fund-of-funds. 2011 , 11, 1489-1501	18
2060	A new trust-region method with line search for solving symmetric nonlinear equations. 2011 , 88, 2109-2123	20
2059	Atomic norm denoising with applications to line spectral estimation. 2011 ,	26
2058	On Optimal Tree Traversals for Sparse Matrix Factorization. 2011 ,	13
2057	Pressure ulcer prevention: An efficient turning schedule for bed-bound patients. 2011 ,	9
2056	A Supernodal Approach to Incomplete LU Factorization with Partial Pivoting. 2011 , 37, 1-20	22
2055	Knowledge-Based Resource Management for Distributed Problem Solving. 2011 , 121-128	11

2054	The BiCOR and CORS Iterative Algorithms for Solving Nonsymmetric Linear Systems. 2011 , 33, 3020-3036	20
2053	Hypergraph Partitioning-Based Fill-Reducing Ordering for Symmetric Matrices. 2011 , 33, 1996-2023	8
2052	Nonsymmetric Preconditioner Updates in Newton-Krylov Methods for Nonlinear Systems. 2011 , 33, 2595-2619	27
2051	A Three-Term Conjugate Gradient Method with Sufficient Descent Property for Unconstrained Optimization. 2011 , 21, 212-230	73
2050	Inexact Bundle Methods for Two-Stage Stochastic Programming. 2011 , 21, 517-544	56
2049	Chebyshev center based column generation. 2011 , 159, 2251-2265	8
2048	Models and algorithms to improve earthwork operations in road design using mixed integer linear programming. 2011 , 215, 470-480	40
2047	A sufficient descent LS conjugate gradient method for unconstrained optimization problems. 2011 , 218, 1577-1586	15
2046	On the solution of the KKT conditions of generalized Nash equilibrium problems. 2011 , 21, 1082-1108	72
2045	Direct Multisearch for Multiobjective Optimization. 2011 , 21, 1109-1140	186
2044	A semismooth sequential quadratic programming method for lifted mathematical programs with vanishing constraints. 2011 , 51, 919-941	4
2043	On the application of Newton-type methods to Fritz John optimality conditions. 2011 , 51, 1114-1127	
2042	Pattern discrete and mixed Hit-and-Run for global optimization. 2011 , 50, 597-627	8
2041	Scalar Correction Method for Solving Large Scale Unconstrained Minimization Problems. 2011 , 151, 304-320	5
2040	The importance of structure in incomplete factorization preconditioners. 2011 , 51, 385-404	8
2039	A global optimization method for the design of space trajectories. 2011 , 48, 635-652	68
2038	Sufficient descent directions in unconstrained optimization. 2011 , 48, 515-532	9
2037	Exploiting separability in large-scale linear support vector machine training. 2011 , 49, 241-269	11

2036	Applying Powell's symmetrical technique to conjugate gradient methods. 2011 , 49, 319-334		3
2035	A new class of penalized NCP-functions and its properties. 2011 , 50, 49-73		9
2034	Approximating Hessians in unconstrained optimization arising from discretized problems. 2011 , 50, 1-22		1
2033	Inexact restoration method for minimization problems arising in electronic structure calculations. 2011 , 50, 555-590		12
2032	A non-monotone line search multidimensional filter-SQP method for general nonlinear programming. 2011 , 56, 537-559		17
2031	Modified nonmonotone Armijo line search for descent method. 2011 , 57, 1-25		10
2030	Two effective hybrid conjugate gradient algorithms based on modified BFGS updates. 2011 , 58, 315-331		21
2029	Two minimal positive bases based direct search conjugate gradient methods for computationally expensive functions. 2011 , 58, 461-474		4
2028	A BFGS trust-region method for nonlinear equations. 2011 , 92, 317-333		48
2027	Orbital branching. <i>Mathematical Programming</i> , 2011 , 126, 147-178	2.1	72
2026	An unconstrained minimization method for solving low-rank SDP relaxations of the maxcut problem. <i>Mathematical Programming</i> , 2011 , 126, 119-146	2.1	8
2025	On the exact separation of mixed integer knapsack cuts. <i>Mathematical Programming</i> , 2011 , 128, 19-41	2.1	22
2024	Adaptive cubic regularisation methods for unconstrained optimization. Part I: motivation, convergence and numerical results. <i>Mathematical Programming</i> , 2011 , 127, 245-295	2.1	132
2023	Combining and scaling descent and negative curvature directions. <i>Mathematical Programming</i> , 2011 , 128, 285-319	2.1	4
2022	A least-squares minimum-cost network flow algorithm. 2011 , 186, 119-140		
2021	A feasible directions method for nonsmooth convex optimization. 2011 , 44, 363-377		10
2020	Accurate matrix exponential computation to solve coupled differential models in engineering. 2011 , 54, 1835-1840		15
2019	A modified CG-DESCENT method for unconstrained optimization. 2011 , 235, 3332-3341		9

2018	An improved multi-step gradient-type method for large scale optimization. 2011 , 61, 3312-3318	4
2017	A symmetric rank-one method based on extra updating techniques for unconstrained optimization. 2011 , 62, 392-400	3
2016	Surrogate-assisted clonal selection algorithms for expensive optimization problems. 2011 , 4, 81-97	17
2015	MIPLIB 2010. 2011 , 3, 103-163	235
2014	Analyzing facial expressions with fuzzy quantification theory II: indefinite generalized eigenvalue problem. 2011 , 28, 153-170	2
2013	A modified BFGS algorithm based on a hybrid secant equation. 2011 , 54, 2019-2036	13
2012	A practical method for solving large-scale TRS. 2011 , 5, 207-227	4
2011	Global convergence of some modified PRP nonlinear conjugate gradient methods. 2011 , 5, 615-630	20
2010	Modified nonlinear conjugate gradient method with sufficient descent condition for unconstrained optimization. 2011 , 2011,	6
2009	An augmented Lagrangian fish swarm based method for global optimization. 2011 , 235, 4611-4620	41
2008	Combining the regularization strategy and the SQP to solve MPCC A MATLAB implementation. 2011 , 235, 5348-5356	3
2007	New quasi-Newton methods via higher order tensor models. 2011 , 235, 2412-2422	16
2006	Improved Hessian approximation with modified secant equations for symmetric rank-one method. 2011 , 235, 2423-2431	8
2005	. 2011 , 235, 4978-4990	11
2004	Faster integer-feasibility in mixed-integer linear programs by branching to force change. 2011 , 38, 1143-1152	17
2003	Efficient orthogonal matrix polynomial based method for computing matrix exponential. 2011 , 217, 6451-6463	18
2002	A new globalization technique for nonlinear conjugate gradient methods for nonconvex minimization. 2011 , 217, 10295-10304	17
2001	The constrained compartmentalized knapsack problem: mathematical models and solution methods. 2011 , 212, 455-463	13

2000	Two modified HS type conjugate gradient methods for unconstrained optimization problems. 2011 , 74, 927-936	19
1999	A quantitative metric for robustness of nonlinear algebraic equation solvers. 2011 , 81, 2673-2687	2
1998	Stochastic algorithms assessment using performance profiles. 2011 ,	3
1997	Performance of NLP Algorithms with Inverse Dynamics for Near-Real Time Trajectory Generation. 2011 ,	2
1996	A Modified PRP Conjugate Gradient Algorithm with Trust Region for Optimization Problems. 2011 , 32, 496-506	3
1995	A modified conjugate gradient algorithm for optimization problems. 2011 ,	
1994	Semismooth SQP method for equality-constrained optimization problems with an application to the lifted reformulation of mathematical programs with complementarity constraints. 2011 , 26, 847-872	4
1993	Assessing the potential of interior point barrier filter line search methods: nonmonotone versus monotone approach. 2011 , 60, 1251-1268	9
1992	A penalty method and a regularization strategy to solve MPCC. 2011 , 88, 145-149	5
1991	Optimization-based approach to path planning for closed chain robot systems. 2011 , 21, 659-670	10
1990	Sufficient descent conjugate gradient methods for large-scale optimization problems. 2011 , 88, 3436-3447	3
1989	Structured symmetric rank-one method for unconstrained optimization. 2011 , 88, 2608-2617	5
1988	An active-set trust-region method for derivative-free nonlinear bound-constrained optimization. 2011 , 26, 873-894	26
1987	A symmetric rank-one quasi-Newton line-search method using negative curvature directions. 2011 , 26, 455-486	3
1986	An Affine-Scaling Interior-Point Method for Continuous Knapsack Constraints with Application to Support Vector Machines. 2011 , 21, 361-390	15
1985	AN INFEASIBLE SSLE FILTER ALGORITHM FOR GENERAL CONSTRAINED OPTIMIZATION WITHOUT STRICT COMPLEMENTARITY. 2011 , 28, 361-399	2
1984	COMBINATION ADAPTIVE TRUST REGION METHOD BY NON-MONOTONE STRATEGY FOR UNCONSTRAINED NONLINEAR PROGRAMMING. 2011 , 28, 585-600	2
1983	Global Convergence of a Nonlinear Conjugate Gradient Method. 2011 , 2011, 1-22	0

1982	Configuration optimization of dampers for adjacent buildings under seismic excitations. 2012 , 44, 1491-1509	22
1981	Global Convergence of a Spectral Conjugate Gradient Method for Unconstrained Optimization. 2012 , 2012, 1-12	4
1980	Accumulative Approach in Multistep Diagonal Gradient-Type Method for Large-Scale Unconstrained Optimization. 2012 , 2012, 1-11	2
1979	On the Simplex Algorithm Initializing. 2012 , 2012, 1-15	2
1978	The boundedness of penalty parameters in an augmented Lagrangian method with constrained subproblems. 2012 , 27, 1001-1024	21
1977	A hybrid heuristic for the k-medoids clustering problem. 2012 ,	1
1976	A New Trust Region Method with Self-adaptive Update Rules for Unconstrained Optimization. 2012 ,	
1975	An Empirical Analysis of the Performance of Preconditioners for SPD Systems. 2012 , 38, 1-30	7
1974	A Subspace Modified PRP Method for Large-scale Nonlinear Box-Constrained Optimization. 2012 , 33, 1372-1385	1
1973	Algorithms and Software for Convex Mixed Integer Nonlinear Programs. 2012 , 1-39	90
1972	New modifications of conjugate gradient coefficient with global convergence properties. 2012 ,	
1971	Visibility Based Preconditioning for bundle adjustment. 2012 ,	11
1970	A TRUST REGION SUBSPACE METHOD FOR LARGE-SCALE UNCONSTRAINED OPTIMIZATION. 2012 , 29, 1250021	1
1969	THE BARZILAI AND BORWEIN GRADIENT METHOD WITH NONMONOTONE LINE SEARCH FOR NONSMOOTH CONVEX OPTIMIZATION PROBLEMS. 2012 , 17, 203-216	15
1968	An accelerated conjugate gradient algorithm with guaranteed descent and conjugacy conditions for unconstrained optimization. 2012 , 27, 583-604	2
1967	A pivoting algorithm for linear programming with linear complementarity constraints. 2012 , 27, 89-114	11
1966	A Descent Dai-Liao Conjugate Gradient Method Based on a Modified Secant Equation and Its Global Convergence. 2012 , 2012, 1-8	10
1965	A non-monotone trust region algorithm for unconstrained optimization with dynamic reference iteration updates using filter. 2012 , 61, 733-763	2

1964	A family of adaptive penalty schemes for steady-state genetic algorithms. 2012 ,	2
1963	Benchmarking time series according to a growth rates preservation principle. 2012 , 37, 225-252	5
1962	Benchmarking a derivative-free minimax optimizer for EM design. 2012 ,	1
1961	INTELCSP: computational intelligence applied to cutting stock problems. 2012 , 1, 312	
1960	Global Convergence of Augmented Lagrangian Methods Applied to Optimization Problems with Degenerate Constraints, Including Problems with Complementarity Constraints. 2012 , 22, 1579-1606	44
1959	A Preconditioning Framework for Sequences of Diagonally Modified Linear Systems Arising in Optimization. 2012 , 50, 3280-3302	17
1958	Improved Inverse Scaling and Squaring Algorithms for the Matrix Logarithm. 2012 , 34, C153-C169	44
1957	Global optimization of mixed-integer quadratically-constrained quadratic programs (MIQCQP) through piecewise-linear and edge-concave relaxations. <i>Mathematical Programming</i> , 2012 , 136, 155-182 ^{2.1}	71
1956	SpeedDP: an algorithm to compute SDP bounds for very large Max-Cut instances. <i>Mathematical Programming</i> , 2012 , 136, 353-373	2.1 7
1955	A nonmonotone filter method for nonlinear optimization. 2012 , 52, 583-607	28
1954	Updating the regularization parameter in the adaptive cubic regularization algorithm. 2012 , 53, 1-22	21
1953	A hybrid ODE-based method for unconstrained optimization problems. 2012 , 53, 249-270	5
1952	Evaluating bound-constrained minimization software. 2012 , 53, 347-373	15
1951	Active-set Newton methods for mathematical programs with vanishing constraints. 2012 , 53, 425-452	8
1950	Constrained Dogleg methods for nonlinear systems with simple bounds. 2012 , 53, 771-794	13
1949	A Quadratic Hybridization of PolakRibièrePolyak and FletcherReeves Conjugate Gradient Methods. 2012 , 154, 916-932	17
1948	An Active Set Modified PolakRibièrePolyak Method for Large-Scale Nonlinear Bound Constrained Optimization. 2012 , 155, 1084-1094	12
1947	A two-stage heuristic for multi-activity and task assignment to work shifts. 2012 , 63, 831-841	14

1946	On Computing Inverse Entries of a Sparse Matrix in an Out-of-Core Environment. 2012 , 34, A1975-A1999	22
1945	Energy efficiency of knowledge-free scheduling in Peer-to-Peer Desktop Grids. 2012 ,	4
1944	Asynchronous teams for joint lot-sizing and scheduling problem in flow shops. 2012 , 50, 5809-5822	3
1943	An \$ell_1\$ Elastic Interior-Point Method for Mathematical Programs with Complementarity Constraints. 2012 , 22, 187-211	3
1942	Optimal design of viscous damper connectors for adjacent structures using genetic algorithm and Nelder-Mead algorithm. 2012 ,	2
1941	The convergence rate of a restart MFR conjugate gradient method with inexact line search. 2012 , 218, 11380-11390	3
1940	A new class of nonlinear conjugate gradient coefficients with global convergence properties. 2012 , 218, 11323-11332	44
1939	An accelerated Picard method for nonlinear systems related to variably saturated flow. 2012 , 38, 92-101	58
1938	Conjugate gradient methods based on secant conditions that generate descent search directions for unconstrained optimization. 2012 , 236, 4303-4317	28
1937	On the performance of a new symmetric rank-one method with restart for solving unconstrained optimization problems. 2012 , 64, 2141-2152	1
1936	An active set feasible method for large-scale minimization problems with bound constraints. 2012 , 53, 395-423	13
1935	On the influence of the critical lagrange multipliers on the convergence rate of the multiplier method. 2012 , 52, 1504-1519	3
1934	Comparing different nonsmooth minimization methods and software. 2012 , 27, 131-153	32
1933	Global Optimization Approaches for Optimal Trajectory Planning. 2012 , 111-140	2
1932	A conjugate directions approach to improve the limited-memory BFGS method. 2012 , 219, 800-809	6
1931	A continuation approach for solving binary quadratic program based on a class of NCP-functions. 2012 , 219, 3975-3992	2
1930	Disjunctive Cuts for Nonconvex MINLP. 2012 , 117-144	10
1929	A computational study of a solver system for processing two-stage stochastic LPs with enhanced Benders decomposition. 2012 , 4, 211-238	34

1928	LP and SDP branch-and-cut algorithms for the minimum graph bisection problem: a computational comparison. 2012 , 4, 275-306	14
1927	A comparative study of SQP-type algorithms for nonlinear and nonconvex mixed-integer optimization. 2012 , 4, 383-412	23
1926	Distributed Computation of Equilibria in Monotone Nash Games via Iterative Regularization Techniques. 2012 , 22, 1177-1205	57
1925	Compressive sensing off the grid. 2012 ,	21
1924	A class of nonmonotone Armijo-type line search method for unconstrained optimization. 2012 , 61, 387-404	18
1923	New Trends in Agent-Based Complex Automated Negotiations. 2012 ,	3
1922	AN IMPROVED SPECTRAL CONJUGATE GRADIENT NEURAL NETWORK TRAINING ALGORITHM. 2012 , 21, 1250009	6
1921	Using the economical order quantity formula for inventory control in one-warehouse multiretailer systems. 2012 , 59, 285-297	3
1920	A Nonlinear GMRES Optimization Algorithm for Canonical Tensor Decomposition. 2012 , 34, A1351-A1379	27
1919	Local path-following property of inexact interior methods in nonlinear programming. 2012 , 52, 209-238	5
1918	A filter trust-region algorithm for unconstrained optimization with strong global convergence properties. 2012 , 52, 239-266	7
1917	A combined class of self-scaling and modified quasi-Newton methods. 2012 , 52, 393-408	8
1916	Multiple Workflow Scheduling Strategies with User Run Time Estimates on a Grid. 2012 , 10, 325-346	55
1915	Globally Convergent Three-Term Conjugate Gradient Methods that Use Secant Conditions and Generate Descent Search Directions for Unconstrained Optimization. 2012 , 153, 733-757	48
1914	An efficient nonmonotone trust-region method for unconstrained optimization. 2012 , 59, 523-540	36
1913	A new general form of conjugate gradient methods with guaranteed descent and strong global convergence properties. 2012 , 60, 135-152	1
1912	Conjugate gradient methods using value of objective function for unconstrained optimization. 2012 , 6, 941-955	4
1911	Optimizing radial basis functions by d.c. programming and its use in direct search for global derivative-free optimization. 2012 , 20, 190-214	8

1910	A penalty-interior-point algorithm for nonlinear constrained optimization. 2012 , 4, 181-209	13
1909	Computation of sparse low degree interpolating polynomials and their application to derivative-free optimization. <i>Mathematical Programming</i> , 2012 , 134, 223-257	2.1 29
1908	Some projection methods with the BB step sizes for variational inequalities. 2012 , 236, 2590-2604	13
1907	A modified conjugate gradient algorithm with cyclic Barzilai-Borwein steplength for unconstrained optimization. 2012 , 236, 3101-3110	4
1906	Another improved Wei-Yao-Liu nonlinear conjugate gradient method with sufficient descent property. 2012 , 218, 7421-7430	34
1905	Globally convergent modified Perry's conjugate gradient method. 2012 , 218, 9197-9207	22
1904	A nonmonotone trust-region line search method for large-scale unconstrained optimization. 2012 , 36, 478-487	42
1903	A line search filter algorithm with inexact step computations for equality constrained optimization. 2012 , 62, 212-223	4
1902	On active-set methods for the quadratic programming problem. 2012 , 52, 512-523	3
1901	Globally solving nonconvex quadratic programming problems via completely positive programming. 2012 , 4, 33-52	55
1900	Global convergence of a modified Hestenes-Stiefel nonlinear conjugate gradient method with Armijo line search. 2012 , 59, 79-93	10
1899	Recourse-based stochastic nonlinear programming: properties and Benders-SQP algorithms. 2012 , 51, 77-123	11
1898	TRESNEI, a Matlab trust-region solver for systems of nonlinear equalities and inequalities. 2012 , 51, 27-49	22
1897	Semismooth Newton method for the lifted reformulation of mathematical programs with complementarity constraints. 2012 , 51, 199-221	18
1896	Using approximate secant equations in limited memory methods for multilevel unconstrained optimization. 2012 , 51, 967-979	
1895	Augmented Lagrangian method with nonmonotone penalty parameters for constrained optimization. 2012 , 51, 941-965	34
1894	How good are extrapolated bi-projection methods for linear feasibility problems?. 2012 , 51, 1089-1095	1
1893	Integrated experimental design and nonlinear optimization to handle computationally expensive models under resource constraints. 2013 , 57, 191-215	7

1892	GloMIQO: Global mixed-integer quadratic optimizer. 2013 , 57, 3-50	147

1850	Derivative-Free Optimization of Expensive Functions with Computational Error Using Weighted Regression. 2013 , 23, 27-53	21
1849	Numerical Methods for Differential Equations, Optimization, and Technological Problems. 2013 ,	
1848	A new conjugate gradient algorithm for training neural networks based on a modified secant equation. 2013 , 221, 491-502	24
1847	Subgradient and Bundle Methods for Nonsmooth Optimization. 2013 , 275-304	2
1846	Compressed Sensing Off the Grid. 2013 , 59, 7465-7490	594
1845	Preconditioning Newton-Krylov methods in nonconvex large scale optimization. 2013 , 56, 253-290	19
1844	Symmetric Perry conjugate gradient method. 2013 , 56, 317-341	3
1843	A practical relative error criterion for augmented Lagrangians. <i>Mathematical Programming</i> , 2013 , 141, 319-348	2.1 29
1842	A Subspace Version of the Powell-Yuan Trust-Region Algorithm for Equality Constrained Optimization. 2013 , 1, 425-451	7
1841	A modified scaled memoryless BFGS preconditioned conjugate gradient method for unconstrained optimization. 2013 , 11, 361-374	17
1840	Global convergence of a modified limited memory BFGS method for non-convex minimization. 2013 , 29, 555-566	6
1839	A robust and efficient proposal for solving linear systems arising in interior-point methods for linear programming. 2013 , 56, 573-597	5

1838	An adaptive gradient sampling algorithm for non-smooth optimization. 2013 , 28, 1302-1324	33
1837	Non Monotone Backtracking Inexact BFGS Method for Regression Analysis. 2013 , 42, 214-238	
1836	Non-intrusive termination of noisy optimization. 2013 , 28, 993-1011	1
1835	An Improved Schur--Pad*Algorithm for Fractional Powers of a Matrix and Their Frchet Derivatives. 2013 , 34, 1341-1360	38
1834	NICSLU: An Adaptive Sparse Matrix Solver for Parallel Circuit Simulation. 2013 , 32, 261-274	37
1833	Smoothing inexact Newton methods for NCP with various nonmonotone techniques. 2013 , 13, 385-386	
1832	An Optimal Algorithm for Constrained Differentiable Convex Optimization. 2013 , 23, 1939-1955	8
1831	The Limited Memory Conjugate Gradient Method. 2013 , 23, 2150-2168	65
1830	Feasible BarzilaiBorwein-like methods for extreme symmetric eigenvalue problems. 2013 , 28, 756-784	10
1829	From global to local convergence of interior methods for nonlinear optimization. 2013 , 28, 1051-1080	14
1828	A Class of Descent Nonlinear Conjugate Gradient Methods. 2013 ,	
1827	Atomic Norm Denoising With Applications to Line Spectral Estimation. 2013 , 61, 5987-5999	253
1826	A modified two-point stepsize gradient algorithm for unconstrained minimization. 2013 , 28, 1040-1050	9
1825	Theoretical and numerical comparison of relaxation methods for mathematical programs with complementarity constraints. <i>Mathematical Programming</i> , 2013 , 137, 257-288	2.1 89
1824	Monotone and nonmonotone trust-region-based algorithms for large scale unconstrained optimization problems. 2013 , 54, 27-43	3
1823	Nonmonotone spectral method for large-scale symmetric nonlinear equations. 2013 , 62, 149-162	12
1822	Dynamic sequencing and cut consolidation for the parallel hybrid-cut nested L-shaped method. 2013 , 230, 143-156	23
1821	A Nonlinear Conjugate Gradient Algorithm with an Optimal Property and an Improved Wolfe Line Search. 2013 , 23, 296-320	152

1820	Computing matrix functions arising in engineering models with orthogonal matrix polynomials. 2013 , 57, 1738-1743	8
1819	A restoration-free filter SQP algorithm for equality constrained optimization. 2013 , 219, 6016-6029	6
1818	Comparison of global optimization algorithms for the design of water-using networks. 2013 , 52, 249-261	34
1817	Global convergence of a general filter algorithm based on an efficiency condition of the step. 2013 , 219, 9581-9597	6
1816	Efficient computation of the matrix cosine. 2013 , 219, 7575-7585	10
1815	Spectral-scaling quasi-Newton methods with updates from the one parameter of the Broyden family. 2013 , 248, 88-98	1
1814	Achieving MILP feasibility quickly using general disjunctions. 2013 , 40, 2094-2102	3
1813	Assessment of capabilities and limitations of stochastic global optimization methods for modeling mean activity coefficients of ionic liquids. 2013 , 340, 15-26	13
1812	A Gauss-Newton Approach for Solving Constrained Optimization Problems Using Differentiable Exact Penalties. 2013 , 156, 417-449	3
1811	A BFGS algorithm for solving symmetric nonlinear equations. 2013 , 62, 85-99	18
1810	A Matrix-Free Preconditioner for Sparse Symmetric Positive Definite Systems and Least-Squares Problems. 2013 , 35, A192-A211	23
1809	Benders Decomposition for the Hop-Constrained Survivable Network Design Problem. 2013 , 25, 13-26	52
1808	A New Regularization Method for Mathematical Programs with Complementarity Constraints with Strong Convergence Properties. 2013 , 23, 770-798	29
1807	Mixed-integer nonlinear optimization* 2013 , 22, 1-131	376
1806	A new method for solving Pareto eigenvalue complementarity problems. 2013 , 55, 703-731	19
1805	A new class of spectral conjugate gradient methods based on a modified secant equation for unconstrained optimization. 2013 , 239, 396-405	15
1804	Low-complexity optimal discrete-rate spectrum balancing in digital subscriber lines. 2013 , 93, 23-34	2
1803	An adaptive constraint handling technique for evolutionary algorithms. 2013 , 62, 241-253	10

1802	Computing the Fréchet Derivative of the Matrix Logarithm and Estimating the Condition Number. 2013 , 35, C394-C410	37
1801	Rate of Convergence of a Restarted CG-DESCENT Method. 2013 , 34, 648-663	
1800	Community detection by modularity maximization using GRASP with path relinking. 2013 , 40, 3121-3131	41
1799	Constraint consensus concentration for identifying disjoint feasible regions in nonlinear programmes. 2013 , 28, 339-363	6
1798	Level bundle-like algorithms for convex optimization. 2013 , 59, 787	4
1797	Subgradient Method for Nonconvex Nonsmooth Optimization. 2013 , 157, 416-435	20
1796	A Sequential Quadratic Programming Method for Nonlinear Programming without a Penalty or a Filter. 2013 ,	1
1795	Many-objective optimization using differential evolution with variable-wise mutation restriction. 2013 ,	21
1794	An efficient constraint handling approach for optimization problems with limited feasibility and computationally expensive constraint evaluations. 2013 ,	
1793	On branching rules for convex mixed-integer nonlinear optimization. 2013 , 18,	7
1792	An Adaptive Prediction-Correction Method for Solving Large-Scale Nonlinear Systems of Monotone Equations with Applications. 2013 , 2013, 1-13	1
1791	Valid Linear Programming Bounds for Exact Mixed-Integer Programming. 2013 , 25, 271-284	6
1790	A Globally Convergent Hybrid Conjugate Gradient Method and Its Numerical Behaviors. 2013 , 2013, 1-14	
1789	A Self-Adjusting Spectral Conjugate Gradient Method for Large-Scale Unconstrained Optimization. 2013 , 2013, 1-8	
1788	Fine-Grained Multithreading for the Multifrontal \$QR\$ Factorization of Sparse Matrices. 2013 , 35, C323-C345	28
1787	Limited Memory Block Krylov Subspace Optimization for Computing Dominant Singular Value Decompositions. 2013 , 35, A1641-A1668	36
1786	A Modified Hestenes-Stiefel Conjugate Gradient Algorithm for Large-Scale Optimization. 2013 , 34, 914-937	24
1785	Generalized orienteering problem with resource dependent rewards. 2013 , 60, 294-312	18

1784	A hybrid conjugate gradient method based on a quadratic relaxation of the Dai-Yuan hybrid conjugate gradient parameter. 2013 , 62, 929-941	3
1783	Optimization of a Single Lithium-Ion Battery Cell with a Gradient-Based Algorithm. 2013 , 160, A1071-A1078	44
1782	Semismooth equation approach to Network Utility Maximization (NUM). 2013 ,	
1781	Optimization-Based Algorithms for Tensor Decompositions: Canonical Polyadic Decomposition, Decomposition in Rank- $(L_r, L_r, 1)$ Terms, and a New Generalization. 2013 , 23, 695-720	250
1780	AN ADAPTIVE GRADIENT ALGORITHM FOR LARGE-SCALE NONLINEAR BOUND CONSTRAINED OPTIMIZATION. 2013 , 30, 1340005	
1779	A CONIC AFFINE SCALING DOGLEG METHOD FOR NONLINEAR OPTIMIZATION WITH BOUND CONSTRAINTS. 2013 , 30, 1340011	2
1778	Reducing the influence of tiny normwise relative errors on performance profiles. 2013 , 39, 1-11	8
1777	Nonlinear conjugate gradient methods with sufficient descent properties for unconstrained optimization. 2013 , 9, 595-619	11
1776	Two Modified Three-Term Type Conjugate Gradient Methods and Their Global Convergence for Unconstrained Optimization. 2014 , 2014, 1-9	0
1775	Several Guaranteed Descent Conjugate Gradient Methods for Unconstrained Optimization. 2014 , 2014, 1-14	1
1774	Sufficient Descent Conjugate Gradient Methods for Solving Convex Constrained Nonlinear Monotone Equations. 2014 , 2014, 1-12	6
1773	On the effectiveness of nature-inspired metaheuristic algorithms for performing phase equilibrium thermodynamic calculations. 2014 , 2014, 374510	8
1772	Algorithm 943. 2014 , 40, 1-12	5
1771	AN ADAPTIVE CONJUGACY CONDITION AND RELATED NONLINEAR CONJUGATE GRADIENT METHODS. 2014 , 11, 1350092	4
1770	The convergence rate of a three-term HS method with restart strategy for unconstrained optimization problems. 2014 , 63, 1387-1400	
1769	Strong-branching inequalities for convex mixed integer nonlinear programs. 2014 , 59, 639-665	2
1768	Study of a primal-dual algorithm for equality constrained minimization. 2014 , 59, 405-433	13
1767	A Hybrid of DL and WYL Nonlinear Conjugate Gradient Methods. 2014 , 2014, 1-9	4

1766	On the Strong Convergence of a Sufficient Descent Polak-Ribière-Polyak Conjugate Gradient Method. 2014 , 2014, 1-7	
1765	Intelligent Firefly Algorithm for Global Optimization. 2014 , 315-330	13
1764	The Hybrid BFGS-CG Method in Solving Unconstrained Optimization Problems. 2014 , 2014, 1-6	4
1763	A Modified Conjugacy Condition and Related Nonlinear Conjugate Gradient Method. 2014 , 2014, 1-9	1
1762	A New Method with Sufficient Descent Property for Unconstrained Optimization. 2014 , 2014, 1-7	2
1761	The global convergence properties of a conjugate gradient method. 2014 ,	2
1760	The proof of sufficient descent condition for a new type of conjugate gradient methods. 2014 ,	5
1759	The CG-BFGS method for unconstrained optimization problems. 2014 ,	0
1758	Fletcher Reeves like CG formula approach on Broyden family update. 2014 ,	
1757	Subspace Methods for Computing the Pseudospectral Abscissa and the Stability Radius. 2014 , 35, 292-313	26
1756	Two hybrid nonlinear conjugate gradient methods based on a modified secant equation. 2014 , 63, 1027-1042	5
1755	SCAPE: Safe Charging with Adjustable Power. 2014 ,	16
1754	A derivative-free PRP method for solving large-scale nonlinear systems of equations and its global convergence. 2014 , 29, 503-514	7
1753	Damped techniques for enforcing convergence of quasi-Newton methods. 2014 , 29, 919-936	5
1752	Global convergence of a modified conjugate gradient method. 2014 , 2014,	
1751	A modified BFGS method for solving symmetric nonlinear equations. 2014 , 17, 461-469	1
1750	A Novel Approach for Solving Semidefinite Programs. 2014 , 2014, 1-9	
1749	A note on effective phase stability calculations using a Gradient-Based Cuckoo Search algorithm. 2014 , 375, 360-366	12

1748	A branch-cut-and-price algorithm for the vehicle routing problem with stochastic demands. 2014 , 50, 141-153	50
1747	Models and strategies for efficiently determining an optimal vertical alignment of roads. 2014 , 44, 161-173	27
1746	HOPS [Hamming-Oriented Partition Search for production planning in the spinning industry. 2014 , 234, 266-277	21
1745	Quasi-Newton methods based on ordinary differential equation approach for unconstrained nonlinear optimization. 2014 , 233, 272-291	3
1744	A regularized limited memory BFGS method for nonconvex unconstrained minimization. 2014 , 65, 305-323	4
1743	Path-following gradient-based decomposition algorithms for separable convex optimization. 2014 , 59, 59-80	8
1742	A Note on Convex Reformulation Schemes for Mixed Integer Quadratic Programs. 2014 , 160, 457-469	3
1741	Adaptive energy efficient scheduling in Peer-to-Peer desktop grids. 2014 , 36, 209-220	23
1740	On the incomplete oblique projections method for solving box constrained least squares problems. 2014 , 66, 17-32	
1739	An accelerated subspace minimization three-term conjugate gradient algorithm for unconstrained optimization. 2014 , 65, 859-874	22
1738	A modified ODE-based algorithm for unconstrained optimization problems. 2014 , 65, 233-250	
1737	An inexact line search approach using modified nonmonotone strategy for unconstrained optimization. 2014 , 66, 49-78	21
1736	Accurate and efficient matrix exponential computation. 2014 , 91, 97-112	9
1735	A nonmonotone approximate sequence algorithm for unconstrained nonlinear optimization. 2014 , 57, 27-43	
1734	Particle swarm with radial basis function surrogates for expensive black-box optimization. 2014 , 5, 12-23	67
1733	An accurate active set conjugate gradient algorithm with project search for bound constrained optimization. 2014 , 8, 763-776	2
1732	A model-hybrid approach for unconstrained optimization problems. 2014 , 66, 741-759	3
1731	A nonmonotone supermemory gradient algorithm for unconstrained optimization. 2014 , 46, 215-235	4

1730	A first-order block-decomposition method for solving two-easy-block structured semidefinite programs. 2014 , 6, 103-150	13
1729	Globally convergent exact and inexact parametric algorithms for solving large-scale mixed-integer fractional programs and applications in process systems engineering. 2014 , 61, 90-101	53
1728	Two modified scaled nonlinear conjugate gradient methods. 2014 , 261, 172-182	15
1727	The Dai-Liao nonlinear conjugate gradient method with optimal parameter choices. 2014 , 234, 625-630	57
1726	Two modified three-term conjugate gradient methods with sufficient descent property. 2014 , 8, 2285-2297	19
1725	An improved nonlinear conjugate gradient method with an optimal property. 2014 , 57, 635-648	8
1724	Lattice preconditioning for the real relaxation branch-and-bound approach for integer least squares problems. 2014 , 59, 227-242	3
1723	The optimization test environment. 2014 , 15, 443-468	11
1722	A modified DIRECT algorithm with bilevel partition. 2014 , 60, 483-499	21
1721	Damped Techniques for the Limited Memory BFGS Method for Large-Scale Optimization. 2014 , 161, 688-699	9
1720	Superlinearly Convergent Exact Penalty Methods with Projected Structured Secant Updates for Constrained Nonlinear Least Squares. 2014 , 162, 154-190	4
1719	A Framework for Globally Optimizing Mixed-Integer Signomial Programs. 2014 , 161, 905-932	19
1718	A variance-based method to rank input variables of the Mesh Adaptive Direct Search algorithm. 2014 , 8, 1599-1610	8
1717	Some sufficient descent conjugate gradient methods and their global convergence. 2014 , 33, 333-347	9
1716	A matrix-free approach to build band preconditioners for large-scale bound-constrained optimization. 2014 , 268, 82-92	5
1715	Aggregate codifferential method for nonsmooth DC optimization. 2014 , 259, 851-867	6
1714	Nonmonotone adaptive trust region method based on simple conic model for unconstrained optimization. 2014 , 9, 1211-1238	1
1713	Comparison of Mixed-Integer Programming and Genetic Algorithm Methods for Distributed Generation Planning. 2014 , 29, 833-843	35

1712	A dwindling filter line search method for unconstrained optimization. 2014 , 84, 187-208		10
1711	Spectral method and its application to the conjugate gradient method. 2014 , 240, 339-347		1
1710	Efficient pricing of Bermudan options using recombining quadratures. 2014 , 271, 195-205		8
1709	A nonmonotone trust region method based on simple quadratic models. 2014 , 272, 107-115		3
1708	An improved sequential quadratic programming algorithm for solving general nonlinear programming problems. 2014 , 409, 777-789		7
1707	Improved semidefinite bounding procedure for solving Max-Cut problems to optimality. <i>Mathematical Programming</i> , 2014 , 143, 61-86	2.1	22
1706	A new nonmonotone trust region method for unconstrained optimization equipped by an efficient adaptive radius. 2014 , 29, 819-836		6
1705	A convergent inexact solution method for equilibrium problems. 2014 , 29, 979-991		11
1704	An interior point method for nonlinear programming with infeasibility detection capabilities. 2014 , 29, 837-854		12
1703	Sparse Hessian factorization in curved trajectories for unconstrained minimization. 2014 , 29, 1-9		2
1702	Numerical simulations of the airflows in a wine-aging room: A lattice Boltzmann-Immersed Boundary study. 2014 , 109, 261-270		8
1701	On the convergence properties of the unmodified PRP method with a non-descent line search. 2014 , 29, 484-496		8
1700	An algorithm for the topology optimization of geometrically nonlinear structures. 2014 , 99, 391-409		17
1699	AN IMPROVED ADAPTIVE TRUST-REGION METHOD FOR UNCONSTRAINED OPTIMIZATION. 2014 , 19, 469-490		8
1698	Numerical Solution of Bivariate and Polyanalytic Polynomial Systems. 2014 , 52, 1551-1572		11
1697	Simulation optimization: a review of algorithms and applications. 2014 , 12, 301-333		73
1696	A descent extension of the Polak-Ribiere-Polyak conjugate gradient method. 2014 , 68, 2005-2011		24
1695	Global and local convergence of a nonmonotone SQP method for constrained nonlinear optimization. 2014 , 59, 435-473		3

- 1694 Decomposition of Catalan numbers and convex polygon triangulations. **2014**, 91, 1315-1328 6
- 1693 A Modified Non-Monotone BFGS Method for Non-Convex Unconstrained Optimization. **2014**, 31, 1450033

- 1677 A modified Polak-Ribiere-Polyak descent method for unconstrained optimization. **2014**, 29, 177-188 3

1676	An Inexact PRP Conjugate Gradient Method for Symmetric Nonlinear Equations. 2014 , 35, 370-388	21
1675	MrDIRECT: a multilevel robust DIRECT algorithm for global optimization problems. 2014 , 62, 205	4
1674	Implementation of a block-decomposition algorithm for solving large-scale conic semidefinite programming problems. 2014 , 57, 45-69	12
1673	A variable fixing version of the two-block nonlinear constrained GaussSeidel algorithm for (ell_1)-regularized least-squares. 2014 , 59, 565-589	3
1672	A regularized Newton method without line search for unconstrained optimization. 2014 , 59, 321-351	11
1671	PAVER 2.0: an open source environment for automated performance analysis of benchmarking data. 2014 , 59, 259-275	13
1670	ANTIGONE: Algorithms for coNTinuous / Integer Global Optimization of Nonlinear Equations. 2014 , 59, 503-526	343
1669	Globally convergent DC trust-region methods. 2014 , 59, 209-225	3
1668	Linearization-based algorithms for mixed-integer nonlinear programs with convex continuous relaxation. 2014 , 59, 343-365	1
1667	Globally-biased Disimpl algorithm for expensive global optimization. 2014 , 59, 545-567	82
1666	Two modified nonlinear conjugate gradient methods with disturbance factors for unconstrained optimization. 2014 , 77, 387-397	6
1665	Efficient tridiagonal preconditioner for the matrix-free truncated Newton method. 2014 , 235, 394-407	3
1664	HSL_MI28. 2014 , 40, 1-19	17
1663	A dwindling filter algorithm with a modified subproblem for nonlinear inequality constrained optimization. 2014 , 35, 209-224	0
1662	Optimization of algorithms with OPAL. 2014 , 6, 233-254	15
1661	A New Efficient Approach to Search for All Multi-State Minimal Cuts. 2014 , 63, 154-166	33
1660	Large-Scale Global Optimization via Swarm Intelligence. 2014 , 241-253	2
1659	A modified PolakRibièrePolyak conjugate gradient algorithm for large-scale optimization problems. 2014 , 46, 397-413	21

1658	New three-term conjugate gradient method with guaranteed global convergence. 2014 , 91, 1744-1754	11
1657	Introduction to Nonsmooth Optimization. 2014 ,	91
1656	An inexact and nonmonotone proximal method for smooth unconstrained minimization. 2014 , 269, 86-100	8
1655	A new adaptive trust-region method for system of nonlinear equations. 2014 , 38, 3003-3015	18
1654	A hybrid of adjustable trust-region and nonmonotone algorithms for unconstrained optimization. 2014 , 38, 2601-2612	9
1653	Efficient Use of Semidefinite Programming for Selection of Rotamers in Protein Conformations. 2014 , 26, 748-766	3
1652	A dwindling filter trust region algorithm for nonlinear optimization. 2014 , 240, 72-81	4
1651	Unconstrained Gibbs Free Energy Minimization for Phase Equilibrium Calculations in Nonreactive Systems, Using an Improved Cuckoo Search Algorithm. 2014 , 53, 10826-10834	17
1650	Applying oracles of on-demand accuracy in two-stage stochastic programming [A computational study. 2014 , 239, 437-448	21
1649	Feasibility Pump-like heuristics for mixed integer problems. 2014 , 165, 152-167	11
1648	Relaxation approach for equilibrium problems with equilibrium constraints. 2014 , 41, 333-345	1
1647	Sobolev seminorm of quadratic functions with applications to derivative-free optimization. <i>Mathematical Programming</i> , 2014 , 146, 77-96	2.1 5
1646	PRECONDITIONING ISSUES IN THE NUMERICAL SOLUTION OF NONLINEAR EQUATIONS AND NONLINEAR LEAST SQUARES. 2014 , 34, 421-445	
1645	On MINLP Heuristics for Solving Shale-well Scheduling Problems. 2014 , 47, 2721-2726	2
1644	Valid Inequalities and Separation Algorithms for the Set Partitioning Problem. 2014 , 52, 185-196	2
1643	Preconditioning of Active-Set Newton Methods for PDE-constrained Optimal Control Problems. 2015 , 37, S472-S502	17
1642	Analysis of MILP Techniques for the Pooling Problem. 2015 , 63, 412-427	31
1641	Variants of an adaptive penalty scheme for steady-state genetic algorithms in engineering optimization. 2015 , 32, 2182-2215	8

1640	A QP-free algorithm of quasi-strongly sub-feasible directions for inequality constrained optimization. 2015 , 11, 307-328	1
1639	Global convergence analysis of a new nonlinear conjugate gradient coefficient with strong Wolfe line search. 2015 ,	
1638	A comparative study of three new conjugate gradient methods with exact line search. 2015 ,	
1637	Open-source benchmarking for learned reaching motion generation in robotics. 2015 , 6,	12
1636	Regras de prioridade eficientes que exploram características do Job Shop Flexível para a minimização do atraso total. 2015 , 25, 79-91	2
1635	MAKHA: A New Hybrid Swarm Intelligence Global Optimization Algorithm. 2015 , 8, 336-365	6
1634	A New Conjugate Gradient Algorithm with Sufficient Descent Property for Unconstrained Optimization. 2015 , 2015, 1-8	1
1633	A Limited-Memory BFGS Algorithm Based on a Trust-Region Quadratic Model for Large-Scale Nonlinear Equations. 2015 , 10, e0120993	9
1632	An Efficient Hybrid Conjugate Gradient Method with the Strong Wolfe-Powell Line Search. 2015 , 2015, 1-7	11
1631	A Spectral Dai-Yuan-Type Conjugate Gradient Method for Unconstrained Optimization. 2015 , 2015, 1-7	0
1630	A Nonmonotone Weighting Self-Adaptive Trust Region Algorithm for Unconstrained Nonconvex Optimization. 2015 , 2015, 1-8	
1629	A Derivative-Free Conjugate Gradient Method and Its Global Convergence for Solving Symmetric Nonlinear Equations. 2015 , 2015, 1-8	17
1628	Integration of AI and OR Techniques in Constraint Programming. 2015 ,	
1627	Benchmarking optimization solvers for structural topology optimization. 2015 , 52, 527-547	59
1626	Fix-and-relax approaches for controlled tabular adjustment. 2015 , 58, 41-52	10
1625	A new regularized limited memory BFGS-type method based on modified secant conditions for unconstrained optimization problems. 2015 , 63, 709-728	5
1624	An algorithm for quadratic ℓ_1 -regularized optimization with a flexible active-set strategy. 2015 , 30, 1213-1237	9
1623	Taxi and Ride Sharing: A Dynamic Dial-a-Ride Problem with Money as an Incentive. 2015 , 42, 6728-6737	101

1622	Scalable relational learning for large heterogeneous networks. 2015 ,	2
1621	A Branch-and-Estimate Heuristic Procedure for Solving Nonconvex Integer Optimization Problems. 2015 ,	
1620	A Criterion Space Search Algorithm for Biobjective Integer Programming: The Balanced Box Method. 2015 , 27, 735-754	48
1619	An efficient global optimization algorithm for mixed-integer nonlinear fractional programs with separable concave terms. 2015 ,	2
1618	A Flexible Iterative Solver for Nonconvex, Equality-Constrained Quadratic Subproblems. 2015 , 37, A1801-A1824	
1617	Towards proper assessment of QP algorithms for embedded model predictive control. 2015 ,	13
1616	Interiors of completely positive cones. 2015 , 63, 653-675	3
1615	An exact solution method for quadratic matching: The one-quadratic-term technique and generalisations. 2015 , 18, 193-216	3
1614	Influence of resampling on accuracy of imbalanced classification. 2015 ,	20
1613	Model selection for anomaly detection. 2015 ,	6
1612	WeiYaoLiu conjugate gradient projection algorithm for nonlinear monotone equations with convex constraints. 2015 , 92, 2261-2272	8
1611	Unequal individual genetic algorithm with intelligent diversification for the lot-scheduling problem in integrated mills using multiple-paper machines. 2015 , 59, 33-50	15
1610	A trust-region SQP method without a penalty or a filter for nonlinear programming. 2015 , 281, 107-119	8
1609	An efficient adaptive trust-region method for systems of nonlinear equations. 2015 , 92, 151-166	13
1608	A reliable affine relaxation method for global optimization. 2015 , 13, 247-277	19
1607	A primal-dual interior point method for large-scale free material optimization. 2015 , 61, 409-435	9
1606	An empirical evaluation of a walk-relax-round heuristic for mixed integer convex programs. 2015 , 60, 559-585	2
1605	Globally convergent evolution strategies. <i>Mathematical Programming</i> , 2015 , 152, 467-490	2.1 8

1604	A modified Hestenes-Broyden conjugate gradient method with sufficient descent condition and conjugacy condition. 2015 , 281, 239-249	21
1603	An Improved Self-Adaptive Constraint Sequencing approach for constrained optimization problems. 2015 , 253, 23-39	7
1602	Algorithms for the continuous nonlinear resource allocation problem: New implementations and numerical studies. 2015 , 243, 703-722	29
1601	A three-term conjugate gradient algorithm for large-scale unconstrained optimization problems. 2015 , 92, 70-81	23
1600	A column generation approach for evaluating delivery efficiencies of collimator technologies in IMRT treatment planning. 2015 , 60, 1989-2004	6
1599	An adaptive large neighbourhood search for the operational integrated production and distribution problem of perishable products. 2015 , 53, 6040-6058	61
1598	A box-constrained differentiable penalty method for nonlinear complementarity problems. 2015 , 62, 729-747	3
1597	A relaxed nonmonotone adaptive trust region method for solving unconstrained optimization problems. 2015 , 61, 321-341	11
1596	Dynamically generated cutting planes for mixed-integer quadratically constrained quadratic programs and their incorporation into GloMIQO 2. 2015 , 30, 215-249	32
1595	Benchmarking large-scale distributed convex quadratic programming algorithms. 2015 , 30, 191-214	19
1594	On affine-scaling inexact dogleg methods for bound-constrained nonlinear systems. 2015 , 30, 276-300	6
1593	Nonmonotone adaptive trust region method with line search based on new diagonal updating. 2015 , 91, 75-88	5
1592	Dynamic scaling on the limited memory BFGS method. 2015 , 243, 697-702	4
1591	A new class of efficient and globally convergent conjugate gradient methods in the Dai-Liao family. 2015 , 30, 843-863	7
1590	Risk-Averse Optimization in Two-Stage Stochastic Models: Computational Aspects and a Study. 2015 , 25, 28-52	13
1589	Assessing the reliability of general-purpose Inexact Restoration methods. 2015 , 282, 1-16	10
1588	Near Minimax Line Spectral Estimation. 2015 , 61, 499-512	84
1587	The Use of Supernodes in Factored Sparse Approximate Inverse Preconditioning. 2015 , 37, C72-C94	12

- 1586 An active-set projected trust region algorithm for box constrained optimization problems. **2015**, 28, 1128-1147
- 1585 A hybrid path-relinking method for solving two-stage stochastic integer problems. **2015**, 22, 113-127 3
- 1584 A nonmonotone line search method for noisy minimization. **2015**, 9, 1371-1391 6
- 1583 A quasi-Newton algorithm for nonconvex, nonsmooth optimization with global convergence guarantees. **2015**, 7, 399-428 36
- 1582 A Globally Convergent Trust-Region Method for Large-Scale Symmetric Nonlinear Systems. **2015**, 36, 830-855 10
- 1581 An efficient algorithm for the multi-state two separate minimal paths reliability problem with budget constraint. **2015**, 142, 472-481 12
- 1580 A New Nonmonotone Adaptive Retrospective Trust Region Method for Unconstrained Optimization Problems. **2015**, 167, 676-692 1
- 1579 A class of one parameter conjugate gradient methods. **2015**, 265, 708-722
- 1578 Line search SQP method with a flexible step acceptance procedure. **2015**, 92, 98-110 3
- 1577 Benchmarking Numerical Multiobjective Optimizers Revisited. **2015**, 21
- 1576 Automatic penalty continuation in structural topology optimization. **2015**, 52, 1205-1221 23
- 1575 A new class of nonlinear conjugate gradient coefficients with exact and inexact line searches. **2015**, 268, 1152-1163 18
- 1574 An exact algorithm for sparse matrix bipartitioning. **2015**, 85, 79-90 3
- 1573 A Direct Search Frame-Based Adaptive Barzilai-Borwein Method. **2015**, 33, 179-190
- 1572 New Algorithms for Computing the Matrix Sine and Cosine Separately or Simultaneously. **2015**, 37, A456-A487 24
- 1571 New Scaling-Squaring Taylor Algorithms for Computing the Matrix Exponential. **2015**, 37, A439-A455 15
- 1570 A Scaled Gradient Projection Method for Bayesian Learning in Dynamical Systems. **2015**, 37, A1297-A1318 11
- 1569 A new class of nonmonotone conjugate gradient training algorithms. **2015**, 266, 404-413 5

1568	Descent direction method with line search for unconstrained optimization in noisy environment. 2015 , 30, 1164-1184	8
1567	A Network Structural Approach to the Link Prediction Problem. 2015 , 27, 249-267	8
1566	A branch-price-and-cut algorithm for multi-mode resource leveling. 2015 , 245, 70-80	18
1565	The positive edge pricing rule for the dual simplex. 2015 , 61, 135-142	1
1564	Projection onto simplicial cones by Picard's method. 2015 , 480, 27-43	5
1563	A hybrid heuristic strategy for liquefied natural gas inventory routing. 2015 , 53, 151-171	18
1562	A three-terms Polak-Ribière-Polyak conjugate gradient algorithm for large-scale nonlinear equations. 2015 , 286, 186-195	77
1561	Sequence independent lifting for mixed knapsack problems with GUB constraints. <i>Mathematical Programming</i> , 2015 , 154, 55-80	2.1 2
1560	Combining stabilized SQP with the augmented Lagrangian algorithm. 2015 , 62, 405-429	14
1559	Globally convergent evolution strategies for constrained optimization. 2015 , 62, 323-346	13
1558	An Adaptive Trust Region Method Based on Simple Conic Models. 2015 , 14, 453-467	2
1557	On Optimality of the Parameters of Self-Scaling Memoryless Quasi-Newton Updating Formulae. 2015 , 167, 91-101	26
1556	A new line search strategy for finding separating hyperplane in projection-based methods. 2015 , 70, 559-570	2
1555	Solving network design problems via iterative aggregation. 2015 , 7, 189-217	6
1554	BioPreDyn-bench: a suite of benchmark problems for dynamic modelling in systems biology. 2015 , 9, 8	48
1553	An efficient implementation of a trust region method for box constrained optimization. 2015 , 48, 495-517	5
1552	Inexact Restoration method for nonlinear optimization without derivatives. 2015 , 290, 26-43	10
1551	Methods for solving the mean query execution time minimization problem. 2015 , 246, 582-596	3

1550 Derivative-Free Optimization for Population Dynamic Models. **2015**, 391-402

1549 Composite Convex Minimization Involving Self-concordant-Like Cost Functions. **2015**, 155-168 3

1548 A nonmonotone hybrid conjugate gradient method for unconstrained optimization. **2015**, 2015, 4

1547 Three modified Polak-Ribière-Polyak conjugate gradient methods with sufficient descent property. **2015**, 2015, 10

1546 Fast optimization algorithms for large-scale mixed-integer linear fractional programming problems. **2015**,

1545 A differential evolution algorithm with constraint sequencing: An efficient approach for problems with inequality constraints. **2015**, 36, 101-113 10

1544 An interior-point method for nonlinear optimization problems with locatable and separable nonsmoothness. **2015**, 3, 309-348 7

1543 A Nonmonotone Filter SQP Method: Local Convergence and Numerical Results. **2015**, 25, 1885-1911 10

1542 Synthesis of Cutting and Separating Planes in a Nonsmooth Optimization Method1. **2015**, 51, 619-631 5

1541 A trust-region derivative-free algorithm for constrained optimization. **2015**, 30, 1126-1145 16

1540 A modified three-term conjugate gradient method with sufficient descent property. **2015**, 30, 263-272 2

1539 A globally convergent algorithm for MPCC. **2015**, 3, 263-296 5

1538 New version of the three-term conjugate gradient method based on spectral scaling conjugacy condition that generates descent search direction. **2015**, 269, 606-617 12

1537 FR type methods for systems of large-scale nonlinear monotone equations. **2015**, 269, 816-823 13

1536 Robust Network Design with Uncertain Outsourcing Cost. **2015**, 27, 507-524 7

1535 Ellipsoidal Relaxations of the Stable Set Problem: Theory and Algorithms. **2015**, 25, 1944-1963 4

1534 Biased Random-Key Genetic Algorithms for the Winner Determination Problem in Combinatorial Auctions. **2015**, 23, 279-307 13

1533 Random derivative-free algorithm for solving unconstrained or bound constrained continuously differentiable non-linear problems. **2015**, 30, 911-933

1532	An improved three-term conjugate gradient algorithm for solving unconstrained optimization problems. 2015 , 64, 2679-2691	3
1531	Two optimal Dai-Liao conjugate gradient methods. 2015 , 64, 2277-2287	26
1530	Deterministic approaches for solving practical black-box global optimization problems. 2015 , 80, 58-66	46
1529	Some nonlinear conjugate gradient methods with sufficient descent condition and global convergence. 2015 , 9, 1421-1432	9
1528	HLRFBFGS optimization algorithm for structural reliability. 2015 , 39, 2025-2035	49
1527	Descent Property and Global Convergence of a New Search Direction Method for Unconstrained Optimization. 2015 , 36, 169-180	2
1526	A conjugate gradient method with sufficient descent property. 2015 , 70, 269-286	2
1525	A derivative-free trust-funnel method for equality-constrained nonlinear optimization. 2015 , 61, 25-49	16
1524	A nonlinearly preconditioned conjugate gradient algorithm for rank-R canonical tensor approximation. 2015 , 22, 410-432	14
1523	A hybridization of the Polak-Ribière-Polyak and Fletcher-Reeves conjugate gradient methods. 2015 , 68, 481-495	12
1522	A family of three-term conjugate gradient methods with sufficient descent property for unconstrained optimization. 2015 , 60, 89-110	27
1521	A new nonmonotone line search technique for unconstrained optimization. 2015 , 68, 671-689	18
1520	An adaptive sizing BFGS method for unconstrained optimization. 2015 , 52, 233-244	1
1519	A New Nonsmooth Trust Region Algorithm for Locally Lipschitz Unconstrained Optimization Problems. 2015 , 164, 733-754	10
1518	A new trust region method for solving least-square transformation of system of equalities and inequalities. 2015 , 9, 283-310	4
1517	Solving DC programs using the cutting angle method. 2015 , 61, 71-89	16
1516	Global Optimization of Protein-peptide Docking by a Filling Function Method. 2015 , 164, 1090-1108	3
1515	An infeasible QP-free method without a penalty function for nonlinear inequality constrained optimization. 2015 , 34, 141-158	3

1514	Tightening piecewise McCormick relaxations for bilinear problems. 2015 , 72, 300-311	87
1513	A line search SQP method without a penalty or a filter. 2015 , 34, 741-753	3
1512	A double-projection-based algorithm for large-scale nonlinear systems of monotone equations. 2015 , 68, 213-228	1
1511	A modified Perry conjugate gradient method and its global convergence. 2015 , 9, 999-1015	3
1510	A Self-Adjusting Conjugate Gradient Method with Sufficient Descent Condition and Conjugacy Condition. 2015 , 165, 225-241	22
1509	Limited-memory LDL ^T factorization of symmetric quasi-definite matrices with application to constrained optimization. 2015 , 70, 9-41	6
1508	A robust combined trust region line search exact penalty projected structured scheme for constrained nonlinear least squares. 2015 , 30, 162-190	5
1507	Limited memory BFGS method based on a high-order tensor model. 2015 , 60, 413-422	5
1506	A New Method for Solving Second-Order Cone Eigenvalue Complementarity Problems. 2015 , 165, 563-585	18
1505	A modified limited-memory BNS method for unconstrained minimization based on the conjugate directions idea. 2015 , 30, 616-633	4
1504	A sufficient descent Liu-Storey conjugate gradient method and its global convergence. 2015 , 64, 1919-1934	2
1503	An augmented Lagrangian trust region method for equality constrained optimization. 2015 , 30, 559-582	12
1502	On the use of iterative methods in cubic regularization for unconstrained optimization. 2015 , 60, 35-57	21
1501	A hybridization of the Hestenes-Broyden and Dai-Yuan conjugate gradient methods based on a least-squares approach. 2015 , 30, 673-681	13
1500	A hybrid conjugate gradient method with descent property for unconstrained optimization. 2015 , 39, 1281-1290	24
1499	Three derivative-free projection methods for nonlinear equations with convex constraints. 2015 , 47, 265-276	10
1498	Global optimization of nonconvex problems with multilinear intermediates. 2015 , 7, 1-37	29
1497	Fuzzy LR linear systems: quadratic and least squares models to characterize exact solutions and an algorithm to compute approximate solutions. 2015 , 19, 205-216	5

1496	Automatic Dantzig-Wolfe reformulation of mixed integer programs. <i>Mathematical Programming</i> , 2015 , 149, 391-424	2.1	24
1495	Primal convergence from dual subgradient methods for convex optimization. <i>Mathematical Programming</i> , 2015 , 150, 365-390	2.1	20
1494	A trust-region-based derivative free algorithm for mixed integer programming. 2015 , 60, 199-229		13
1493	Comparative study of RPSALG algorithm for convex semi-infinite programming. 2015 , 60, 59-87		8
1492	Scheduling with task replication on desktop grids: theoretical and experimental analysis. 2015 , 30, 520-544		
1491	Branching and bounding improvements for global optimization algorithms with Lipschitz continuity properties. 2015 , 61, 429-457		7
1490	A Modified Self-Scaling Memoryless Broyden-B Fletcher-Goldfarb-Shanno Method for Unconstrained Optimization. 2015 , 165, 209-224		27
1489	A new three-term conjugate gradient algorithm for unconstrained optimization. 2015 , 68, 305-321		13
1488	Nonmonotone line search methods with variable sample size. 2015 , 68, 711-739		18
1487	Global Convergence Analysis of a Nonlinear Conjugate Gradient Method for Unconstrained Optimization Problems. 2016 , 9,		2
1486	COMPARISON OF MIP MODELS FOR THE INTEGRATED LOT-SIZING AND ONE-DIMENSIONAL CUTTING STOCK PROBLEM. 2016 , 36, 167-196		4
1485	An Empirical Study of Cycle Toggling Based Laplacian Solvers. 2016 , 33-41		2
1484	USE OF CONTINUED ITERATION ON THE REDUCTION OF ITERATIONS OF THE INTERIOR POINT METHOD. 2016 , 36, 487-501		1
1483	The Modified HZ Conjugate Gradient Algorithm for Large-Scale Nonsmooth Optimization. 2016 , 11, e0164289	6	
1482	Spatial branch and bound algorithm for the global optimization of MIQCPs. 2016 , 523-528		2
1481	Using functional programming to recognize named structure in an optimization problem: Application to pooling. 2016 , 62, 3085-3095		9
1480	Multi-objective constrained black-box optimization using radial basis function surrogates. 2016 , 16, 140-155		22
1479	Benchmarking deterministic optimization algorithms using an outranking approach. 2016 , 31, 1149-1168		1

1478	Computationally efficient algorithm for Gaussian Process regression in case of structured samples. 2016 , 56, 499-513	14
1477	Diagonal quasi-Newton method via variational principle under generalized Frobenius norm. 2016 , 31, 1258-1271	5
1476	Statistical graph space analysis. 2016 , 60, 802-812	14
1475	Improved Quasi-Newton method via PSB update for solving systems of nonlinear equations. 2016 ,	1
1474	Perfiles de comportamiento numérico de los métodos de búsqueda immune network algorithm y bacterial foraging optimization algorithm en funciones benchmark. 2016 , 17, 479-490	1
1473	A new classical conjugate gradient coefficient with exact line search. 2016 ,	2
1472	A scaled three-term conjugate gradient method for unconstrained optimization. 2016 , 2016,	6
1471	Multi-Objective Optimization With Multiple Spatially Distributed Surrogates. 2016 , 138,	19
1470	Multiple surrogate assisted multiobjective optimization using improved pre-selection. 2016 ,	11
1469	A Derivative-Free Approach to Constrained Multiobjective Nonsmooth Optimization. 2016 , 26, 2744-2774	28
1468	A Note on Performance Profiles for Benchmarking Software. 2016 , 43, 1-5	41
1467	A new steepest descent method with global convergence properties. 2016 ,	3
1466	Solving a large scale nonlinear unconstrained optimization with exact line search direction by using new coefficient of conjugate gradient methods. 2016 ,	
1465	A modified conjugate gradient coefficient with inexact line search for unconstrained optimization. 2016 ,	3
1464	Inexact stabilized Benders decomposition approaches with application to chance-constrained problems with finite support. 2016 , 65, 637-669	35
1463	A NEW THREE-TERM CONJUGATE GRADIENT METHOD WITH DESCENT DIRECTION FOR UNCONSTRAINED OPTIMIZATION. 2016 , 21, 399-411	5
1462	A mixed-integer bilevel programming approach for a competitive prioritized set covering problem. 2016 , 20, 105-134	23
1461	Sequential equality-constrained optimization for nonlinear programming. 2016 , 65, 699-721	9

1460	Reducing latency cost in 2D sparse matrix partitioning models. 2016 , 57, 1-24	7
1459	An Empirical Comparison of Graph Laplacian Solvers. 2016 ,	1
1458	A Cycle-Based Formulation and Valid Inequalities for DC Power Transmission Problems with Switching. 2016 , 64, 922-938	23
1457	Stochastic derivative-free optimization using a trust region framework. 2016 , 64, 619-645	18
1456	Descent Symmetrization of the Dai-Liao Conjugate Gradient Method. 2016 , 33, 1650008	3
1455	A branch-and-bound algorithm for the maximum capture problem with random utilities. 2016 , 252, 204-212	11
1454	Some modified conjugate gradient methods for unconstrained optimization. 2016 , 305, 92-114	17
1453	Convergence of a Three-Dimensional Dwindling Filter Algorithm Without Feasibility Restoration Phase. 2016 , 37, 324-341	0
1452	A trust-region approach with novel filter adaptive radius for system of nonlinear equations. 2016 , 73, 999-1016	4
1451	Reformulation versus cutting-planes for robust optimization. 2016 , 13, 195-217	46
1450	Decomposition for adjustable robust linear optimization subject to uncertainty polytope. 2016 , 13, 219-239	23
1449	Convexity and optimization with copula structured probabilistic constraints. 2016 , 65, 1349-1376	13
1448	An inertia-free filter line-search algorithm for large-scale nonlinear programming. 2016 , 64, 327-354	12
1447	Scaling Damped Limited-Memory Updates for Unconstrained Optimization. 2016 , 170, 177-188	1
1446	An efficient modification of the Hestenes-Stiefel nonlinear conjugate gradient method with restart property. 2016 , 2016,	6
1445	Applying the Powell's Symmetrical Technique to Conjugate Gradient Methods with the Generalized Conjugacy Condition. 2016 , 37, 839-849	2
1444	Projection onto a Polyhedron that Exploits Sparsity. 2016 , 26, 1773-1798	4
1443	A Method for Constrained Multiobjective Optimization Based on SQP Techniques. 2016 , 26, 2091-2119	34

1442	A partitioned PSB method for partially separable unconstrained optimization problems. 2016 , 290, 164-177	
1441	Dimension Reduction in Dissimilarity Spaces for Time Series Classification. 2016 , 31-46	1
1440	Binary Steiner trees: Structural results and an exact solution approach. 2016 , 21, 85-117	4
1439	Growing Neural Gas as a Memory Mechanism of a Heuristic to Solve a Community Detection Problem in Networks. 2016 , 96, 485-494	3
1438	Trust-Region Methods Without Using Derivatives: Worst Case Complexity and the NonSmooth Case. 2016 , 26, 1987-2011	22
1437	A Globally Convergent LP-Newton Method. 2016 , 26, 2012-2033	16
1436	Reliable surrogate modeling of engineering data with more than two levels of fidelity. 2016 ,	2
1435	The inexact-Newton via GMRES subspace method without line search technique for solving symmetric nonlinear equations. 2016 , 110, 174-189	2
1434	Source-based discrete and continuous-time formulations for the crude oil pooling problem. 2016 , 93, 382-401	18
1433	A new Newton-like method for solving nonlinear equations. 2016 , 5, 1269	12
1432	A Feasible Active Set Method with Reoptimization for Convex Quadratic Mixed-Integer Programming. 2016 , 26, 1695-1714	14
1431	A new simple model trust-region method with generalized Barzilai-Borwein parameter for large-scale optimization. 2016 , 59, 2265-2280	4
1430	Regression on the basis of nonstationary Gaussian processes with Bayesian regularization. 2016 , 61, 661-671	19
1429	Heuristics for a hub location-routing problem. 2016 , 68, 54-90	21
1428	A trust region spectral method for large-scale systems of nonlinear equations. 2016 , 2016,	2
1427	Parallel collective factorization for modeling large heterogeneous networks. 2016 , 6, 1	3
1426	GLOBAL CONVERGENCE OF SMOOTHING AND SCALING PRP TYPE CONJUGATE GRADIENT METHOD FOR SYSTEM OF NONSMOOTH EQUATIONS. 2016 , 59, 160-183	
1425	A spectral KRMI conjugate gradient method under the strong-Wolfe line search. 2016 ,	2

1424	GENOPT 2016: Design of a generalization-based challenge in global optimization. 2016 ,	3
1423	A modification of classical conjugate gradient method using strong Wolfe line search. 2016 ,	2
1422	A new type of descent conjugate gradient method with exact line search. 2016 ,	4
1421	A modified form of conjugate gradient method for unconstrained optimization problems. 2016 ,	2
1420	Computational optimization of gas compressor stations: MINLP models versus continuous reformulations. 2016 , 83, 409-444	33
1419	New multi-commodity flow formulations for the pooling problem. 2016 , 66, 669-710	16
1418	A limited memory descent Perry conjugate gradient method. 2016 , 10, 1725-1742	2
1417	Regularized optimization methods for convex MINLP problems. 2016 , 24, 665-692	16
1416	On the global convergence of the inexact semi-smooth Newton method for absolute value equation. 2016 , 65, 93-108	27
1415	Transformation-Based Preprocessing for Mixed-Integer Quadratic Programs. 2016 , 168, 1039-1045	2
1414	Customizing the solution process of COIN-OR's linear solvers with Python. 2016 , 8, 377-391	1
1413	A branch-and-Benders-cut method for nonlinear power design in green wireless local area networks. 2016 , 255, 151-162	23
1412	Discrete-time mixed-integer programming models and solution methods for production scheduling in multistage facilities. 2016 , 94, 387-410	23
1411	A family of second-order methods for convex (ell ₁)-regularized optimization. <i>Mathematical Programming</i> , 2016 , 159, 435-467	2.1 20
1410	Hybrid constructive heuristics for the critical node problem. 2016 , 238, 637-649	22
1409	A sequential quadratic programming algorithm for equality-constrained optimization without derivatives. 2016 , 10, 383-399	11
1408	A sufficient descent three-term conjugate gradient method via symmetric rank-one update for large-scale optimization. 2016 , 65, 121-143	9
1407	An efficient adaptive scaling parameter for the spectral conjugate gradient method. 2016 , 10, 119-136	0

1406	A new nonmonotone filter BarzilaiBorwein method for solving unconstrained optimization problems. 2016 , 93, 596-608	2
1405	Some nonlinear conjugate gradient methods based on spectral scaling secant equations. 2016 , 35, 639-651	1
1404	Solving engineering models using hyperbolic matrix functions. 2016 , 40, 2837-2844	5
1403	An adaptive accelerated first-order method for convex optimization. 2016 , 64, 31-73	15
1402	Polyhedral approximation of ellipsoidal uncertainty sets via extended formulations: a computational case study. 2016 , 13, 151-193	3
1401	Simulation optimization: a review of algorithms and applications. 2016 , 240, 351-380	195
1400	A Branch-and-Price algorithm for stable workforce assignments with hierarchical skills. 2016 , 251, 676-685	11
1399	A cubic regularization algorithm for unconstrained optimization using line search and nonmonotone techniques. 2016 , 31, 1008-1035	8
1398	Conjugate gradient path method without line search technique for derivative-free unconstrained optimization. 2016 , 73, 957-983	2
1397	A Fast Active Set Block Coordinate Descent Algorithm for ℓ_1 -Regularized Least Squares. 2016 , 26, 781-809	13
1396	A New Algorithm for Generating All Minimal Vectors for the q SMPs Reliability Problem With Time and Budget Constraints. 2016 , 65, 828-842	9
1395	Lagrangian heuristics for the capacitated multi-plant lot sizing problem with multiple periods and items. 2016 , 71, 137-148	16
1394	Numerical experience with a derivative-free trust-funnel method for nonlinear optimization problems with general nonlinear constraints. 2016 , 31, 511-534	7
1393	Globalizing Stabilized Sequential Quadratic Programming Method by Smooth Primal-Dual Exact Penalty Function. 2016 , 169, 148-178	16
1392	Symmetry breaking in MILP formulations for Unit Commitment problems. 2016 , 85, 162-176	21
1391	Models and relaxations for the wastewater treatment design problem. 2016 , 106, 191-204	8
1390	Robust Critical Node Selection by Benders Decomposition. 2016 , 28, 162-174	10
1389	A limited memory BFGS algorithm for non-convex minimization with applications in matrix largest eigenvalue problem. 2016 , 83, 243-264	5

1388	A line search trust-region algorithm with nonmonotone adaptive radius for a system of nonlinear equations. 2016 , 14, 133-152	12
1387	Comments on a new class of nonlinear conjugate gradient coefficients with global convergence properties. 2016 , 276, 297-300	19
1386	An unconstrained differentiable penalty method for implicit complementarity problems. 2016 , 31, 775-790	1
1385	Backward Step Control for Global Newton-Type Methods. 2016 , 54, 361-387	9
1384	An efficient second-order SQP method for structural topology optimization. 2016 , 53, 1315-1333	19
1383	An SR1/BFGS SQP algorithm for nonconvex nonlinear programs with block-diagonal Hessian matrix. 2016 , 8, 435-459	10
1382	A limited memory quasi-Newton trust-region method for box constrained optimization. 2016 , 303, 105-118	7
1381	Robust mixed-integer linear programming models for the irregular strip packing problem. 2016 , 253, 570-583	36
1380	Heuristic approaches for the multiperiod location-transportation problem with reuse of vehicles in emergency logistics. 2016 , 69, 79-96	56
1379	A second-order globally convergent direct-search method and its worst-case complexity. 2016 , 65, 1105-1128	5
1378	A trust-region method with improved adaptive radius for systems of nonlinear equations. 2016 , 83, 109-125	7
1377	A stabilized filter SQP algorithm for nonlinear programming. 2016 , 65, 677-708	9
1376	A new efficient conjugate gradient method for unconstrained optimization. 2016 , 300, 207-216	28
1375	A sufficient descent conjugate gradient method and its global convergence. 2016 , 31, 577-590	3
1374	Primal and dual active-set methods for convex quadratic programming. <i>Mathematical Programming</i> , 2016 , 159, 469-508	2.1 14
1373	Optimizing damper connectors for adjacent buildings. 2016 , 17, 47-75	15
1372	Truss optimization with discrete design variables: a critical review. 2016 , 53, 349-374	87
1371	Towards an objective feasibility pump for convex MINLPs. 2016 , 63, 737-753	4

1370	An ODE-like nonmonotone method for nonsmooth convex optimization. 2016 , 52, 265-285	1
1369	Accelerated diagonal gradient-type method for large-scale unconstrained optimization. 2016 , 120, 24-30	
1368	Trust regions in Kriging-based optimization with expected improvement. 2016 , 48, 1037-1059	24
1367	Normalized multiparametric disaggregation: an efficient relaxation for mixed-integer bilinear problems. 2016 , 64, 765-784	25
1366	Stadium Norm and Douglas-Rachford Splitting: A New Approach to Road Design Optimization. 2016 , 64, 201-218	7
1365	On optimality of two adaptive choices for the parameter of Dai-Liao method. 2016 , 10, 1789-1797	5
1364	Barzilai and Borwein's method for multiobjective optimization problems. 2016 , 72, 539-604	6
1363	An improved algorithm for finding all upper boundary points in a stochastic-flow network. 2016 , 40, 3221-3229	19
1362	A modified scaling parameter for the memoryless BFGS updating formula. 2016 , 72, 425-433	12
1361	The L-shape search method for triobjective integer programming. 2016 , 8, 217-251	30
1360	A long-haul freight transportation problem: Synchronizing resources to deliver requests passing through multiple transshipment locations. 2016 , 248, 487-506	20
1359	Branch-and-cut-and-price algorithms for the Degree Constrained Minimum Spanning Tree Problem. 2016 , 63, 755-792	10
1358	A three-term derivative-free projection method for nonlinear monotone system of equations. 2016 , 53, 427-450	13
1357	A matrix-free augmented lagrangian algorithm with application to large-scale structural design optimization. 2016 , 17, 359-384	5
1356	Combination of steepest descent and BFGS methods for nonconvex nonsmooth optimization. 2016 , 72, 57-90	4
1355	MILP reformulations for the design of biotechnological multi-product batch plants using continuous equipment sizes and discrete host selection. 2016 , 84, 1-11	1
1354	Adaptive augmented Lagrangian methods: algorithms and practical numerical experience. 2016 , 31, 157-186	7
1353	On the steepest descent algorithm for quadratic functions. 2016 , 63, 523-542	21

1352	Gravitational Search, Monkey, and Krill Herd Swarm Algorithms for Phase Stability, Phase Equilibrium, and Chemical Equilibrium Problems. 2016 , 203, 389-406	4
1351	A new error in variables model for solving positive definite linear system using orthogonal matrix decompositions. 2016 , 72, 211-241	1
1350	Comment on A new three-term conjugate gradient method for unconstrained problem 2016 , 72, 173-179	1
1349	A novel class of approximate inverse preconditioners for large positive definite linear systems in optimization. 2016 , 65, 399-429	8
1348	An Optimal Parameter for Dai-Liao Family of Conjugate Gradient Methods. 2016 , 169, 587-605	20
1347	Multiple-path selection for new highway alignments using discrete algorithms. 2016 , 248, 415-427	29
1346	A branch-and-cut framework for the consistent traveling salesman problem. 2016 , 248, 384-395	21
1345	A Modified Hestenes and Stiefel Conjugate Gradient Algorithm for Large-Scale Nonsmooth Minimizations and Nonlinear Equations. 2016 , 168, 129-152	71
1344	Fast inexact decomposition algorithms for large-scale separable convex optimization. 2016 , 65, 325-356	8
1343	A self-adaptive three-term conjugate gradient method for monotone nonlinear equations with convex constraints. 2016 , 53, 133-145	27
1342	A doubly stabilized bundle method for nonsmooth convex optimization. <i>Mathematical Programming</i> , 2016 , 156, 125-159	2.1 23
1341	A Globally Convergent Penalty-Free Method for Optimization with Equality Constraints and Simple Bounds. 2016 , 142, 39-60	3
1340	On a globally convergent trust region algorithm with infeasibility control for equality constrained optimization. 2016 , 50, 275-298	0
1339	Two globally convergent nonmonotone trust-region methods for unconstrained optimization. 2016 , 50, 529-555	7
1338	An implementation of exact knapsack separation. 2016 , 66, 127-150	4
1337	On the multi-point Levenberg-Marquardt method for singular nonlinear equations. 2017 , 36, 203-223	3
1336	Supermemory gradient methods for monotone nonlinear equations with convex constraints. 2017 , 36, 259-279	2
1335	Multi-pattern generation framework for logical analysis of data. 2017 , 249, 329-349	6

1334	BFO: a hybrid bees algorithm for the multi-level capacitated lot-sizing problem. 2017 , 28, 929-944	11
1333	A new trust-region method for solving systems of equalities and inequalities. 2017 , 36, 769-790	1
1332	A globally and quadratically convergent primaldual augmented Lagrangian algorithm for equality constrained optimization. 2017 , 32, 1-21	18
1331	A secant-based Nesterov method for convex functions. 2017 , 11, 81-105	3
1330	An improved adaptive trust-region algorithm. 2017 , 11, 555-569	8
1329	Uncontrolled inexact information within bundle methods. 2017 , 5, 5-29	7
1328	A new method for optimizing a linear function over the efficient set of a multiobjective integer program. 2017 , 260, 904-919	25
1327	Polyhedral results for a class of cardinality constrained submodular minimization problems. 2017 , 24, 87-102	5
1326	An inexact restoration derivative-free filter method for nonlinear programming. 2017 , 36, 693-718	8
1325	A class of adaptive DaiLiao conjugate gradient methods based on the scaled memoryless BFGS update. 2017 , 15, 85-92	8
1324	On the solution of nonconvex cardinality Boolean quadratic programming problems: a computational study. 2017 , 66, 1-37	7

1145	A dynamic reformulation heuristic for Generalized Interdiction Problems. 2018 , 267, 40-51	17
1144	Global Convergence Property of Scaled Two-Step BFGS Method. 2018 , 15, 1	
1143	Two smooth support vector machines for (varepsilon)-insensitive regression. 2018 , 70, 171-199	7
1142	A multiple surrogate assisted evolutionary algorithm for optimization involving iterative solvers. 2018 , 50, 1625-1644	5
1141	A dual Newton strategy for scenario decomposition in robust multistage MPC. 2018 , 28, 2340-2355	4
1140	Design of a High-Performance GEMM-like Tensor-Tensor Multiplication. 2018 , 44, 1-29	27
1139	Efficient Storage of Pareto Points in Biobjective Mixed Integer Programming. 2018 , 30, 324-338	2
1138	Efficient solution of many instances of a simulation-based optimization problem utilizing a partition of the decision space. 2018 , 265, 93-118	5
1137	A Double-Parameter Scaling Broyden-Goldfarb-Shanno Method Based on Minimizing the Measure Function of Byrd and Nocedal for Unconstrained Optimization. 2018 , 178, 191-218	5

1136	Speeding up the convergence of the Polyak–Heavy Ball algorithm. 2018 , 172, 176-188	
1135	A Linear Hybridization of the Hestenes–Stiefel Method and the Memoryless BFGS Technique. 2018 , 15, 1	2
1134	An efficient strategy for the activation of MIP relaxations in a multicore global MINLP solver. 2018 , 70, 497-516	11
1133	Circumcentering the Douglas–Rachford method. 2018 , 78, 759-776	15
1132	trlib: a vector-free implementation of the GLTR method for iterative solution of the trust region problem. 2018 , 33, 420-449	6
1131	Approximation algorithms and heuristics for task scheduling in data-intensive distributed systems. 2018 , 25, 1417-1441	1
1130	A MEMORYLESS SYMMETRIC RANK-ONE METHOD WITH SUFFICIENT DESCENT PROPERTY FOR UNCONSTRAINED OPTIMIZATION. 2018 , 61, 53-70	3
1129	A Trajectory-Based Method for Constrained Nonlinear Optimization Problems. 2018 , 177, 479-497	
1128	A simplicial homology algorithm for Lipschitz optimisation. 2018 , 72, 181-217	25
1127	An effective adaptive trust region algorithm for nonsmooth minimization. 2018 , 71, 251-271	5
1126	Comparing Spatial and Scenario Decomposition for Stochastic Hydrothermal Unit Commitment Problems. 2018 , 9, 1307-1317	15
1125	\$\text{LDL}^T\$ Direction Interior Point Method for Semidefinite Programming. 2018 , 28, 693-734	
1124	Global optimization of nonconvex problems with convex-transformable intermediates. 2018 , 72, 255-276	3
1123	Optimal subgradient methods: computational properties for large-scale linear inverse problems. 2018 , 19, 815-844	4
1122	Multiprecision Algorithms for Computing the Matrix Logarithm. 2018 , 39, 472-491	10
1121	Some three-term conjugate gradient methods with the inexact line search condition. 2018 , 55, 1	12
1120	Satisfiability modulo theories for process systems engineering. 2018 , 113, 98-114	10
1119	A new derivative-free SCG-type projection method for nonlinear monotone equations with convex constraints. 2018 , 56, 195-216	15

1118	Numerical comparisons based on four smoothing functions for absolute value equation. 2018 , 56, 131-149	19
1117	An adaptive scaled BFGS method for unconstrained optimization. 2018 , 77, 413-432	19
1116	An arc-search ($\mathcal{O}(nL)$) infeasible-interior-point algorithm for linear programming. 2018 , 12, 781-798	10
1115	An approach based on dwindling filter method for positive definite generalized eigenvalue problem. 2018 , 37, 1197-1212	2
1114	Variable sample size method for equality constrained optimization problems. 2018 , 12, 485-497	1
1113	A Decomposition Algorithm for the Consistent Traveling Salesman Problem with Vehicle Idling. 2018 , 52, 386-401	11
1112	Fast and accurate algorithm for the generalized exponential integral $E_1(x)$ for positive real order. 2018 , 77, 603-630	3
1111	Exact algorithms for the chance-constrained vehicle routing problem. <i>Mathematical Programming</i> , 2018 , 172, 105-138	2.1 18
1110	Allocating products on shelves under merchandising rules: Multi-level product families with display directions. 2018 , 76, 47-62	17
1109	Symbolic elimination in dynamic optimization based on block-triangular ordering. 2018 , 33, 92-119	3
1108	Computation of $\{2,4\}$ and $\{2,3\}$ -inverses based on rank-one updates. 2018 , 66, 147-166	0
1107	A modified conjugate gradient algorithm with backtracking line search technique for large-scale nonlinear equations. 2018 , 95, 382-395	3
1106	A new accelerated algorithm for ill-conditioned ridge regression problems. 2018 , 37, 1941-1958	5
1105	Computational study of valid inequalities for the maximum k-cut problem. 2018 , 265, 5-27	6
1104	A Dai-Liao conjugate gradient algorithm with clustering of eigenvalues. 2018 , 77, 1273-1282	12
1103	Complex-step derivative approximation in noisy environment. 2018 , 327, 64-78	2
1102	A framework for solving mixed-integer semidefinite programs. 2018 , 33, 594-632	25
1101	Two Adaptive Dai-Liao Nonlinear Conjugate Gradient Methods. 2018 , 42, 1505-1509	1

1100	A modified nonmonotone trust region line search method. 2018 , 57, 421-436		3
1099	A new adaptive Barzilai and Borwein method for unconstrained optimization. 2018 , 12, 845-873		8
1098	A modified HestenseStiefel conjugate gradient method close to the memoryless BFGS quasi-Newton method. 2018 , 33, 336-353		7
1097	An affine scaling interior trust-region method combining with nonmonotone line search filter technique for linear inequality constrained minimization. 2018 , 95, 1494-1526		7
1096	Combining line search and trust-region methods for ℓ_1 -minimization. 2018 , 95, 1950-1972		2
1095	The global convergence of a modified BFGS method for nonconvex functions. 2018 , 327, 274-294		52
1094	An efficient gradient method with approximate optimal stepsize for large-scale unconstrained optimization. 2018 , 78, 21-39		13
1093	An active-set algorithm and a trust-region approach in constrained minimax problem. 2018 , 37, 2605-2631		3
1092	A modified quasi-Newton method for nonlinear equations. 2018 , 328, 44-58		18
1091	A Frank-Wolfe based branch-and-bound algorithm for mean-risk optimization. 2018 , 70, 625-644		2
1090	A double parameter scaled BFGS method for unconstrained optimization. 2018 , 332, 26-44		15
1089	An adaptive three-term conjugate gradient method based on self-scaling memoryless BFGS matrix. 2018 , 332, 72-85		17
1088	A new subspace minimization conjugate gradient method with nonmonotone line search for unconstrained optimization. 2018 , 79, 195-219		7
1087	An implicit filtering algorithm for derivative-free multiobjective optimization with box constraints. 2018 , 69, 267-296		12
1086	A new family of conjugate gradient methods for unconstrained optimization. 2018 , 58, 219-234		5
1085	A multi-objective DIRECT algorithm for ship hull optimization. 2018 , 71, 53-72		13
1084	Polyhedral approximation in mixed-integer convex optimization. <i>Mathematical Programming</i> , 2018 , 172, 139-168	2.1	21
1083	Multiple subgradient descent bundle method for convex nonsmooth multiobjective optimization. 2018 , 67, 139-158		12

1082	Improved quadratic cuts for convex mixed-integer nonlinear programs. 2018 , 109, 77-95	13
1081	Bidirectional labeling in column-generation algorithms for pickup-and-delivery problems. 2018 , 266, 521-530	20
1080	A family of three-term nonlinear conjugate gradient methods close to the memoryless BFGS method. 2018 , 12, 1911-1927	5
1079	An improved Perry conjugate gradient method with adaptive parameter choice. 2018 , 78, 1255-1269	3
1078	An extended nonmonotone line search technique for large-scale unconstrained optimization. 2018 , 330, 586-604	15
1077	Advances in surrogate based modeling, feasibility analysis, and optimization: A review. 2018 , 108, 250-267	247
1076	Two accelerated nonmonotone adaptive trust region line search methods. 2018 , 78, 911-928	3
1075	An accelerated nonmonotone trust region method with adaptive trust region for unconstrained optimization. 2018 , 69, 77-97	3
1074	Nondominated Nash points: application of biobjective mixed integer programming. 2018 , 16, 151-171	2
1073	Minimizing nonsmooth DC functions via successive DC piecewise-affine approximations. 2018 , 71, 37-55	34
1072	On the use of intersection cuts for bilevel optimization. <i>Mathematical Programming</i> , 2018 , 172, 77-103	2.1 23
1071	A nonmonotone scaled conjugate gradient algorithm for large-scale unconstrained optimization. 2018 , 95, 2212-2228	1
1070	A fast algorithm for nonsmooth penalized clustering. 2018 , 273, 583-592	2
1069	A nonmonotone trust-region method for generalized Nash equilibrium and related problems with strong convergence properties. 2018 , 69, 629-652	2
1068	A central path interior point method for nonlinear programming and its local convergence. 2018 , 95, 2471-2495	
1067	Filter-based DIRECT method for constrained global optimization. 2018 , 71, 517-536	9
1066	Jagged non-zero submatrix data structure. 2018 , 172, 7-14	0
1065	Adaptive Partition-Based Level Decomposition Methods for Solving Two-Stage Stochastic Programs with Fixed Recourse. 2018 , 30, 57-70	18

1064	A new efficient and accurate spline algorithm for the matrix exponential computation. 2018 , 337, 354-365	5
1063	FiberSCIP: Shared Memory Parallelization of SCIP. 2018 , 30, 11-30	12
1062	Finding the trade-off between emissions and disturbance in an urban context. 2018 , 30, 554-591	7
1061	An efficient gradient method with approximate optimal stepsize for the strictly convex quadratic minimization problem. 2018 , 67, 427-440	8
1060	Quasi-Newton methods for multiobjective optimization problems. 2018 , 16, 261-294	4
1059	How efficient is a global constraint in practice?. 2018 , 23, 87-122	2
1058	Augmented Lagrangian and exact penalty methods for quasi-variational inequalities. 2018 , 69, 801-824	9
1057	Optimal PID controller tuning using stochastic programming techniques. 2018 , 64, 2997-3010	5
1056	Exploiting integrality in the global optimization of mixed-integer nonlinear programming problems with BARON. 2018 , 33, 540-562	75
1055	Combination of optimal control approaches for aircraft conflict avoidance via velocity regulation. 2018 , 39, 181-203	4
1054	Nonmonotone Self-adaptive Levenberg-Marquardt Approach for Solving Systems of Nonlinear Equations. 2018 , 39, 47-66	6
1053	Always convergent methods for nonlinear equations of several variables. 2018 , 78, 625-641	2
1052	Several efficient gradient methods with approximate optimal stepsizes for large scale unconstrained optimization. 2018 , 328, 400-413	11
1051	Mixed-integer linear programming approach for global discrete sizing optimization of frame structures. 2018 , 57, 579-593	11
1050	Two modified spectral conjugate gradient methods and their global convergence for unconstrained optimization. 2018 , 95, 2082-2099	10
1049	Improved Dual Fast Gradient Method for Model Predictive Control. 2018 ,	
1048	A Derivative-Free Trust Region Algorithm with Nonmonotone Filter Technique for Bound Constrained Optimization. 2018 , 2018, 1-13	
1047	A New Modified Three-Term Hestenes-Stiefel Conjugate Gradient Method with Sufficient Descent Property and Its Global Convergence. 2018 , 2018, 1-13	4

1046	Dropout-Based Active Learning for Regression. 2018 , 247-258	10
1045	A diagonal quasi-Newton updating method based on minimizing the measure function of Byrd and Nocedal for unconstrained optimization. 2018 , 67, 1553-1568	4
1044	Sequential Global Linear Programming Algorithm for Continuous Piecewise Linear Programming*. 2018 ,	
1043	A modifications of conjugate gradient method for unconstrained optimization problems. 2018 , 7, 21	
1042	Solving a large scale nonlinear unconstrained optimization problems by using new coefficient of conjugate gradient method with exact line search direction. 2018 , 7, 92	
1041	A new filter QP-free method for the nonlinear inequality constrained optimization problem. 2018 , 2018, 278	0
1040	A tensor trust-region model for nonlinear system. 2018 , 2018, 343	1
1039	High-Performance Sparse Matrix-Matrix Products on Intel KNL and Multicore Architectures. 2018 ,	15
1038	A new class of nonlinear conjugate gradient with global convergence properties. 2018 , 5, 22029-22035	1
1037	Simplex Search-Based Brain Storm Optimization. 2018 , 6, 75997-76006	5
1036	A SemiSmooth Newton Method for Semidefinite Programs and its Applications in Electronic Structure Calculations. 2018 , 40, A4131-A4157	2
1035	A Novel Partitioning Method for Accelerating the Block Cimmino Algorithm. 2018 , 40, C827-C850	4
1034	A Two-Phase Gradient Method for Quadratic Programming Problems with a Single Linear Constraint and Bounds on the Variables. 2018 , 28, 2809-2838	11
1033	A new modification of conjugate gradient method with global convergence properties. 2018 ,	
1032	The Multi-plant Lot Sizing Problem with Multiple Periods and Items. 2018 , 1291-1306	
1031	Improving a primaldual simplex-type algorithm using interior point methods. 2018 , 67, 2259-2274	1
1030	Higher order curvature information and its application in a modified diagonal Secant method. 2018 , 67, 2229-2246	
1029	Variants for the logarithmic-quadratic proximal point scalarization method for multiobjective programming. 2018 , 11, 1850081	1

1028	Topology optimization in electromagnetism using SIMP method. 2018 , 37, 2138-2157	6
1027	A Modified Wei-Yao-Liu Conjugate Gradient Algorithm for Two Type Minimization Optimization Models. 2018 , 143-159	0
1026	An Auto-Adjustable Semi-Supervised Self-Training Algorithm. 2018 , 11, 139	9
1025	A scenario decomposition algorithm for strategic time window assignment vehicle routing problems. 2018 , 117, 296-317	16
1024	A derivative-free three-term projection algorithm involving spectral quotient for solving nonlinear monotone equations. 2018 , 67, 1631-1648	7
1023	A new class of root-finding methods in $(\mathbb{R})^n$: the inexact tensor-free Chebyshev-Halley class. 2018 , 37, 6654-6675	0
1022	An improved three-term derivative-free method for solving nonlinear equations. 2018 , 37, 6760-6773	29
1021	Data and performance profiles applying an adaptive truncation criterion, within line search-based truncated Newton methods, in large scale nonconvex optimization. 2018 , 17, 246-255	10
1020	An Accelerated Three-Term Conjugate Gradient Method with Sufficient Descent Condition and Conjugacy Condition. 2018 , 179, 944-961	11
1019	A structured diagonal Hessian approximation method with evaluation complexity analysis for nonlinear least squares. 2018 , 37, 6619-6653	7
1018	The Sufficient Descent Condition of Nonlinear Conjugate Gradient Method. 2018 , 7, 458	1
1017	New Hybrid Conjugate Gradient Method with Global Convergence Properties under Exact Line Search. 2018 , 7, 54	
1016	A new family of conjugate gradient coefficient with application. 2018 , 7, 36	
1015	Using a repair genetic algorithm for solving constrained nonlinear optimization problems. 2018 , 39, 1647-1663	3
1014	A hybrid LP/NLP paradigm for global optimization relaxations. 2018 , 10, 383-421	27
1013	A stochastic multiple gradient descent algorithm. 2018 , 271, 808-817	27
1012	A Max-Plus Approach to Incomplete Cholesky Factorization Preconditioners. 2018 , 40, A1987-A2004	3
1011	A new search direction of DFP-CG method for solving unconstrained optimization problems. 2018 ,	

1010 Hybrid BFGS-ZMRI methods with global convergence properties. **2018**,

1009 A Conjugate Gradient Algorithm under Yuan-Wei-Lu Line Search Technique for Large-Scale Minimization Optimization Models. **2018**, 2018, 1-11 7

1008 On Solving Contact Problems with Coulomb Friction: Formulations and Numerical Comparisons. **2018**, 375-457 6

1007 Methods to compare expensive stochastic optimization algorithms with random restarts. **2018**, 72, 781-801 3

1006 On Metaheuristics for Solving the Parameter Estimation Problem in Dynamic Systems: A Comparative Study. **2018**, 2018, 1-21 2

1005 On the Global Convergence of a Projective Trust Region Algorithm for Nonlinear Equality Constrained Optimization. **2018**, 34, 1804-1828 1

1004 An integer linear programming formulation for removing nodes in a network to minimize the spread of influenza virus infections. **2018**, 30, 144-167 5

1003 A New Descent Algorithm Using the Three-Step Discretization Method for Solving Unconstrained Optimization Problems. **2018**, 6, 63 8

1002 A Line-Search Algorithm Inspired by the Adaptive Cubic Regularization Framework and Complexity Analysis. **2018**, 178, 885-913 8

1001 A kernel search to the multi-plant capacitated lot sizing problem with setup carry-over. **2018**, 100, 43-53 5

1000 Solutions with performance guarantees on tactical decisions for industrial gas network problems. **2018**, 50, 654-667 2

999 A Preconditioned Conjugate Gradient Method with Active Set Strategy for (ℓ_1) -Regularized Least Squares. **2018**, 6, 571-585 2

998 Exact solution approaches for the Multi-period Degree Constrained Minimum Spanning Tree Problem. **2018**, 271, 57-71 1

997 Globally convergent three-term conjugate gradient projection methods for solving nonlinear monotone equations. **2018**, 7, 289-301 9

996 A class of derivative-free trust-region methods with interior backtracking technique for nonlinear optimization problems subject to linear inequality constraints. **2018**, 2018, 108 1

995 A conjugate gradient algorithm for large-scale unconstrained optimization problems and nonlinear equations. **2018**, 2018, 113 13

994 The Fast and the Robust: Trade-Offs Between Optimization Robustness and Cost in the Calibration of Environmental Models. **2018**, 54, 9432-9455 7

993 Multi-criteria Graph Partitioning with Scotch. **2018**, 66-75 1

992	A Three-Term Conjugate Gradient Algorithm with Quadratic Convergence for Unconstrained Optimization Problems. 2018 , 2018, 1-15	3
991	MILP Formulations for Generator Maintenance Scheduling in Hydropower Systems. 2018 , 33, 6171-6180	16
990	A Competitive Error in Variables Approach and Algorithms for Finding Positive Definite Solutions of Linear Systems of Matrix Equations. 2018 , 45-66	
989	Discovery of new complementarity functions for NCP and SOCCP. 2018 , 37, 5727-5749	2
988	New Hybrid Conjugate Gradient and Broyden-B Fletcher-Goldfarb-Shanno Conjugate Gradient Methods. 2018 , 178, 860-884	5
987	Solving Minimax Problems: Local Smoothing Versus Global Smoothing. 2018 , 23-43	3
986	A Truncated Taylor Series Algorithm for Computing the Action of Trigonometric and Hyperbolic Matrix Functions. 2018 , 40, A1696-A1713	6
985	Solving a large multi-product production-routing problem with delivery time windows. 2019 , 86, 154-172	37
984	String-averaging incremental stochastic subgradient algorithms. 2019 , 34, 665-692	1
983	A hybrid scaling parameter for the scaled memoryless BFGS method based on the ℓ_1 matrix norm. 2019 , 96, 1595-1602	4
982	The modified quasi-Newton methods for solving unconstrained optimization problems. 2019 , 32, e2459	2
981	The Hager-Zhang conjugate gradient algorithm for large-scale nonlinear equations. 2019 , 96, 1533-1547	7
980	Spectral projected gradient method for stochastic optimization. 2019 , 73, 59-81	2
979	An improved differential evolution algorithm for optimization including linear equality constraints. 2019 , 11, 317-329	6
978	Differential evolution with the adaptive penalty method for structural multi-objective optimization. 2019 , 20, 65-88	10
977	A diagonal quasi-Newton updating method for unconstrained optimization. 2019 , 81, 575-590	10
976	On global minimizers of quadratic functions with cubic regularization. 2019 , 13, 1269-1283	3
975	A Branch-and-Bound Algorithm for a Class of Mixed Integer Linear Maximum Multiplicative Programs: A Bi-objective Optimization Approach. 2019 , 101, 263-274	16

974	The cyclic DouglasBachford algorithm with r-sets-DouglasBachford operators. 2019 , 34, 875-889	6
973	Benchmarking optimization methods for parameter estimation in large kinetic models. 2019 , 35, 830-838	51
972	Spatiotemporal Graph and Hypergraph Partitioning Models for Sparse Matrix-Vector Multiplication on Many-Core Architectures. 2019 , 30, 445-458	4
971	Extension of Zoutendijk method for solving constrained multiobjective optimization problems. 2019 , 273, 44-57	5
970	A pattern search and implicit filtering algorithm for solving linearly constrained minimization problems with noisy objective functions. 2019 , 34, 827-852	4
969	Generalized self-concordant functions: a recipe for Newton-type methods. <i>Mathematical Programming</i> , 2019 , 178, 145-213	2.1 6
968	An inexact regularized Newton framework with a worst-case iteration complexity of $\mathcal{O}(\epsilon^{-3/2})$ for nonconvex optimization. 2019 , 39, 1296-1327	6
967	A descent Dai-Liao conjugate gradient method for nonlinear equations. 2019 , 81, 197-210	38
966	A fast algorithm to solve systems of nonlinear equations. 2019 , 354, 242-258	14
965	An active set algorithm for robust combinatorial optimization based on separation oracles. 2019 , 11, 755-789	2
964	An inexact conjugate gradient method for symmetric nonlinear equations. 2019 , 1, e1065	5
963	Accelerated multiple step-size methods for solving unconstrained optimization problems. 2019 , 1-32	2
962	Learning to steer nonlinear interior-point methods. 2019 , 7, 381-419	
961	New scaling on the gradient method. 2019 , 1168, 052002	
960	An Efficient Conjugate Gradient Method for Convex Constrained Monotone Nonlinear Equations with Applications. 2019 , 7, 767	15
959	Action Graphs for Performing Goal Recognition Design on Human-Inhabited Environments. 2019 , 19,	0
958	Hierarchy Strengthened Grey Wolf Optimizer for Numerical Optimization and Feature Selection. 2019 , 7, 78012-78028	29
957	Multiplier Stabilization Applied to Two-Stage Stochastic Programs. 2019 , 183, 158-178	1

956	Spectral modified PolakRibièreBolyak projection conjugate gradient method for solving monotone systems of nonlinear equations. 2019 , 362, 124514	5
955	Nonmonotone line searches for unconstrained multiobjective optimization problems. 2019 , 75, 63-90	6
954	Exact algorithms based on Benders decomposition for multicommodity uncapacitated fixed-charge network design. 2019 , 111, 311-324	7
953	An MP-based approximation algorithm on reliability evaluation of multistate flow networks. 2019 , 191, 106566	19
952	Multilevel Algorithms for Acyclic Partitioning of Directed Acyclic Graphs. 2019 , 41, A2117-A2145	4
951	A dense initialization for limited-memory quasi-Newton methods. 2019 , 74, 121-142	7
950	Differential evolution based spatial filter optimization for brain-computer interface. 2019 ,	2
949	Implementation of interior-point methods for LP based on Krylov subspace iterative solvers with inner-iteration preconditioning. 2019 , 74, 143-176	3
948	qpSWIFT: A Real-Time Sparse Quadratic Program Solver for Robotic Applications. 2019 , 4, 3355-3362	15
947	Nonmonotone conic trust region method with line search technique for bound constrained optimization. 2019 , 53, 787-805	
946	Performance optimization, modeling and analysis of sparse matrix-matrix products on multi-core and many-core processors. 2019 , 90, 102545	10
945	Gradient Method for Optimization on Riemannian Manifolds with Lower Bounded Curvature. 2019 , 29, 2517-2541	11
944	An efficient optimization approach for best subset selection in linear regression, with application to model selection and fitting in autoregressive time-series. 2019 , 74, 919-948	7
943	A Modified FletcherReeves Conjugate Gradient Method for Monotone Nonlinear Equations with Some Applications. 2019 , 7, 745	21
942	A conjugate gradient algorithm and its application in large-scale optimization problems and image restoration. 2019 , 2019,	8
941	A new hybrid conjugate gradient method for large-scale unconstrained optimization problem with non-convex objective function. 2019 , 38, 1	4
940	The global proof of the PolakRibièrePolak algorithm under the YWL inexact line search technique. 2019 , 2019,	
939	Reliability analysis of corroded pipelines: Novel adaptive conjugate first order reliability method. 2019 , 62, 103986	27

938	Non-linear Least-Squares Optimization of Rational Filters for the Solution of Interior Hermitian Eigenvalue Problems. 2019 , 5,	3
937	Network Flow-Based Refinement for Multilevel Hypergraph Partitioning. 2019 , 24, 1-36	4
936	An adaptive nonmonotone trust region method based on a modified scalar approximation of the Hessian in the successive quadratic subproblems. 2019 , 53, 829-839	1
935	Weight-Constrained Neural Networks in Forecasting Tourist Volumes: A Case Study. 2019 , 8, 1005	7
934	Derivative-Free Feasible Backtracking Search Methods for Nonlinear Multiobjective Optimization with Simple Boundary Constraint. 2019 , 36, 1950012	1
933	Noisy Euclidean distance matrix completion with a single missing node. 2019 , 75, 973-1002	2
932	Lvy Flight Shuffle Frog Leaping Algorithm Based on Differential Perturbation and Quasi-Newton Search. 2019 , 7, 116078-116093	4
931	Parallelizable Algorithms for Optimization Problems with Orthogonality Constraints. 2019 , 41, A1949-A1983	8
930	Investigating the use of sequencing and infeasibility driven strategies for constrained optimization. 2019 ,	3
929	Clustering and Ranking Based Methods for Selecting Tuned Search Heuristic Parameters. 2019 ,	0
928	Improving the Flexibility and Robustness of Model-based Derivative-free Optimization Solvers. 2019 , 45, 1-41	33
927	Multi-mode Resource Constrained Project Scheduling with Alternative Prerequisites: New Models and Computational Studies. 2019 , 58, 18253-18266	2
926	Large Scale Optimization in Supply Chains and Smart Manufacturing. 2019 ,	5
925	Large-scale quasi-Newton trust-region methods with low-dimensional linear equality constraints. 2019 , 74, 669-701	2
924	Branch-and-Bound for Bi-objective Integer Programming. 2019 , 31, 805-822	8
923	An iterative re-optimization framework for the dynamic vehicle routing problem with roaming delivery locations. 2019 , 128, 207-235	17
922	A Newton-Type Method for Quadratic Programming Problem and Variational Equilibrium Problem. 2019 , 150, 636-645	1
921	A Simulated Annealing-Based BarzilaiBorwein Gradient Method for Unconstrained Optimization Problems. 2019 , 36, 1950017	2

920	A scaled three-term conjugate gradient method for large-scale unconstrained optimization problem. 2019 , 56, 1	1
919	Relaxation schemes for mathematical programmes with switching constraints. 2019 , 1-36	8
918	A Scalable Clustering-Based Task Scheduler for Homogeneous Processors Using DAG Partitioning. 2019 ,	6
917	An Arbitrary Precision Scaling and Squaring Algorithm for the Matrix Exponential. 2019 , 40, 1233-1256	4
916	Modeling and solving the angular constrained minimum spanning tree problem. 2019 , 112, 104775	2
915	Nested branch-and-price-and-cut for vehicle routing problems with multiple resource interdependencies. 2019 , 276, 549-565	3
914	A subspace minimization conjugate gradient method based on conic model for unconstrained optimization. 2019 , 38, 1	5
913	Impulse noise removal by an adaptive trust-region method. 2019 , 23, 11901-11923	1
912	A new nonmonotone line-search trust-region approach for nonlinear systems. 2019 , 27, 199-232	4
911	A block version of left-looking AINV preconditioner with one by one or two by two block pivots. 2019 , 350, 366-385	2
910	An Efficient Gradient Method with Approximately Optimal Stepsize Based on Tensor Model for Unconstrained Optimization. 2019 , 181, 608-633	2
909	Enhancing the normalized multiparametric disaggregation technique for mixed-integer quadratic programming. 2019 , 73, 701-722	7
908	Improving the Classification Efficiency of an ANN Utilizing a New Training Methodology. 2019 , 6, 1	30
907	Complementarity-based nonlinear programming techniques for optimal mixing in gas networks. 2019 , 7, 299-323	8
906	A family of HagerZhang conjugate gradient methods for system of monotone nonlinear equations. 2019 , 361, 645-660	16
905	Preconditioning Nonlinear Conjugate Gradient with Diagonalized Quasi-Newton. 2019 ,	2
904	A dual ascent heuristic for obtaining a lower bound of the generalized set partitioning problem with convexity constraints. 2019 , 33, 146-168	2
903	Accelerating Limited-Memory Quasi-Newton Convergence for Large-Scale Optimization. 2019 , 495-507	4

902	Nested evolutionary algorithms for computationally expensive bilevel optimization problems: Variants and their systematic analysis. 2019 , 48, 329-344	9
901	An efficient nonmonotone adaptive cubic regularization method with line search for unconstrained optimization problem. 2019 , 98, 74-80	1
900	Some Experiments with Submodular Function Maximization via Integer Programming. 2019 , 488-501	
899	Improving the linear relaxation of maximum k-cut with semidefinite-based constraints. 2019 , 7, 123-151	4
898	An adaptive nonmonotone active set ℓ_1 -weight constrained ℓ_1 -neural network training algorithm. 2019 , 360, 294-303	7
897	A multiple surrogate assisted multi/many-objective multi-fidelity evolutionary algorithm. 2019 , 502, 537-557	9
896	Local convergence of the Levenberg-Marquardt method under Hölder metric subregularity. 2019 , 45, 2771-2806	10
895	A new infeasible proximal bundle algorithm for nonsmooth nonconvex constrained optimization. 2019 , 74, 443-480	6
894	An efficient modified PRP-FR hybrid conjugate gradient method for solving unconstrained optimization problems. 2019 , 145, 111-120	12
893	Employing Constrained Neural Networks for Forecasting New Product's Sales Increase. 2019 , 161-172	1
892	A New Diagonal Quasi-Newton Updating Method With Scaled Forward Finite Differences Directional Derivative for Unconstrained Optimization. 2019 , 40, 1467-1488	6
891	A family of spectral gradient methods for optimization. 2019 , 74, 43-65	20
890	Exact and Practical Modulo Scheduling for High-Level Synthesis. 2019 , 12, 1-26	5
889	An adaptive family of projection methods for constrained monotone nonlinear equations with applications. 2019 , 359, 1-16	13
888	Adaptive, Limited-Memory BFGS Algorithms for Unconstrained Optimization. 2019 , 29, 1282-1299	5
887	Forecasting Economy-Related Data Utilizing Weight-Constrained Recurrent Neural Networks. 2019 , 12, 85	10
886	A modified descent Polak-Ribière-Polyak conjugate gradient method with global convergence property for nonconvex functions. 2019 , 56, 1	13
885	A modified conjugate gradient method for monotone nonlinear equations with convex constraints. 2019 , 145, 507-520	22

884	MATRIX ANALYSES ON THE DAI-QU CONJUGATE GRADIENT METHOD. 2019 , 61, 195-203	0
883	Solving linear programs with complementarity constraints using branch-and-cut. 2019 , 11, 267-310	6
882	Quasi-Newton approaches to interior point methods for quadratic problems. 2019 , 74, 93-120	3
881	A Note on Using Performance and Data Profiles for Training Algorithms. 2019 , 45, 1-10	2
880	Global optimization of multilevel electricity market models including network design and graph partitioning. 2019 , 33, 43-69	19
879	Stabilized branch-price-and-cut for the commodity-constrained split delivery vehicle routing problem. 2019 , 278, 91-104	11
878	Max-Balanced Hungarian Scalings. 2019 , 40, 320-346	2
877	New Hybrid Conjugate Gradient Method As A Convex Combination of Ls and Fr Methods. 2019 , 39, 214-228	10
876	Solving Quadratic Programming by Cutting Planes. 2019 , 29, 1076-1105	9
875	On two new formulations for the fixed charge network design problem with shortest path constraints. 2019 , 108, 226-237	1
874	Nonsmooth and Nonconvex Optimization via Approximate Difference-of-Convex Decompositions. 2019 , 182, 49-80	11
873	Passenger- and operator-oriented scheduling of large railway projects. 2019 , 102, 136-152	2
872	A Newton-like method with mixed factorizations and cubic regularization for unconstrained minimization. 2019 , 73, 707-753	8
871	A new conjugate gradient method with an efficient memory structure. 2019 , 38, 1	1
870	Using a new regularized factorization method for unconstrained optimization problems. 2019 , 32, e2580	2
869	A New Preconditioner that Exploits Low-Rank Approximations to Factorization Error. 2019 , 41, A59-A82	9
868	A new modified BFGS method for solving systems of nonlinear equations. 2019 , 22, 75-89	2
867	Nonsmooth Optimization and Its Applications. 2019 ,	5

866	An efficient conjugate gradient trust-region approach for systems of nonlinear equation. 2019 , 30, 597-609	1
865	Two-phase quasi-Newton method for unconstrained optimization problem. 2019 , 30, 737-746	1
864	A dual Newton strategy for tree-sparse quadratic programs and its implementation in the open-source software treeQP. 2019 , 29, 2438-2457	
863	Derivative-Free Optimization of Noisy Functions via Quasi-Newton Methods. 2019 , 29, 965-993	19
862	A Structured Quasi-Newton Algorithm for Optimizing with Incomplete Hessian Information. 2019 , 29, 1048-1075	4
861	Doubly Nonnegative and Semidefinite Relaxations for the Densest -Subgraph Problem. 2019 , 21,	
860	Assessing Reliability of Multistate Flow Networks Under Cost Constraint in Terms of Minimal Cuts. 2019 , 26, 1950025	10
859	Reduced Degrees of Freedom Gaussian Mixture Model Fitting for Large Scale History Matching Problems. 2019 ,	1
858	Dynamic Non-diagonal Regularization in Interior Point Methods for Linear and Convex Quadratic Programming. 2019 , 181, 905-945	7
857	Convergence analysis of Anderson-type acceleration of Richardson's iteration. 2019 , 26, e2241	2
856	A New Hybrid Algorithm for Convex Nonlinear Unconstrained Optimization. 2019 , 2019, 1-6	4
855	Implementation of a maximum clique search procedure on CUDA. 2019 , 25, 247-271	1
854	A Modified Spectral Conjugate Gradient Method with Global Convergence. 2019 , 182, 667-690	11
853	An Approximate ADMM for Solving Linearly Constrained Nonsmooth Optimization Problems with Two Blocks of Variables. 2019 , 17-44	1
852	Steplength selection in gradient projection methods for box-constrained quadratic programs. 2019 , 356, 312-327	10
851	A Hypergraph Partitioning Model for Profile Minimization. 2019 , 41, A83-A108	1
850	Building energy optimization: An extensive benchmark of global search algorithms. 2019 , 187, 218-240	38
849	An Asynchronous Bundle-Trust-Region Method for Dual Decomposition of Stochastic Mixed-Integer Programming. 2019 , 29, 318-342	11

848	An algorithm inspired by bee colonies coupled to an adaptive penalty method for truss structural optimization problems. 2019 , 41, 1	1
847	Heuristic optimization of electrical energy systems: Refined metrics to compare the solutions. 2019 , 17, 100197	7
846	Direct search based on probabilistic feasible descent for bound and linearly constrained problems. 2019 , 72, 525-559	6
845	Second-Order Cone Optimization Formulations for Service System Design Problems with Congestion. 2019 , 97-120	
844	Proximal bundle methods for nonsmooth DC programming. 2019 , 75, 523-563	20
843	Penalty functions and two-step selection procedure based DIRECT-type algorithm for constrained global optimization. 2019 , 59, 2155-2175	7
842	. 2019 , 23, 1000-1014	45
841	Improving Optimization Bounds Using Machine Learning: Decision Diagrams Meet Deep Reinforcement Learning. 2019 , 33, 1443-1451	12
840	A randomized nonmonotone adaptive trust region method based on the simulated annealing strategy for unconstrained optimization. 2019 , 12, 389-399	1
839	New coefficient of three-term conjugate gradient method for solving unconstrained optimization problems. 2019 ,	
838	Minimax Lower Bounds for HENorm Estimation. 2019 ,	0
837	Convergence of a two-parameter family of conjugate gradient methods with a fixed formula of stepsize. 2019 , 38, 127-140	
836	SuperSCS: fast and accurate large-scale conic optimization. 2019 ,	3
835	Pareto Meets Huber: Efficiently Avoiding Poor Minima in Robust Estimation. 2019 ,	0
834	Derivative Free Conjugate Gradient Method via Broyden's Update for solving symmetric systems of nonlinear equations. 2019 , 1366, 012099	3
833	An Efficient Branch-and-Cut Algorithm for Approximately Submodular Function Maximization. 2019 , ,	0
832	A Hybrid of Quasi-Newton Method with CG Method for Unconstrained Optimization. 2019 , 1366, 012079	
831	The convergence properties of new hybrid conjugate gradient method. 2019 , 567, 012031	

830	A new sufficient descent conjugate gradient method with exact line search. 2019 ,	
829	A new modified RMIL CG method with global convergence properties. 2019 ,	
828	An efficient hybrid conjugate gradient-based projection method for convex constrained nonlinear monotone equations. 2019 , 22, 1031-1050	2
827	A new accelerated conjugate gradient method for large-scale unconstrained optimization. 2019 , 2019,	1
826	Minimum Graph Partition with Basis. 2019 ,	
825	Spectral Three-Term Constrained Conjugate Gradient Algorithm for Function Minimizations. 2019 , 2019, 1-6	4
824	Adaptive trust-region algorithms for unconstrained optimization. 2019 , 1-23	1
823	Boosting the computation of the matrix exponential. 2019 , 340, 206-220	10
822	Performance Assessment of Metaheuristic Algorithms for Structural Optimization Taking into Account the Influence of Control Parameters. 2019 , 93-101	1
821	Unified smoothing functions for absolute value equation associated with second-order cone. 2019 , 135, 206-227	18
820	A Scaled Derivative-Free Projection Method for Solving Nonlinear Monotone Equations. 2019 , 45, 755-770	10
819	A fast conjugate gradient algorithm with active set prediction for ℓ_1 optimization. 2019 , 34, 1277-1305	2
818	Differential mutation and novel social learning particle swarm optimization algorithm. 2019 , 480, 109-129	45
817	A review and comparison of solvers for convex MINLP. 2019 , 20, 397-455	94
816	Computing feasible points for binary MINLPs with MPECs. 2019 , 11, 95-118	7
815	Multi-strategy ensemble grey wolf optimizer and its application to feature selection. 2019 , 76, 16-30	96
814	A branch-and-Benders-cut algorithm for the Crew Scheduling and Routing Problem in road restoration. 2019 , 275, 16-34	21
813	The global convergence of the Polak-Ribière-Polyak conjugate gradient algorithm under inexact line search for nonconvex functions. 2019 , 362, 262-275	42

812	Structured Two-Point Stepsize Gradient Methods for Nonlinear Least Squares. 2019 , 181, 298-317	7
811	A limited-memory optimization method using the infinitely many times repeated BNS update and conjugate directions. 2019 , 351, 14-28	2
810	A New Dai-Liao Conjugate Gradient Method with Optimal Parameter Choice. 2019 , 40, 194-215	3
809	Accelerating block coordinate descent methods with identification strategies. 2019 , 72, 609-640	2
808	Enhancing interval constraint propagation by identifying and filtering n-ary subsystems. 2019 , 74, 1-20	
807	Two-parameter scaled memoryless BFGS methods with a nonmonotone choice for the initial step length. 2019 , 82, 1345-1357	4
806	An Inertial Algorithm for DC Programming. 2019 , 27, 895-919	17
805	A convergent modified HS-DY hybrid conjugate gradient method for unconstrained optimization problems. 2019 , 40, 97-113	7
804	A splitting algorithm for simulation-based optimization problems with categorical variables. 2019 , 51, 815-831	1
803	A Shamanskii-like self-adaptive Levenberg-Marquardt method for nonlinear equations. 2019 , 77, 357-373	8
802	A spectral conjugate gradient method for solving large-scale unconstrained optimization. 2019 , 77, 731-739	12
801	A new subspace minimization conjugate gradient method based on tensor model for unconstrained optimization. 2019 , 96, 1924-1942	5
800	A long-step feasible predictor-corrector interior-point algorithm for symmetric cone optimization. 2019 , 34, 336-362	
799	An efficient adaptive three-term extension of the Hestenes-Stiefel conjugate gradient method. 2019 , 34, 546-559	1
798	Heuristics for the Constrained Incremental Graph Drawing Problem. 2019 , 274, 710-729	4
797	A numerical study of applying spectral-step subgradient method for solving nonsmooth unconstrained optimization problems. 2019 , 104, 90-97	0
796	A novel hybrid trust region algorithm based on nonmonotone and LOOCV techniques. 2019 , 72, 499-524	2
795	Exact mean computation in dynamic time warping spaces. 2019 , 33, 252-291	9

794	A new generalized shrinkage conjugate gradient method for sparse recovery. 2019 , 56, 1	12
793	NEW ADAPTIVE BARZILAI-BORWEIN STEP SIZE AND ITS APPLICATION IN SOLVING LARGE-SCALE OPTIMIZATION PROBLEMS. 2019 , 61, 76-98	14
792	An efficiency-based path-scanning heuristic for the capacitated arc routing problem. 2019 , 103, 288-295	10
791	A new class of conjugate gradient methods for unconstrained smooth optimization and absolute value equations. 2019 , 56, 1	6
790	Rapid infeasibility detection in a mixed logarithmic barrier-augmented Lagrangian method for nonlinear optimization. 2019 , 34, 991-1013	3
789	Improved Fletcher-Reeves and Dai-Yuan conjugate gradient methods with the strong Wolfe line search. 2019 , 348, 525-534	17
788	Integer optimization with penalized fractional values: The Knapsack case. 2019 , 273, 874-888	6
787	Operator Splitting for a Homogeneous Embedding of the Linear Complementarity Problem. 2021 , 31, 1999-2023	3
786	Fast and stable nonconvex constrained distributed optimization: the ELLADA algorithm. 1	3
785	On the bang-bang control approach via a component-wise line search strategy for unconstrained optimization. 2021 , 11, 45	0
784	Computing Feasible Points of Bilevel Problems with a Penalty Alternating Direction Method. 2021 , 33, 198-215	7
783	A Novel Value for the Parameter in the Dai-Liao-Type Conjugate Gradient Method. 2021 , 2021, 1-10	1
782	Scaled parallel iterative method for finding real roots of nonlinear equations. 1-17	1
781	A decent three term conjugate gradient method with global convergence properties for large scale unconstrained optimization problems. 2021 , 6, 10742-10764	2
780	SeaPearl: A Constraint Programming Solver Guided by Reinforcement Learning. 2021 , 392-409	3
779	Secant Update generalized version of PSB: a new approach. 2021 , 78, 953-982	3
778	A Spectral RMIL+ Conjugate Gradient Method for Unconstrained Optimization With Applications in Portfolio Selection and Motion Control. 2021 , 9, 75398-75414	8
777	Statistical Models for the Analysis of Optimization Algorithms with Benchmark Functions. 2021 , 1-1	2

776	The convergence properties of a new hybrid conjugate gradient parameter for unconstrained optimization models. 2021 , 1734, 012012	1
775	Global Optimization of Mixed-Integer Polynomial Programs via Quadratic Reformulation. 2021 , 655-661	0
774	Numerical Results. 2021 , 43-60	
773	An efficient three-term conjugate gradient-type algorithm for monotone nonlinear equations. 2021 , 55, S1113-S1127	5
772	An active set quasi-Newton method with projection step for monotone nonlinear equations. 2021 , 6, 3606-3623	
771	Hybridizing large neighborhood search and exact methods for generalized vehicle routing problems with time windows. 2021 , 10, 100040	0
770	The modified PRP conjugate gradient algorithm under a non-descent line search and its application in the Muskingum model and image restoration problems. 2021 , 25, 5867-5879	7
769	Inertial Derivative-Free Projection Method for Nonlinear Monotone Operator Equations With Convex Constraints. 2021 , 9, 92157-92167	4
768	A Hybrid Evolutionary Algorithm for the Clique Partitioning Problem. 2021 , PP,	2
767	A hybrid FR-DY conjugate gradient algorithm for unconstrained optimization with application in portfolio selection. 2021 , 6, 6506-6527	8
766	Progressive Batching for Efficient Non-linear Least Squares. 2021 , 506-522	
765	New modification of the Hestenes-Stiefel with strong Wolfe line search. 2021 ,	
764	Topology Optimization Benchmark Problems for Assessing the Performance of Optimization Algorithms. 2021 ,	1
763	Nonmonotone spectral gradient method based on memoryless symmetric rank-one update for large-scale unconstrained optimization. 2021 ,	0
762	Decomposition Algorithms for Some Deterministic and Two-Stage Stochastic Single-Leader Multi-Follower Games. 2021 , 78, 675-704	3
761	Hybrid Extreme Learning Machine and Backpropagation with Adaptive Activation Functions for Classification Problems. 2021 , 19-29	
760	Performance Improvement of a Parsimonious Learning Machine Using Metaheuristic Approaches. 2021 , PP,	2
759	Surrogate-assisted Autoencoder-embedded Evolutionary Optimization Algorithm to Solve High-dimensional Expensive Problems. 2021 , 1-1	6

758 Coupled versus decoupled penalization of control complementarity constraints. **2021**, 27, 45

757 A Three-Term Gradient Descent Method with Subspace Techniques. **2021**, 2021, 1-7

752 Improving the Gridshells Regularity by Using Evolutionary Techniques. **2021**, 9, 440

2

751 A method for convex black-box integer global optimization. **2021**, 80, 439-477

1

750 Outer approximation for global optimization of mixed-integer quadratic bilevel problems. *Mathematical Programming*, **2021**, 188, 461-521

2.1 4

749 FR-type algorithm for finding approximate solutions to nonlinear monotone operator equations. **2021**, 10, 261-270

6

748 A Modified Hybrid Conjugate Gradient Method for Unconstrained Optimization. **2021**, 2021, 1-9

2

747 Nonlinear biobjective optimization: improving the upper envelope using feasible line segments. **2021**, 79, 503-520

0

746 Multimodal hub network design with flexible routes. **2021**, 146, 102188

4

745 A New Conjugate Gradient Method with Sufficient Descent Property. 163-174

0

744 Enhancing large neighbourhood search heuristics for Benders Decomposition. **2021**, 27, 615-648

0

743 Two-stage and one-group two-dimensional guillotine cutting problems with defects: a CP-based algorithm and ILP formulations. 1-20

4

742 An accelerated first-order method with complexity analysis for solving cubic regularization subproblems. **2021**, 79, 471-506

0

741 Conflict Analysis for MINLP.

- 740 A derivative-free scaling memoryless Broyden-B Fletcher-Goldfarb-Shanno method for solving a system of monotone nonlinear equations. **2021**, 28, e2374 5
- 739 Shortest path reoptimization vs resolution from scratch: a computational comparison. 1-23
- 738 Performance Analysis of a Modified Conjugate Gradient Algorithm for Optimization Models. **2021**, 1115, 012004
- 737 An inertial projection and contraction method with a line search technique for variational inequality and fixed point problems. 1-30 2
- 736 Mathematical models and heuristic methods for the assembly line balancing problem with hierarchical worker assignment. 1-19 3
- 735 Performance Assessment of Metaheuristic Algorithms for Structural Optimization Taking Into Account the Influence of Algorithmic Control Parameters. **2021**, 7, 2
- 734 Group layout design of manufacturing cells incorporating assembly and energy aspects. 1-16 2
- 733 Comparison of mixed-integer relaxations with linear and logarithmic partitioning schemes for quadratically constrained problems. 1 1
- 732 A Fast Algorithm for Knapsack Problem with Conflict Graph. 2150010
- 731 Stochastic Multiobjective Optimization: A Descent Algorithm. **2021**, 279-318
- 730 Stochastic mesh adaptive direct search for blackbox optimization using probabilistic estimates. **2021**, 79, 1-34 4
- 729 A branch-and-Benders-cut algorithm for a bi-objective stochastic facility location problem. 1 2
- 728 New hybrid conjugate gradient method as a convex combination of HZ and CD methods. **2021**, 14, 2150187 0
- 727 A criterion space search algorithm for mixed integer linear maximum multiplicative programs: a multiobjective optimization approach. 2
- 726 An Augmented Lagrangian Method for Cardinality-Constrained Optimization Problems. **2021**, 189, 793-813 2
- 725 Modeling Hessian-vector products in nonlinear optimization: new Hessian-free methods.
- 724 A modified Dai-Liao conjugate gradient method for solving unconstrained optimization and image restoration problems. 1 2
- 723 Global solutions of nonconvex standard quadratic programs via mixed integer linear programming reformulations. **2021**, 81, 293-321 2

722	A Derivative-Free Multivariate Spectral Projection Algorithm for Constrained NonLinear Monotone Equations. 2021 , 7, 1	0
721	Feasibility-ratio based sequencing for computationally efficient constrained optimization. 2021 , 62, 100850	2
720	A globally convergent regularized interior point method for constrained optimization. 1-36	0
719	A stochastic subspace approach to gradient-free optimization in high dimensions. 2021 , 79, 339-368	1
718	A high performance level-block approximate LU factorization preconditioner algorithm. 2021 , 162, 265-282	1
717	An Efficient Modified AZPRP Conjugate Gradient Method for Large-Scale Unconstrained Optimization Problem. 2021 , 2021, 1-9	2
716	A modified Hager-Zhang conjugate gradient method with optimal choices for solving monotone nonlinear equations. 1-23	7
715	Competitive hub location problem: Model and solution approaches. 2021 , 146, 237-261	1
714	A Modified Scaled Spectral-Conjugate Gradient-Based Algorithm for Solving Monotone Operator Equations. 2021 , 2021, 1-9	3
713	A competitive inexact nonmonotone filter SQP method: convergence analysis and numerical results. 1-34	1
712	Alternate second order conic program reformulations for hub location under stochastic demand and congestion. 2021 , 304, 481-527	3
711	On q-variant of Dai-Yuan conjugate gradient algorithm for unconstrained optimization problems. 2021 , 104, 2471-2496	3
710	Exact linesearch limited-memory quasi-Newton methods for minimizing a quadratic function. 2021 , 79, 789-816	1
709	Solving nonnegative sparsity-constrained optimization via DC quadratic-piecewise-linear approximations. 1	
708	Computing the matrix sine and cosine simultaneously with a reduced number of products. 2021 , 163, 96-107	2
707	A proximal bundle-based algorithm for nonsmooth constrained multiobjective optimization problems with inexact data. 1	1
706	A Theoretical and Empirical Comparison of Gradient Approximations in Derivative-Free Optimization. 1	4
705	A new three-term spectral conjugate gradient algorithm with higher numerical performance for solving large scale optimization problems based on Quasi-Newton equation. 2021 , 12, 2150053	1

704	The Covering-Assignment Problem for Swarm-Powered Ad Hoc Clouds: A Distributed 3-D Mapping Usecase. 2021 , 8, 7316-7332	1
703	Two derivative-free algorithms for constrained nonlinear monotone equations. e1176	
702	Solving stochastic hydrothermal unit commitment with a new primal recovery technique based on Lagrangian solutions. 2021 , 127, 106661	3
701	Two Modified Single-Parameter Scaling Broyden-B Fletcher-Goldfarb-Shanno Algorithms for Solving Nonlinear System of Symmetric Equations. 2021 , 13, 970	
700	Algorithms for Nonnegative Matrix Factorization with the Kullback-Leibler Divergence. 2021 , 87, 1	4
699	A reinforcement learning based multi-method approach for stochastic resource constrained project scheduling problems. 2021 , 169, 114479	10
698	Modified controlled Cholesky factorization for preconditioning linear systems from the interior-point method. 2021 , 40, 1	
697	On the Distance-Constrained Close Enough Arc Routing Problem. 2021 , 291, 32-51	2
696	Improved x-space algorithm for min-max bilevel problems with an application to misinformation spread in social networks. 2021 ,	0
695	An adaptive direct multisearch method for black-box multi-objective optimization. 1	0
694	A Biased Random-key Genetic Algorithm with a Local Search Component for the Optimal Bucket Order Problem. 2021 ,	0
693	An alternating nonmonotone projected Barzilai-Borwein algorithm of nonnegative factorization of big matrices. 2021 , 35, 1972-2008	0
692	A hybrid method for solving non-convex min-max quadratic fractional problems under quadratic constraints. 1-17	
691	Sufficient Descent Riemannian Conjugate Gradient Methods. 2021 , 190, 130-150	2
690	A new hybrid conjugate gradient method of unconstrained optimization methods. 2250070	
689	Performance evaluation and analysis of distributed multi-agent optimization algorithms with sparsified directed communication. 2021 , 2021,	0
688	Improving Differential Evolution through Bayesian Hyperparameter Optimization. 2021 ,	10
687	An improved Polak-Ribiere-Polyak conjugate gradient method with an efficient restart direction. 2021 , 40, 1	3

686	Intelligent-Guided Adaptive Search For The Traveling Backpacker Problem. 2021 ,	
685	A hybrid conjugate gradient based approach for solving unconstrained optimization and motion control problems. 2021 ,	8
684	An active-set memoryless quasi-Newton method based on a spectral-scaling Broyden family for bound constrained optimization. 2021 , 3, 100012	1
683	Optimization models for a lot sizing and scheduling problem on parallel production lines that share scarce resources.	2
682	A New Hybrid Three-Term Conjugate Gradient Algorithm for Large-Scale Unconstrained Problems. 2021 , 9, 1353	1
681	A modified filter nonmonotone adaptive retrospective trust region method. 2021 , 16, e0253016	0
680	A compact reformulation of the two-stage robust resource-constrained project scheduling problem. 2021 , 130, 105232	2
679	A Genetic Algorithm for the Nesting Problem With Continuous Rotations. 2021 ,	
678	Memetic differential evolution methods for clustering problems. 2021 , 114, 107849	5
677	An augmented subgradient method for minimizing nonsmooth DC functions. 2021 , 80, 411-438	0
676	A Complex-valued Encoding Seeker Optimization Algorithm for Constrained Engineering Problems. 2021 , 20, 173-195	1
675	Two sufficient descent three-term conjugate gradient methods for unconstrained optimization problems with applications in compressive sensing. 1	5
674	A derivative-free RMIL conjugate gradient projection method for convex constrained nonlinear monotone equations with applications in compressive sensing. 2021 , 165, 431-441	4
673	New hybrid three-term spectral-conjugate gradient method for finding solutions of nonlinear monotone operator equations with applications. 2021 ,	5
672	An active-set proximal quasi-Newton algorithm for ℓ_1 -regularized minimization over a sphere constraint. 1-42	
671	Alternative structured spectral gradient algorithms for solving nonlinear least-squares problems. 2021 , 7, e07499	1
670	Fully polynomial time $((\Sigma, \Pi))$ -approximation schemes for continuous nonlinear newsvendor and continuous stochastic dynamic programs. <i>Mathematical Programming</i> , 1	2.1
669	Computational study of a branching algorithm for the maximum k-cut problem. 2021 , 100656	

668 Compact representations of structured BFGS matrices. **2021**, 80, 55-88

667 An efficient hybrid conjugate gradient method with descent properties under strong Wolfe line search. **2021**, 1988, 012002

666 An operation to promote diversity in evolutionary algorithms in a dynamic hybrid island model. **2021**,

665 A Modified Liu and Storey Conjugate Gradient Method for Large Scale Unconstrained Optimization Problems. **2021**, 14, 227 1

664 Ranking Methods for Multicriteria Decision-Making: Application to Benchmarking of Solvers and Problems. **2021**, 2021, 1-14

663 A derivative-free three-term Hestenes-Broyden type method for constrained nonlinear equations and image restoration. 1-25 4

662 Sparse Estimation of High-Dimensional Inverse Covariance Matrices with Explicit Eigenvalue Constraints. **2021**, 9, 543-568

661 A Convex Combination between Two Different Search Directions of Conjugate Gradient Method and Application in Image Restoration. **2021**, 2021, 1-15 2

660 Trust-Region Based Penalty Barrier Algorithm for Constrained Nonlinear Programming Problems: An Application of Design of Minimum Cost Canal Sections. **2021**, 9, 1551 2

659 Tightening methods based on nontrivial bounds on bilinear terms. 1 0

658 ILP-based heuristics for a virtual network function placement and routing problem. **2021**, 78, 328-349

657 Multi-objective optimum design of truss structures using differential evolution algorithms. **2021**, 252, 106544 3

656 A Descent Four-Term Conjugate Gradient Method with Global Convergence Properties for Large-Scale Unconstrained Optimisation Problems. **2021**, 2021, 1-14 1

655 Metaheuristics for the Minimum Gap Graph Partitioning Problem. **2021**, 132, 105301 4

654 A Globally Convergent Derivative-Free Projection Method for Nonlinear Monotone Equations with Applications. **2021**, 44, 4335 1

653 Network scheduling problem with cross-docking and loading constraints. **2021**, 132, 105271 5

652 The Referenced Vertex Ordering Problem: Theory, Applications, and Solution Methods. 2, 1-29 1

651 The minimum area spanning tree problem: Formulations, Benders decomposition and branch-and-cut algorithms. **2021**, 97, 101771 0

650	DaiLiao extensions of a descent hybrid nonlinear conjugate gradient method with application in signal processing. 1	4
649	A conjugate gradient algorithm based on double parameter scaled Broyden Fletcher Goldfarb Shanno update for optimization problems and image restoration. 1	
648	A generalized hybrid CGPM-based algorithm for solving large-scale convex constrained equations with applications to image restoration. 2021 , 391, 113423	4
647	Benchmarking of metaheuristic algorithms to design flotation circuits to full scale. 2021 , 170, 107056	
646	Convergence of the proximal bundle algorithm for nonsmooth nonconvex optimization problems. 1	0
645	DAMA-a method for computing multiple alignments of protein structures using local structure descriptors. 2021 ,	2
644	A note on memory-less SR1 and memory-less BFGS methods for large-scale unconstrained optimization. 1	3
643	Spectral residual method for nonlinear equations on Riemannian manifolds. 2021 , 40, 1	
642	A Nonmonotone Matrix-Free Algorithm for Nonlinear Equality-Constrained Least-Squares Problems. S743-S766	
641	A New Type of Step Sizes for Unconstrained Optimization. 2021 , 1999, 012099	
640	Another Three-Term Conjugate Gradient Method Close to the Memoryless BFGS for Large-Scale Unconstrained Optimization Problems. 2021 , 18, 1	0
639	Implicit steepest descent algorithm for optimization with orthogonality constraints. 1	2
638	Signal recovery with convex constrained nonlinear monotone equations through conjugate gradient hybrid approach. 2021 , 187, 520-539	15
637	Accelerating convergence of a globalized sequential quadratic programming method to critical Lagrange multipliers. 1	
636	On solving double direction methods for convex constrained monotone nonlinear equations with image restoration. 2021 , 40, 1	11
635	((text {B}))-subdifferentials of the projection onto the matrix simplex. 1	1
634	Two limited-memory optimization methods with minimum violation of the previous secant conditions. 2021 , 80, 755	
633	Casting Light on the Hidden Bilevel Combinatorial Structure of the Capacitated Vertex Separator Problem.	0

- 632 A modified Perry-type derivative-free projection method for solving large-scale nonlinear monotone equations. **2021**, 55, 2615-2629
- 631 A q-Gradient Descent Algorithm with Quasi-Fejér Convergence for Unconstrained Optimization Problems. **2021**, 5, 110 1
- 630 An augmented memoryless BFGS method based on a modified secant equation with application to compressed sensing. **2021**, 167, 187-201 2
- 629 Improved models for operation modes of complex compressor stations. 1
- 628 An efficient projection-based algorithm without Lipschitz continuity for large-scale nonlinear pseudo-monotone equations. **2021**, 113822 3
- 627 Grouping memetic search for the colored traveling salesmen problem. **2021**, 570, 689-707 2
- 626 Information guiding and sharing enhanced simultaneous heat transfer search and its application to k-means optimization. **2021**, 109, 107476 2
- 625 A three-term Polak-Ribière-Polyak derivative-free method and its application to image restoration. **2021**, 13, e00880 3
- 624 A three-term conjugate gradient method with accelerated subspace quadratic optimization. 1 1
- 623 On scaled stopping criteria for a safeguarded augmented Lagrangian method with theoretical guarantees. 1 2
- 622 Optimal task scheduling for partially heterogeneous systems. **2021**, 107, 102815 0
- 621 A piecewise relaxation for quadratically constrained problems based on a mixed-radix numeral system. **2021**, 153, 107459 0
- 620 A structured quasi-Newton algorithm with nonmonotone search strategy for structured NLS problems and its application in robotic motion control. **2021**, 395, 113582 6
- 619 Analytic Continued Fractions for Regression: A Memetic Algorithm Approach. **2021**, 179, 115018 2
- 618 Combined gradient methods for multiobjective optimization. 1
- 617 A branch-and-price algorithm for the Minimum Sum Coloring Problem. **2021**, 303, 39-56
- 616 A hybrid adaptive iterated local search with diversification control to the capacitated vehicle routing problem. **2021**, 294, 1108-1119 8
- 615 Ensemble ellipse fitting by spatial median consensus. **2021**, 579, 310-324 0

614	Multistage robust discrete optimization via quantified integer programming. 2021 , 135, 105434	3
613	An extended goal programming model for the multiobjective integrated lot-sizing and cutting stock problem. 2021 , 295, 996-1007	2
612	A threshold search based memetic algorithm for the disjunctively constrained knapsack problem. 2021 , 136, 105447	1
611	An adaptive nonmonotone line search for multiobjective optimization problems. 2021 , 136, 105506	0
610	New partial aggregations for multicommodity network flow problems: An application to the fixed-charge network design problem. 2021 , 136, 105505	1
609	A new CG algorithm based on a scaled memoryless BFGS update with adaptive search strategy, and its application to large-scale unconstrained optimization problems. 2021 , 398, 113670	0
608	Adaptive scaling damped BFGS method without gradient Lipschitz continuity. 2022 , 124, 107634	3
607	An Eonstraint column generation-and-enumeration algorithm for Bi-Objective Vehicle Routing Problems. 2022 , 138, 105570	2
606	A Block-Based Triangle Counting Algorithm on Heterogeneous Environments. 2022 , 33, 444-458	2
605	Exact solution approaches for integer linear generalized maximum multiplicative programs through the lens of multi-objective optimization. 2022 , 137, 105549	2
604	Hybrid matheuristics to solve the integrated lot sizing and scheduling problem on parallel machines with sequence-dependent and non-triangular setup. 2022 , 296, 158-173	3
603	A Logical-Mathematical Approach for the Implementation of Ecologically Equipped Productive Urban Areas. 2021 , 13, 1365	1
602	Conditional gradient method for multiobjective optimization. 2021 , 78, 741-768	1
601	On tackling reverse convex constraints for non-overlapping of unequal circles. 2021 , 80, 357-385

- 244 TROPY: Trust Region Optimization Using a Precision Hierarchy. **2022**, 445-459
- 243 Brief review on the performance of RMIL conjugate gradient methods. **2022**,
- 242 An Improved Neural Network Model for Treatment Effect Estimation. **2022**, 147-158
- 241 A convergent hybrid three-term conjugate gradient method with sufficient descent property for unconstrained optimization. **2022**, 10, 47-60
- 240 New hybrid conjugate gradient method under strong Wolfe line search. **2022**,
- 239 Autonomous Target Search Using Unmanned Aerial Vehicles in the Presence of Signal Noise. **2022**, 1-1 o
- 238 A modified bracketing method of n-th section line search in conjugate gradient methods for solving unconstrained optimization. **2022**,
- 237 Efficient metaheuristics to solve a rich production-routing problem. **2022**, 108369 o

- 236 A Closest Benders Cut Selection Scheme for Accelerating the Benders Decomposition Algorithm.
- 235 An efficient gradient method' with approximately optimal stepsizes based on regularization models for unconstrained optimization. O
- 234 An extended delayed weighted gradient algorithm for solving strongly convex optimization problems. **2022**, 114525
- 233 Scalable subspace methods for derivative-free nonlinear least-squares optimization. *Mathematical Programming*, 2.1 1
- 232 Discretization and global optimization for mixed integer bilinear programming.
- 231 New iterative conjugate gradient method for nonlinear unconstrained optimization.
- 230 Solving the clustered traveling salesman problem via traveling salesman problem methods. 8, e972
- 229 The multi-product inventory-routing problem with pickups and deliveries: Mitigating fluctuating demand via rolling horizon heuristics. **2022**, 164, 102791
- 228 Newton-MR: Inexact Newton Method with minimum residual sub-problem solver. **2022**, 10, 100035 O
- 227 On the New Quasi-Newton Equation for Unconstrained Optimization. **2022**, O
- 226 An Interior Stochastic Gradient Method for a Class of Non-Lipschitz Optimization Problems. **2022**, 92,
- 225 On the new spectral conjugate gradient-type method for monotone nonlinear equations and signal recovery.
- 224 A Scaled Dai-Yuan Projection-Based Conjugate Gradient Method for Solving Monotone Equations with Applications. **2022**, 14, 1401 1
- 223 Assessment of a Two-Step Approach for Global Optimization of Mixed-Integer Polynomial Programs using Quadratic Reformulation. **2022**, 107909 O
- 222 A hybrid engineering algorithm of the seeker algorithm and particle swarm optimization. **2022**, 64, 1051-1089 1
- 221 Integral Global Optimality Conditions and an Algorithm for Multiobjective Problems. 1-24
- 220 A product space reformulation with reduced dimension for splitting algorithms. 1
- 219 A hybrid quasi-Newton method with application in sparse recovery. **2022**, 41,

- 218 A modified inertial three-term conjugate gradient projection method for constrained nonlinear equations with applications in compressed sensing. ○
- 217 Approximation methods with inertial term for large-scale nonlinear monotone equations. **2022**, 181, 417-435 ○
- 216 A modified scaling BFGS method for nonconvex minimization. **2013**, 49,
- 215 Learning causal theories with non-reversible MCMC methods. **2021**, 50, 323-361
- 214 Minimizing I/Os in Out-of-Core Task Tree Scheduling. 1-30
- 213 Accelerated Dai-Liao projection method for solving systems of monotone nonlinear equations with application to image deblurring. ○
- 212 Global convergence of a modified spectral three-term CG algorithm for nonconvex unconstrained optimization problems. **2022**, 114630
- 211 A hybrid Riemannian conjugate gradient method for nonconvex optimization problems.
- 210 A modified Dai-Liao-type method with applications to signal reconstruction and blurred image restoration. **2022**, 41, ○
- 209 BELTISTOS: A robust interior point method for large-scale optimal power flow problems. **2022**, 212, 108613
- 208 Nonmonotone diagonally scaled limited-memory BFGS methods with application to compressive sensing based on a penalty model. **2022**, 181, 618-629
- 207 A survey of sufficient descent conjugate gradient methods for unconstrained optimization. **2014**, 50, 9
- 206 A hybrid method of three-term conjugate gradient method and memoryless quasi-Newton method for unconstrained optimization. **2018**, 54, 3
- 205 Deterministic Parallel Hypergraph Partitioning. **2022**, 301-316
- 204 Covid-19 data modelling using hybrid conjugate gradient method. **2022**, 43, 837-853
- 203 A Class of Sparse Direct Broyden Method for Solving Sparse Nonlinear Equations. **2022**, 14, 1552
- 202 A Quasi-Newton Method with Wolfe Line Searches for Multiobjective Optimization. **2022**, 194, 1107-1140 ○

- 40 A two-stage robust approach for minimizing the weighted number of tardy jobs with objective uncertainty. **2023**, 26, 169-191 ○
- 39 Why there is no need to use a big-M in linear bilevel optimization: a computational study of two ready-to-use approaches. **2023**, 20, ○

- 38 On atomic cliques in temporal graphs. **2023**, 17, 813-828 ○
- 37 A Hybrid Direct Search and Model-Based Derivative-Free Optimization Method with Dynamic Decision Processing and Application in Solid-Tank Design. **2023**, 16, 92 ○
- 36 A descent spectral Dai-Liao method based on the quasi-Newton aspects. ○
- 35 A general purpose exact solution method for mixed integer concave minimization problems. **2023**, ○
- 34 On the convergence of iterative schemes for solving a piecewise linear system of equations. **2023**, 665, 291-314 ○
- 33 A harmonic framework for stepsize selection in gradient methods. **2023**, 85, 75-106 ○
- 32 A Bundle Trust Region Algorithm for Minimizing Locally Lipschitz Functions. **2023**, 33, 319-337 ○
- 31 A New Adaptive Accelerated Levenberg-Marquardt Method for Solving Nonlinear Equations and Its Applications in Supply Chain Problems. **2023**, 15, 588 ○
- 30 Tightening discretization-based MILP models for the pooling problem using upper bounds on bilinear terms. ○
- 29 A new hybrid conjugate gradient algorithm based on the Newton direction to solve unconstrained optimization problems. ○
- 28 A limited memory Quasi-Newton approach for multi-objective optimization. **2023**, 85, 33-73 ○
- 27 A One-Parameter Memoryless DFP Algorithm for Solving System of Monotone Nonlinear Equations with Application in Image Processing. **2023**, 11, 1221 ○
- 26 Application of decomposition techniques in a wildfire suppression optimization model. ○
- 25 Sparse signal reconstruction via Hager-Zhang-type schemes for constrained system of nonlinear equations. 1-32 ○
- 24 Improved Convex and Concave Relaxations of Composite Bilinear Forms. **2023**, 197, 174-204 ○
- 23 An Improved Imperialist Competitive Algorithm Inspired by Democratic Revolution. **2022**, ○
- 22 New inertial-based spectral projection method for solving system of nonlinear equations with convex constraints. **2022**, 36, 4553-4562 ○
- 21 Safe Rules for the Identification of Zeros in the Solutions of the SLOPE Problem. **2023**, 5, 147-173 ○

- 20 The global convergence of spectral RMIL conjugate gradient method for unconstrained optimization with applications to robotic model and image recovery. **2023**, 18, e0281250 ○
- 19 An inertial three-term hybrid CG-based projection method for constrained nonlinear pseudo-monotone equations with applications. **2023**, 0-0 ○
- 18 Extended formulations for perfect domination problems and their algorithmic implications. **2023**, ○
- 17 Inexact penalty decomposition methods for optimization problems with geometric constraints. ○
- 16 Memoryless Quasi-Newton Methods Based on the Spectral-Scaling Broyden Family for Riemannian Optimization. ○
- 15 A self-adaptive projection method for nonlinear monotone equations with convex constraints. **2023**, 0-0 ○
- 14 Time Constrained DL8.5 Using Limited Discrepancy Search. **2023**, 443-459 ○
- 13 Two families of hybrid conjugate gradient methods with restart procedures and their applications. 1-28 ○
- 12 Revisiting degeneracy, strict feasibility, stability, in linear programming. **2023**, ○
- 11 An energy minimization strategy based on an improved nonlinear conjugate gradient method for accelerating the charged polymer dynamics simulation. ○
- 10 Results for the close-enough traveling salesman problem with a branch-and-bound algorithm. ○
- 9 Enhancing Block Cimmino for Sparse Linear Systems with Dense Columns via Schur Complement. **2023**, 45, C49-C72 ○
- 8 Derivative-free separable quadratic modeling and cubic regularization for unconstrained optimization. ○
- 7 A Modified DaiLiao Conjugate Gradient Method Based on a Scalar Matrix Approximation of Hessian and Its Application. **2023**, 2023, 1-20 ○
- 6 A proximal bundle method for a class of nonconvex nonsmooth composite optimization problems. ○
- 5 Performance evaluation of a novel Conjugate Gradient Method for training feed forward neural network. **2023**, 10, 326-337 ○
- 4 The Profitable Single Truck and Trailer Routing Problem with Time Windows: Formulation, valid inequalities and branch-and-cut algorithms. **2023**, 109238 ○
- 3 A new sufficiently descent algorithm for pseudomonotone nonlinear operator equations and signal reconstruction. ○

- 2 An approximate gradient-type method for nonlinear symmetric equations with convex constraints. **2023**, 115259 
- 1 Solving the skiving stock problem by a combination of stabilized column generation and the Reflect Arc-Flow model. **2023**, 334, 145-162
