Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
205	Do separate processes identify objects as exemplars versus members of basic-level categories? Evidence from hemispheric specialization. 2003 , 53, 15-27		47
204	The role of high spatial frequencies in hemispheric processing of categorical and coordinate spatial relations. 2004 , 16, 1576-82		19
203	Sex differences for selective forms of spatial memory. 2004 , 54, 24-34		141
202	Survival with an asymmetrical brain: advantages and disadvantages of cerebral lateralization. 2005 , 28, 575-89; discussion 589-633		845
201	Two types of image generation: evidence from PET. 2005 , 5, 41-53		27
200	Space: from perception to action. 2005 , 118, 1-6		3
199	Strategic and automatic components in the processing of linguistic spatial relations. 2005 , 119, 1-20		17
198	fsi zebrafish show concordant reversal of laterality of viscera, neuroanatomy, and a subset of behavioral responses. 2005 , 15, 844-50		184
197	The spatial and temporal meanings of English prepositions can be independently impaired. <i>Neuropsychologia</i> , 2005 , 43, 797-806	3.2	52
196	Hemispheric specialization for categorical and coordinate spatial relations during an image generation task: evidence from children and adults. <i>Neuropsychologia</i> , 2005 , 43, 517-29	3.2	8
195	asymmetrical behavior without an asymmetrical brain: corpus callosum and neuroplasticity. 2005 , 28, 608-609		3
194	when dominance and sex are both right. 2005 , 28, 612-613		
193	forming an asymmetrical brain: genes, environment, and evolutionarily stable strategies. 2005 , 28, 615-623		8
192	behavioral left-right asymmetry extends to arthropods. 2005 , 28, 601-602		12
191	developmental systems, evolutionarily stable strategies, and population laterality. 2005 , 28, 592-593		2
190	selection pressure on the decision-making process in conflict. 2005 , 28, 604-605		
189	do asymmetrical differences in primate brains correspond to cerebral lateralization?. 2005 , 28, 590-591		

- 188 genes as primary determinants of population level lateralisation. **2005**, 28, 593-594
- 187 the cerebral torque and directional asymmetry for hand use are correlates of the capacity for language in homo sapiens. **2005**, 28, 595-596 6
- 186 the left-side bias for holding human infants: an everyday directional asymmetry in the natural environment. **2005**, 28, 600-601
- 185 partial reversal and the functions of lateralisation. **2005**, 28, 589-590 39
- 184 the riddle of nature and nurture □lateralization has an epigenetic trait. **2005**, 28, 602-603 3
- 183 natural selection of asymmetric traits operates at multiple levels. **2005**, 28, 605-606 5
- 182 causal relations between asymmetries at the individual level?. **2005**, 28, 596-597 3
- 181 unity in the wild variety of nature, or just variety?. **2005**, 28, 606-608 4
- 180 population lateralization arises in simulated evolution of non-interacting neural networks. **2005**, 28, 609-611
- 179 cerebral asymmetry: from survival strategies to social behaviour. **2005**, 28, 613-614
- 178 darwin's legacy and the evolution of cerebral asymmetries. **2005**, 28, 599-600
- 177 rethinking brain asymmetries in humans. **2005**, 28, 598-599
- 176 optimization through lateralization: the evolution of handedness. **2005**, 28, 611-612 12
- 175 cerebral lateralisation, social constraints, and coordinated anti-predator responses. **2005**, 28, 591-592 22
- 174 evolutionary tango: perceptual asymmetries as a trick of sexual selection. **2005**, 28, 614-615 3
- 173 putting things right: Why before How□**2005**, 28, 608-608 2
- 172 the trade-off between symmetry and asymmetry. **2005**, 28, 594-595 8
- 171 behavioral symmetry and reverse asymmetry in the chick and rat. **2005**, 28, 597-597 4
