

# Differential Cellular Distribution of HIV-1 Drug Resistance of CD8+ T Cells during HAART

Virology

305, 339-352

DOI: [10.1006/viro.2002.1703](https://doi.org/10.1006/viro.2002.1703)

Citation Report

#	ARTICLE	IF	CITATIONS
1	CD4 on CD8+ T cells directly enhances effector function and is a target for HIV infection. Proceedings of the National Academy of Sciences of the United States of America, 2004, 101, 8727-8732.	3.3	81
2	HIV-1 compartmentalization in diverse leukocyte populations during antiretroviral therapy. Journal of Leukocyte Biology, 2004, 76, 562-570.	1.5	34
3	A Robust Measure of HIV-1 Population Turnover Within Chronically Infected Individuals. Molecular Biology and Evolution, 2004, 21, 1902-1912.	3.5	104
4	High Levels of Human Immunodeficiency Virus Infection of CD8 Lymphocytes Expressing CD4 In Vivo. Journal of Virology, 2004, 78, 9862-9871.	1.5	38
5	Independent Evolution of Human Immunodeficiency Virus (HIV) Drug Resistance Mutations in Diverse Areas of the Brain in HIV-Infected Patients, with and without Dementia, on Antiretroviral Treatment. Journal of Virology, 2004, 78, 10133-10148.	1.5	131
6	Differential virus evolution in blood and genital tract of HIV-infected females: evidence for the involvement of drug and non-drug resistance-associated mutations. Virology, 2004, 324, 577-586.	1.1	37
7	Differential virus evolution in blood and genital tract of HIV-infected females: evidence for the involvement of drug and non-drug resistance-associated mutations. Virology, 2004, 324, 577-577.	1.1	0
8	Association between osteopenia/osteoporosis and the serum RANKL in HIV-infected patients. Aids, 2005, 19, 1240-1241.	1.0	37
9	Persistence of distinct HIV-1 populations in blood monocytes and naive and memory CD4 T cells during prolonged suppressive HAART. Aids, 2005, 19, 1739-1750.	1.0	79
