

CITATION REPORT

List of articles citing

Endothelial dysfunction in erectile dysfunction: role of the endothelium in erectile physiology and disease

DOI: 10.1002/j.1939-4640.2003.tb02743.x
Journal of Andrology, 2003, 24, S17-37.

Source: <https://exaly.com/paper-pdf/35470271/citation-report.pdf>

Version: 2024-04-19

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
204	RhoA/Rho-kinase suppresses endothelial nitric oxide synthase in the penis: a mechanism for diabetes-associated erectile dysfunction. 2004 , 101, 9121-6		279
203	Vasculogenic mechanisms of erectile dysfunction. 2004 , 1, 105-110		4
202	Cytotoxicity of different intracavernous vasoactive drugs on cultured endothelial cells of human corpus cavernosum penis. 2004 , 64, 598-602		6
201	Vardenafil is effective and well-tolerated for treating erectile dysfunction in a broad population of men, irrespective of age. 2005 , 95, 110-6		22
200	In vitro viability of human cavernosal endothelial and fibroblastic cells after exposure to papaverine/phentolamine and prostaglandin E1. 2005 , 95, 1351-7		6
199	Difficulties in achieving vs maintaining erection: organic, psychogenic and relational determinants. 2005 , 17, 252-8		18
198	Chronic treatment with tadalafil improves endothelial function in men with increased cardiovascular risk. 2005 , 47, 214-20; discussion 220-2		188
197	Isolation of primary endothelial and stromal cell cultures of the corpus cavernosum penis for basic research and tissue engineering. 2005 , 47, 710-8; discussion 718-9		37
196	Diagnosing erectile dysfunction: flow-chart. 2005 , 28 Suppl 2, 64-8		3
195	Superoxide anion production in the rat penis impairs erectile function in diabetes: influence of in vivo extracellular superoxide dismutase gene therapy. 2005 , 2, 187-97; discussion 197-8		99
194	Age-related changes in phosphorylation of endothelial nitric oxide synthase in the rat penis. 2005 , 2, 347-55; discussion 355-7		61
193	Metabolic syndrome, endothelial dysfunction, and erectile dysfunction: association and management. 2005 , 6, 470-5		17
192	Microarray analysis reveals novel gene expression changes associated with erectile dysfunction in diabetic rats. 2005 , 23, 192-205		41
191	Potential application for mesenchymal stem cells in the treatment of cardiovascular diseases. 2005 , 83, 529-39		14
190	Endothelial nitric oxide synthase gene therapy for erectile dysfunction. 2005 , 11, 4059-67		24
189	Erection capability is potentiated by long-term sildenafil treatment: role of blood flow-induced endothelial nitric-oxide synthase phosphorylation. 2005 , 68, 226-32		78
188	Inactivation of phosphorylated endothelial nitric oxide synthase (Ser-1177) by O-GlcNAc in diabetes-associated erectile dysfunction. 2005 , 102, 11870-5		180

187	Erectile dysfunction is a signal of risk for cardiovascular disease: a primary care view. 2005 , 32, 977-93, vii	5
