

CITATION REPORT

List of articles citing

Protein folding: defining a "standard" set of experimental conditions and a preliminary kinetic data set of two-state proteins

DOI: 10.1110/ps.041205405
Protein Science, 2005, 14, 602-16.

Version: 2024-04-26

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
200	Antagonism, non-native interactions and non-two-state folding in S6 revealed by double-mutant cycle analysis. <i>Protein Engineering, Design and Selection</i> , 2005 , 18, 547-57	1.9	7
199	Experimental investigation of the frequency and substitution dependence of negative phi-values in two-state proteins. <i>Biochemistry</i> , 2005 , 44, 12160-7	3.2	16
198	Mechanically unfolding the small, topologically simple protein L. <i>Biophysical Journal</i> , 2005 , 89, 506-19	2.9	139
197	Characterization of the hydrodynamic properties of the folding transition state of an SH3 domain by magnetization transfer NMR spectroscopy. <i>Biochemistry</i> , 2006 , 45, 6434-45	3.2	6
196	Designability and cooperative folding in a four-letter hydrophobic-polar model of proteins. <i>Physical Review E</i> , 2006 , 74, 051918	2.4	1
195	On the precision of experimentally determined protein folding rates and phi-values. <i>Protein Science</i> , 2006 , 15, 553-63	6.3	39
194	Characterizing the protein folding transition state using psi analysis. 2006 , 106, 1862-76		49
193	A statistical method for predicting protein unfolding rates from amino acid sequence. 2006 , 46, 1503-8		23
192	Prediction of folding rates of small proteins: empirical relations based on length, secondary structure content, residue type, and stability. <i>Biochemistry</i> , 2006 , 45, 3805-12	3.2	21
191	An isolated helix persists in a sparsely populated form of KIX under native conditions. <i>Biochemistry</i> , 2006 , 45, 8885-93	3.2	27
190	Contribution of structural peculiarities of onconase to its high stability and folding kinetics. <i>Biochemistry</i> , 2006 , 45, 3580-7	3.2	37
189	Small proteins fold through transition states with native-like topologies. <i>Journal of Molecular Biology</i> , 2006 , 361, 755-70	6.5	32
188	Criteria for downhill protein folding: calorimetry, chevron plot, kinetic relaxation, and single-molecule radius of gyration in chain models with subdued degrees of cooperativity. <i>Proteins: Structure, Function and Bioinformatics</i> , 2006 , 65, 373-91	4.2	63
187	Transition state of a SH3 domain detected with principle component analysis and a charge-neutralized all-atom protein model. <i>Proteins: Structure, Function and Bioinformatics</i> , 2006 , 64, 883-94	4.2	9
186	Exploring the relationship between funneled energy landscapes and two-state protein folding. <i>Proteins: Structure, Function and Bioinformatics</i> , 2006 , 65, 153-63	4.2	7
185	Direct correlation between proteins' folding rates and their amino acid compositions: an ab initio folding rate prediction. <i>Proteins: Structure, Function and Bioinformatics</i> , 2006 , 65, 362-72	4.2	39
184	Elucidation of conserved long-range interaction networks in proteins and their significance in determining protein topology. 2006 , 368, 595-606		14
