

Strategies of Natural Killer Cell Recognition and Signaling

Current Topics in Microbiology and Immunology

298, 1-21

DOI: [10.1007/3-540-27743-9_1](https://doi.org/10.1007/3-540-27743-9_1)

Citation Report

#	ARTICLE	IF	CITATIONS
2	An improved RT-PCR method for the detection of killer-cell immunoglobulin-like receptor (KIR) transcripts. <i>Immunogenetics</i> , 2006, 58, 865-872.	1.2	12
3	What is natural in natural killer cells?. <i>Immunology Letters</i> , 2006, 107, 1-7.	1.1	49
4	Expression and role of phosphatidylcholine-specific phospholipase C in human NK and T lymphocyte subsets. <i>European Journal of Immunology</i> , 2006, 36, 3277-3287.	1.6	30
5	Defective Adhesion in Tumor Infiltrating CD8+ T Cells. <i>Journal of Immunology</i> , 2006, 176, 6103-6111.	0.4	32
6	Cross-Species Dependence of Ly49 Recognition on the Supertype Defining B-Pocket of a Class I MHC Molecule. <i>Journal of Immunology</i> , 2006, 177, 8578-8586.	0.4	7
7	Mast Cells and Basophils Are Selectively Activated In Vitro and In Vivo through CD200R3 in an IgE-Independent Manner. <i>Journal of Immunology</i> , 2007, 179, 7093-7100.	0.4	101
8	Identification, activation, and selective in vivo ablation of mouse NK cells via NKp46. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2007, 104, 3384-3389.	3.3	413
9	Distinctive Interactions at Multiple Site 2 Subsites by Allele-Specific Rat and Mouse Ly49 Determine Functional Binding and Class I MHC Specificity. <i>Journal of Immunology</i> , 2007, 179, 6856-6866.	0.4	4
10	Inappropriate Recruitment and Activity by the Src Homology Region 2 Domain-Containing Phosphatase 1 (SHP1) Is Responsible for Receptor Dominance in the SHIP-Deficient NK Cell. <i>Journal of Immunology</i> , 2007, 179, 8009-8015.	0.4	43
11	Mature natural killer cell and lymphoid tissueâ€“inducing cell development requires Id2-mediated suppression of E protein activity. <i>Journal of Experimental Medicine</i> , 2007, 204, 1119-1130.	4.2	331
12	Natural killer cell alterations correlate with loss of renal function and dialysis duration in uraemic patients. <i>Nephrology Dialysis Transplantation</i> , 2007, 23, 1406-1414.	0.4	49
13	Distinctive NK-cell receptor repertoires sustain high-level constitutive NK-cell activation in HIV-exposed uninfected individuals. <i>Blood</i> , 2007, 109, 4296-4305.	0.6	140
14	<i>Mycobacterium tuberculosis</i> -Induced Gamma Interferon Production by Natural Killer Cells Requires Cross Talk with Antigen-Presenting Cells Involving Toll-Like Receptors 2 and 4 and the Mannose Receptor in Tuberculous Pleurisy. <i>Infection and Immunity</i> , 2007, 75, 5325-5337.	1.0	49
15	CD160-activating NK cell effector functions depend on the phosphatidylinositol 3-kinase recruitment. <i>International Immunology</i> , 2007, 19, 401-409.	1.8	42
16	Generation of monoclonal antibodies to coelomocytes of the purple sea urchin <i>Arbacia punctulata</i> : Characterization and phenotyping. <i>Developmental and Comparative Immunology</i> , 2007, 31, 465-475.	1.0	11
17	Mechanisms linking tumor cell-associated procoagulant function to tumor metastasis. <i>Thrombosis Research</i> , 2007, 120, S22-S28.	0.8	46
18	A subgroup of Tourette's patients overexpress specific natural killer cell genes in blood: A preliminary report. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2007, 144B, 958-963.	1.1	37
19	Functional role of phosphatidylcholine-specific phospholipase C in regulating CD16 membrane expression in natural killer cells. <i>European Journal of Immunology</i> , 2007, 37, 2912-2922.	1.6	41
