

CITATION REPORT

List of articles citing

The diagnosis of manganese-induced parkinsonism

DOI: 10.1016/j.neuro.2005.10.006
NeuroToxicology, 2006, 27, 340-6.

Version: 2024-04-10

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
196	Manganese-induced Parkinsonism associated with methcathinone (Ephedrone) abuse. 2007 , 64, 886-9		87
195	Manganese and welding fume exposure and control in construction. 2007 , 4, 943-51		35
194	Brain manganese accumulation is inversely related to gamma-amino butyric acid uptake in male and female rats. <i>Toxicological Sciences</i> , 2007 , 95, 188-95	4.4	38
193	Manganese: a unique neuroimaging contrast agent. 2007 , 2, 297-305		15
192	High prevalence of Parkinsonian disorders associated to manganese exposure in the vicinities of ferroalloy industries. 2007 , 50, 788-800		131
191	Manganese: recent advances in understanding its transport and neurotoxicity. 2007 , 221, 131-47		461
190	The neurotoxic effects of manganese on the dopaminergic innervation of the gill of the bivalve mollusc, <i>Crassostrea virginica</i> . 2008 , 148, 152-9		17
189	Impairment of nigrostriatal dopamine neurotransmission by manganese is mediated by pre-synaptic mechanism(s): implications to manganese-induced parkinsonism. 2008 , 107, 1236-47		121
188	Cerebrospinal fluid to brain transport of manganese in a non-human primate revealed by MRI. 2008 , 1198, 160-70		64
187	Manganese neurotoxicity: lessons learned from longitudinal studies in nonhuman primates. 2009 , 117, 325-32		128
186	SMF-1, SMF-2 and SMF-3 DMT1 orthologues regulate and are regulated differentially by manganese levels in <i>C. elegans</i> . <i>PLoS ONE</i> , 2009 , 4, e7792	3.7	73
185	Age-dependent susceptibility to manganese-induced neurological dysfunction. <i>Toxicological Sciences</i> , 2009 , 112, 394-404	4.4	65
184	Neurological risks associated with manganese exposure from welding operations--a literature review. 2009 , 212, 459-69		79
183	Implications of metal exposure and liver function in Parkinsonian patients resident in the vicinities of ferroalloy plants. 2009 , 116, 1281-7		32
182	Manganese and its role in Parkinson's disease: from transport to neuropathology. 2009 , 11, 252-66		213
181	Are there common biochemical and molecular mechanisms controlling manganese and parkinsonism. 2009 , 11, 281-96		75
180	Toxic Movement Disorders: The Approach to the Patient with a Movement Disorder of Toxic Origin. 2009 , 115-130		1

179	Microglia enhance manganese chloride-induced dopaminergic neurodegeneration: role of free radical generation. 2009 , 217, 219-30		50
178	Manganese exposure among smelting workers: relationship between blood manganese-iron ratio and early onset neurobehavioral alterations. <i>NeuroToxicology</i> , 2009 , 30, 1214-22	4.4	59
177	Estimating the prevalence of clinical manganism using a cascaded screening process in a South African manganese smelter. <i>NeuroToxicology</i> , 2009 , 30, 934-40	4.4	11
176	Manganese-induced dopaminergic neurodegeneration: insights into mechanisms and genetics shared with Parkinson's disease. 2009 , 109, 4862-84		98
175	Neurotoxicity following chronic intravenous use of "Russian cocktail". 2009 , 47, 157-60		39
174	Analysis of settled dust with X-ray Fluorescence for exposure assessment of metals in the province of Brescia, Italy. 2009 , 11, 1579-85		27
173	Effects of p-Aminosalicylic acid on the neurotoxicity of manganese on the dopaminergic innervation of the cilia of the lateral cells of the gill of the bivalve mollusc, <i>Crassostrea virginica</i> . 2010 , 151, 264-70		18
172	Synergistic dopaminergic neurotoxicity of manganese and lipopolysaccharide: differential involvement of microglia and astroglia. 2010 , 112, 434-43		62
171	Manganese in children with attention-deficit/hyperactivity disorder: relationship with methylphenidate exposure. 2010 , 20, 113-8		43
170	Extracellular dopamine potentiates mn-induced oxidative stress, lifespan reduction, and dopaminergic neurodegeneration in a BLI-3-dependent manner in <i>Caenorhabditis elegans</i> . 2010 , 6, e1001084		141
169	L-DOPA treatment reverses the motor alterations induced by manganese exposure as a Parkinson disease experimental model. 2010 , 471, 79-82		18
168	Manganese exposure inhibits the clearance of extracellular GABA and influences taurine homeostasis in the striatum of developing rats. <i>NeuroToxicology</i> , 2010 , 31, 639-46	4.4	29
167	Mn ²⁺ complexes of 1-oxa-4,7-diazacyclononane based ligands with acetic, phosphonic and phosphinic acid pendant arms: stability and relaxation studies. <i>Dalton Transactions</i> , 2011 , 40, 10131-46	4.3	36
166	Physiologically based pharmacokinetic modeling of fetal and neonatal manganese exposure in humans: describing manganese homeostasis during development. <i>Toxicological Sciences</i> , 2011 , 122, 297-316	4.4	80
165	Mn ²⁺ complexes with 12-membered pyridine based macrocycles bearing carboxylate or phosphonate pendant arm: crystallographic, thermodynamic, kinetic, redox, and ¹ H/ ¹⁷ O relaxation studies. <i>Inorganic Chemistry</i> , 2011 , 50, 12785-801	5.1	62
164	Heavy metal chelation in neurotoxic exposures. 2011 , 29, 607-22		19
163	Millimolar Mn ²⁺ influences agonist binding to 5-HT _{1A} receptors by inhibiting guanosine nucleotide binding to receptor-coupled G-proteins. <i>NeuroToxicology</i> , 2011 , 32, 25-30	4.4	5
