

CITATION REPORT

List of articles citing

Haematopoietic stem cells and endothelial progenitor cells in healthy men: effect of aging and training

DOI: 10.1111/j.1474-9726.2006.00242.x
Aging Cell, 2006, 5, 495-503.

Source: <https://exaly.com/paper-pdf/40377445/citation-report.pdf>

Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
128	The increase of circulating endothelial progenitor cells after acute ischemic stroke is associated with good outcome. 2007 , 38, 2759-64		184
127	Progenitor cells and age: can we fight aging with exercise?. <i>Journal of Applied Physiology</i> , 2007 , 102, 834-57	3.7	8
126	Human stem cells, chromatin, and tissue engineering: boosting relevancy in developmental toxicity testing. 2007 , 81, 20-40		3
125	Endothelial precursor cells. 2007 , 3, 218-25		10
124	Achieving the ideal properties for vascular bypass grafts using a tissue engineered approach: a review. 2007 , 45, 327-36		111
123	Cardiac cell therapy: a realistic concept for elderly patients?. 2008 , 43, 679-690		13
122	Habitual exercise and arterial aging. <i>Journal of Applied Physiology</i> , 2008 , 105, 1323-32	3.7	253
121	Circulating endothelial cell number and viability are reduced by exposure to high altitude. 2008 , 15, 53-8		11
120	Decreased vascular repair and neovascularization with ageing: mechanisms and clinical relevance with an emphasis on hypoxia-inducible factor-1. 2008 , 8, 754-67		60
119	The impact of aging on kidney repair. 2008 , 294, F1265-72		118
118	A maximal exercise bout increases the number of circulating CD34+/KDR+ endothelial progenitor cells in healthy subjects. Relation with lipid profile. <i>Journal of Applied Physiology</i> , 2008 , 104, 1006-13	3.7	97
117	The role of endothelial progenitor and cardiac stem cells in the cardiovascular adaptations to age and exercise. 2009 , 14, 4685-702		27
116	A history of medical reports on the Boston Marathon: 112 years and still running. 2009 , 41, 1341-8		9
115	Effects of acute and chronic endurance exercise on intracellular nitric oxide in putative endothelial progenitor cells: role of NADPH oxidase. 2009 , 297, H1798-805		36
114	Endothelial function and endothelial progenitors: possible mediators of the benefits from physical exercise?. 2009 , 16, 401-3		3
113	Endothelial progenitor cells: implications for cardiovascular disease. 2009 , 75, 25-37		48
112	Endothelial progenitor cells in adolescents: impact of overweight, age, smoking, sport and cytokines in younger age. 2009 , 98, 179-88		36

111	Effects of aging on hematopoietic stem and progenitor cells. 2009 , 21, 408-13		57
110	Age-dependent mobilization of circulating endothelial progenitor cells in infants and young children undergoing cardiac surgery with cardiopulmonary bypass. 2009 , 47, 206-13		5
109	Circulating endothelial progenitor cell levels are higher during childhood than in adult life. 2009 , 202, 345-7		47
108	Circulating endothelial progenitor cell numbers are not associated with donor organ age or allograft vasculopathy in cardiac transplant recipients. 2009 , 202, 612-6		9
107	A history of medical reports on the Boston Marathon: 112 years and still running. 2009 , 41, 257-64		3
106	Transplantation of endothelial progenitor cells as therapeutics for cardiovascular diseases. 2009 , 18, 1003-12		45
105	Relationship between circulating progenitor cells, vascular function and oxidative stress with long-term training and short-term detraining in older men. 2010 , 118, 303-11		39
104	Exercise training improves function of circulating angiogenic cells in patients with chronic heart failure. 2010 , 105, 665-76		88
103	Stem cells for heart failure in the aging heart. 2010 , 15, 447-56		19
102	Adipose tissue-derived progenitor cells and cancer. 2010 , 2, 103-13		74
101	Mechanisms of vascular aging: new perspectives. 2010 , 65, 1028-41		358
100	Decline of bone marrow-derived hematopoietic progenitor cell quality during aging in the rat. 2010 , 36, 359-70		15
99	Clinical implication of endothelial progenitor cells. 2010 , 10, 89-105		7
98	Thrombin and exercise similarly influence expression of cell cycle genes in cultured putative endothelial progenitor cells. <i>Journal of Applied Physiology</i> , 2010 , 108, 1682-90	3-7	15
