Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
609	Limits to adaptation and patterns of biodiversity. 2001 , 77-101		9
608	Satellite-based detection of global urban heat-island temperature influence. 2002 , 107, ACL 16-1		15
607	Nocturnal warming increases photosynthesis at elevated CO partial pressure in <i>Populus deltoides</i> . 2004 , 161, 819-826		43
606	Does greater night-time, rather than constant, warming alter growth of managed pasture under under ambient and elevated atmospheric CO ₂ ?. 2004 , 162, 397-411		22
605	Direct and indirect climate change effects on photosynthesis and transpiration. 2004 , 6, 242-53		89
604	STRUCTURALLY NOVEL BIOMES: A RESPONSE TO PAST WARMING IN BERINGIA. <i>Ecology</i> , 2005 , 86, 1696-1703	4.7	97
603	Global Warming, Human Population Pressure, and Viability of the World's Smallest Butterfly. 2005 , 19, 1113-1124		29
602	Rapid evolution and the convergence of ecological and evolutionary time. 2005 , 8, 1114-1127		651
601	Effects of vegetation canopy and climate on seedling establishment in Mediterranean shrubland. 2005 , 16, 67-76		106
600	SPECIES-SPECIFIC DAPHNIA PHENOTYPES: A HISTORY OF INDUSTRIAL POLLUTION AND PELAGIC ECOSYSTEM RESPONSE. <i>Ecology</i> , 2005 , 86, 1669-1678	4.6	21
599	Predicting biodiversity change: outside the climate envelope, beyond the species-area curve. <i>Ecology</i> , 2006 , 87, 1896-906	4.6	135
598	Climate change effects on plant disease: genomes to ecosystems. 2006 , 44, 489-509		594
597	Limits to the Adaptive Potential of Small Populations. 2006 , 37, 433-458		565
596	Empirical Analyses of Plant-Climate Relationships for the Western United States. 2006 , 167, 1123-1150		334
595	Ecotypic variation in the context of global climate change: revisiting the rules. 2006 , 9, 853-69		401
594	Plant-plant interactions and environmental change. 2006 , 171, 271-84		348
593	Predicting woodrat (<i>Neotoma</i>) responses to anthropogenic warming from studies of the palaeomidden record. 2006 , 33, 2061-2076		44

592	Natural selection and climate change: temperature-linked spatial and temporal trends in gene frequency in <i>Fagus sylvatica</i> . 2006 , 15, 3469-80	212
591	Integrating multiple modelling approaches to predict the potential impacts of climate change on species distributions in contrasting regions: comparison and implications for policy. 2006 , 9, 129-147	56
590	Variation in the sensitivity of organismal body temperature to climate change over local and geographic scales. 2006 , 103, 9560-5	124
589	Novel climates, no-analog communities, and ecological surprises. 2007 , 5, 475-482	1063
588	Impacts of Day Versus Night Temperatures on Spring Wheat Yields:A Comparison of Empirical and CERES Model Predictions in Three Locations. 2007 , 99, 469-477	121
