Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 13 Evaluation of a two-dimensional Moire-free antiscatter grid for cone-beam computed tomography. ○
- 12 Design and performance simulation studies of a breast PET insert integrable into a clinical whole-body PET/MRI scanner. **2023**, 68, 055019 ○
- 11 Mesh modeling of system geometry and anatomy phantoms for realistic GATE simulations and their inclusion in SPECT reconstruction. **2023**, 68, 075015 ○
- 10 Monte-Carlo techniques for radiotherapy applications I: introduction and overview of the different Monte-Carlo codes. **2023**, 22, ○
- 9 Monte Carlo Model of the Large Modular Array for Positron Emission Particle Tracking. **2023**, 11, 25982-25990 ○
- 8 A probabilistic framework for uncertainty quantification in positron emission particle tracking. **2023**, 39, 055003 ○
- 7 A framework for prediction of personalized pediatric nuclear medical dosimetry based on machine learning and Monte Carlo techniques. **2023**, 68, 084004 ○
- 6 Fetal dose estimation during pregnancy using Gate Monte Carlo simulation: application of Hodgkin's lymphoma radiotherapy. ○

- 5 TOPAS-imaging: extensions to the TOPAS simulation toolkit for medical imaging systems. **2023**, 68, 084001 ○
- 4 **18F-PSMA-1007** salivary gland dosimetry: comparison between different methods for dose calculation and assessment of inter- and intra-patient variability. **2023**, 68, 085015 ○
- 3 S-values estimation of positron-emitting radionuclides in the ICRP voxel-based adult male organs using a new Geant4-based code DoseCalcs: validation study. ○
- 2 Fast scintillating Ce³⁺ doped gadolinium aluminum fluoroborate glass for calorimetry in proton CT prototype: A preliminary work. **2023**, 163, 106937 ○
- 1 Commissioning and dosimetric validation of a novel compensator-based Co-60 IMRT system for evaluating suitability to automated treatment planning. ○
