

CITATION REPORT

List of articles citing

Identification for Control: From the Early Achievements to the Revival of Experiment Design*

DOI: 10.3166/ejc.11.335-352

European Journal of Control, 2005, 11, 335-352.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
219	Evaluation and comparison of robust optimal experiment design criteria. 2006,		6
218	A personal view of the development of system identification: A 30-year journey through an exciting field. 2006, 26, 93-105		69
217	Model-Based ProportionalIntegral/ProportionalIntegralDerivative (PI/PID) Autotuning with Fast Relay Identification. 2006, 45, 4052-4062		12
216	Model Free Subspace H Control for an Autonomous Catamaran.		1
215	Experiment design for ratio estimates. 2006,		
214	Experiment Design for Structured Nonlinear System Identification. 2007,		
213	On the parameterisation of simple process models for the autotuning of industrial regulators. 2007		7
212	HISTORICAL, GENERIC AND CURRENT CHALLENGES OF ADAPTIVE CONTROL. 2007, 40, 1-12		2
211	HISTORICAL, GENERIC AND CURRENT CHALLENGES OF ADAPTIVE CONTROL. 2007, 40, 1-12		2
210	High-Purity Distillation. 2007, 27, 72-89		39
209	Experiment design for identification of nonlinear gray-box models with application to industrial robots. 2007,		5
208	Robust optimal experiment design for system identification. 2007, 43, 993-1008		142
207	D-optimal design of a monitoring network for parameter estimation of distributed systems. 2007, 39, 291-322		61
206	Challenges of adaptive controlpast, permanent and future. 2008, 32, 123-135		87
205	Optimal experimental design and some related control problems. 2008, 44, 303-325		155
204	On the equivalence of least costly and traditional experiment design for control. 2008, 44, 2706-2715		30
203	Model-robust Design of Experiments for sequential identification of ODE parameters. 2008,		

202	Model selection approaches for non-linear system identification: a review. 2008 , 39, 925-946	147
201	On useful redundancy in experiment design for nonlinear system identification. 2008 ,	1
200	Virtual closed loop identification: A generalized tool for identification in closed loop. 2008 ,	1
199	Optimal input design for online identification: a coupled observer-MPC approach. 2008 , 41, 11457-11462	1
198	On the Robust Dynamics Identification of Parallel Manipulators: Methodology and Experiments. 2008 ,	1
197	Verifying nonlinear controllers for stability utilizing closed-loop noisy data. 2009 ,	1
196	The PI+p controller structure and its tuning. 2009 , 19, 1451-1457	4
195	System Identification of Complex and Structured Systems. <i>European Journal of Control</i> , 2009 , 15, 275-310.5	98
194	Reduciendo distancias entre el control borroso y el control no lineal: luces y sombras. 2009 , 6, 26-35	5
193	Refined Instrumental Variable methods for closed-loop system identification. 2009 , 42, 284-289	7
192	Implementation of Input Design for Structured Nonlinear System Identification via Linear IMC Control. 2009 , 42, 168-173	2
191	A Scenario Based Approach to Robust Experiment Design. 2009 , 42, 186-191	12
190	Modeling and Control of a Nonlinear Dynamic Adaptive Optics System. 2010 , 43, 299-305	
189	Perspectives on system identification. 2010 , 34, 1-12	326
188	PI/PID autotuning with contextual model parametrisation. 2010 , 20, 452-463	21
187	Input design for structured nonlinear system identification. 2010 , 46, 990-998	23
186	Sensor network scheduling for identification of spatially distributed processes. 2010 ,	2
185	Experimental identification of the dynamics model for 6-DOF parallel manipulators. 2010 , 28, 359-368	8

184	. 2010,		4
183	Robust cautious data driven control with guaranteed mean square stability. 2010,		1
182	On the use of models with delay in PI(D) autotuning. 2010,		1
181	Convex formulations for data-based uncertainty minimization of linear uncertainty models. 2010,		2
180	Sensor network design for the estimation of spatially distributed processes. 2010, 20, 459-481		41
179	On control-specific derivation of affine Takagi-Sugeno models from physical models: Assessment criteria and modeling procedure. 2011,		6
178	Controller Design for a High-Sampling-Rate Closed-Loop Adaptive Optics System with Piezo-Driven Deformable Mirror. <i>European Journal of Control</i> , 2011, 17, 290-301	2.5	15
177	Optimal Plant Friendly Input Design for System Identification. 2011, 50, 13045-13055		5
