Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
150	Seasonal singing patterns and individual consistency in song activity in female European starlings (<i>Sturnus vulgaris</i>). <i>Behaviour</i> , 2007 , 144, 663-680	1.4	22
149	Sexual selection in males and females. 2007 , 318, 1882-5		600
148	Parental Effort in Relation to Structural Plumage Coloration in the Mountain Bluebird (<i>Sialia currucoides</i>). <i>Ethology</i> , 2007 , 113, 838-846	1.7	20
147	Pigment allocation to eggs decreases plasma antioxidants in a songbird. 2008 , 63, 227-233		53
146	Female ornamentation and territorial conflicts in collared flycatchers (<i>Ficedula albicollis</i>). 2008 , 95, 993-6		44
145	Female coloration indicates female reproductive capacity in blue tits. <i>Journal of Evolutionary Biology</i> , 2008 , 21, 226-233	2.3	96
144	No fecundity cost of female secondary sexual trait expression in the horned beetle <i>Onthophagus sagittarius</i> . <i>Journal of Evolutionary Biology</i> , 2008 , 21, 1227-35	2.3	32
143	Contrasting sexual selection on males and females in a role-reversed swarming dance fly, <i>Rhamphomyia longicauda</i> Loew (Diptera: Empididae). <i>Journal of Evolutionary Biology</i> , 2008 , 21, 1683-91	2.3	31
142	Sexual selection on aggressiveness in females: evidence from an experimental test with tree swallows. <i>Animal Behaviour</i> , 2008 , 75, 1603-1610	2.8	98
141	The ecological basis of unusual sex roles in reverse-dichromatic eclectus parrots. <i>Animal Behaviour</i> , 2008 , 76, 97-103	2.8	18
140	Sex-Role Reversal in Song? Females Sing More Frequently Than Males in the Streak-Backed Oriole ¿Inversión del Rol Sexual del Canto? Hembras Cantan con Mayor Frecuencia que Machos en <i>Icterus pustulatus</i> Short Communications Short Communications. 2008 , 110, 387-392		33
139	LACK OF ASSORTATIVE MATING FOR TAIL, BODY SIZE, OR CONDITION IN THE ELABORATE MONOMORPHIC TURQUOISE-BROWED MOTMOT (<i>EUMOMOTA SUPERCILIOSA</i>). <i>Auk</i> , 2008 , 125, 11-19	2.1	19
138	Female ornamentation and directional male mate preference in the rock sparrow. <i>Behavioral Ecology</i> , 2009 , 20, 1072-1078	2.3	53
137	Carotenoid-based status signaling by females in the tropical streak-backed oriole. <i>Behavioral Ecology</i> , 2009 , 20, 1000-1006	2.3	64
136	A female songbird out-sings male conspecifics during simulated territorial intrusions. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2009 , 276, 981-6	4.4	60
135	Sexual selection in females. <i>Animal Behaviour</i> , 2009 , 77, 3-11	2.8	493
134	Serial monogamy as polygyny or polyandry? : marriage in the tanzanian pimbwe. 2009 , 20, 130-50		54
