

CITATION REPORT

List of articles citing

High intensity aerobic interval exercise is superior to moderate intensity exercise for increasing aerobic capacity in patients with coronary artery disease

DOI: 10.1097/01.hjr.0000131677.96762.0c

European Journal of Cardiovascular Prevention and Rehabilitation, 2004, 11, 216-22.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
