

A manifesto for the equifinality thesis

Journal of Hydrology

320, 18-36

DOI: [10.1016/j.jhydrol.2005.07.007](https://doi.org/10.1016/j.jhydrol.2005.07.007)

Citation Report

#	ARTICLE	IF	CITATIONS
20	Quantifying hydrological modeling errors through a mixture of normal distributions. <i>Journal of Hydrology</i> , 2007, 332, 303-315.	2.3	94
21	Uncertainties in annual riverine phosphorus load estimation: Impact of load estimation methodology, sampling frequency, baseflow index and catchment population density. <i>Journal of Hydrology</i> , 2007, 332, 241-258.	2.3	268
22	Multi-period and multi-criteria model conditioning to reduce prediction uncertainty in an application of TOPMODEL within the GLUE framework. <i>Journal of Hydrology</i> , 2007, 332, 316-336.	2.3	147
23	Grasping the unavoidable subjectivity in calibration of flood inundation models: A vulnerability weighted approach. <i>Journal of Hydrology</i> , 2007, 333, 275-287.	2.3	96
24	Comparative assessment of six automatic optimization techniques for calibration of a conceptual rainfall-runoff model. <i>Hydrological Sciences Journal</i> , 2007, 52, 432-449.	1.2	35
25	Multi-objective performance comparison of an artificial neural network and a conceptual rainfall-runoff model. <i>Hydrological Sciences Journal</i> , 2007, 52, 397-413.	1.2	63
26	Developing a Translational Discourse to Communicate Uncertainty in Flood Risk between Science and the Practitioner. <i>Ambio</i> , 2007, 36, 692-704.	2.8	103
27	Consideration of measurement uncertainty in the evaluation of goodness-of-fit in hydrologic and water quality modeling. <i>Journal of Hydrology</i> , 2007, 337, 326-336.	2.3	232
28	Comment on "Hydrological forecasting uncertainty assessment: Incoherence of the GLUE methodology" by Pietro Mantovan and Ezio Todini. <i>Journal of Hydrology</i> , 2007, 338, 315-318.	2.3	86
29	Deriving distributed roughness values from satellite radar data for flood inundation modelling. <i>Journal of Hydrology</i> , 2007, 344, 96-111.	2.3	125
30	Flow, mixing, and displacement in using a data-based hydrochemical model to predict conservative tracer data. <i>Water Resources Research</i> , 2007, 43, .	1.7	37
31	Development of a possibilistic method for the evaluation of predictive uncertainty in rainfall-runoff modeling. <i>Water Resources Research</i> , 2007, 43, .	1.7	29
32	Calibration of hydrological models in the spectral domain: An opportunity for scarcely gauged basins?. <i>Water Resources Research</i> , 2007, 43, .	1.7	88
33	Uncertainty assessment in watershed-scale water quality modeling and management: 1. Framework and application of generalized likelihood uncertainty estimation (GLUE) approach. <i>Water Resources Research</i> , 2007, 43, .	1.7	26
34	Uncertainty assessment in watershed-scale water quality modeling and management: 2. Management objectives constrained analysis of uncertainty (MOCAU). <i>Water Resources Research</i> , 2007, 43, .	1.7	9
35	Parameter interdependence and uncertainty induced by lumping in a hydrologic model. <i>Water Resources Research</i> , 2007, 43, .	1.7	23
36	A framework for classifying and comparing distributed hillslope and catchment hydrologic models. <i>Water Resources Research</i> , 2007, 43, .	1.7	130
37	Moving beyond heterogeneity and process complexity: A new vision for watershed hydrology. <i>Water Resources Research</i> , 2007, 43, .	1.7	613
