Visual Learning by Coevolutionary Feature Synthesis

Citation Report

#	ARTICLE	IF	CITATIONS
1	Evolutionary feature synthesis for facial expression recognition. Pattern Recognition Letters, 2006, 27, 1289-1298.	2.6	65
2	Synthesis of interest point detectors through genetic programming. , 2006, , .		56
3	Evolutionary Learning of Primitive-Based Visual Concepts. , 0, , .		6
4	Overview of Object Detection and Image Analysis by Means of Genetic Programming Techniques. , 2007, , .		18
5	Genetic programming for cross-task knowledge sharing. , 2007, , .		5
6	Knowledge reuse in genetic programming applied to visual learning. , 2007, , .		10
7	Fitness Functions in Genetic Programming for Classification with Unbalanced Data. , 2007, , 769-775.		47
8	Visual Learning by Evolutionary and Coevolutionary Feature Synthesis. IEEE Transactions on Evolutionary Computation, 2007, 11, 635-650.	7.5	61
9	Visual learning of texture descriptors for facial expression recognition in thermal imagery. Computer Vision and Image Understanding, 2007, 106, 258-269.	3.0	86
10	Generative learning of visual concepts using multiobjective genetic programming. Pattern Recognition Letters, 2007, 28, 2385-2400.	2.6	21
11	Improving search performance of linear genetic programming based image recognition program synthesis by redundancy-removed recombination. , 2008, , .		2
12	Genetic algorithm based on multipopulation competitive coevolution. , 2008, , .		7
13	Genetic programming for performance improvement and dimensionality reduction of classification problems. , 2008, , .		6
14	Transformation of redundant representations of linear genetic programming into canonical forms for efficient extraction of image features. , 2008, , .		7
15	Shape-based recognition of targets in synthetic aperture radar images using elliptical Fourier descriptors. Proceedings of SPIE, 2008, , .	0.8	6
16	Multitask Visual Learning Using Genetic Programming. Evolutionary Computation, 2008, 16, 439-459.	2.3	13
17	Uncertainty analysis of an evolutionary algorithm to develop remote sensing spectral indices. Proceedings of SPIE, 2008, , .	0.8	5
18	An efficient image pattern recognition system using an evolutionary search strategy. , 2009, , .		5

#	ARTICLE	IF	CITATIONS
19	Evolutionary learning of local descriptor operators for object recognition. , 2009, , .		28
20	Analysis of Image Quality for Image Fusion via Monotonic Correlation. IEEE Journal on Selected Topics in Signal Processing, 2009, 3, 222-235.	7.3	13
21	Evaluation of the use of spectral and textural information by an evolutionary algorithm for multi-spectral imagery classification. Computers, Environment and Urban Systems, 2009, 33, 463-471.	3.3	11
22	Dimensionality reduction in face detection: A genetic programming approach. , 2009, , .		22
23	SVM-based target recognition from synthetic aperture radar images using target region outline descriptors. Nonlinear Analysis: Theory, Methods & Applications, 2009, 71, e2934-e2939.	0.6	104
24	Acceleration of Genetic Programming by Hierarchical Structure Learning: A Case Study on Image Recognition Program Synthesis. IEICE Transactions on Information and Systems, 2009, E92-D, 2094-2102.	0.4	3
25	Analytical Features: A Knowledge-Based Approach to Audio Feature Generation. Eurasip Journal on Audio, Speech, and Music Processing, 2009, 2009, 1-23.	1.3	35
26	Multi-Objective Genetic Programming with Redundancy-Regulations for Automatic Construction of Image Feature Extractors. IEICE Transactions on Information and Systems, 2010, E93-D, 2614-2625.	0.4	2
27	Automatic construction of image transformation algorithms using feature based genetic image network. , 2010, , .		4
28	Automated synthesis of feature functions for pattern detection. , 2010, , .		2
29	Evolutionary Feature Selection and Construction. , 2011, , 353-357.		0
30	Decision system for a team of autonomous underwater vehiclesâ€"Preliminary report. Neurocomputing, 2011, 74, 3323-3334.	3.5	19
31	Redundancies in linear GP, canonical transformation, and its exploitation: a demonstration on image feature synthesis. Genetic Programming and Evolvable Machines, 2011, 12, 49-77.	1.5	3
32	Evolutionary-computer-assisted design of image operators that detect interest points using genetic programming. Image and Vision Computing, 2011, 29, 484-498.	2.7	59
33	An Improved Scheme for Target Discrimination in High-Resolution SAR Images. IEEE Transactions on Geoscience and Remote Sensing, 2011, 49, 277-294.	2.7	46
34	Evolving spectral transformations for multitemporal information extraction using evolutionary computation. Journal of Applied Remote Sensing, 2011, 5, 053564.	0.6	3
35	A Genetic Programming Based Scheme for Combining Image Operators. , 2012, , .		1
36	Interest point detection through multiobjective genetic programming. Applied Soft Computing Journal, 2012, 12, 2566-2582.	4.1	34
