

CITATION REPORT

List of articles citing

Temperature sensitivity of soil carbon decomposition and feedbacks to climate change

DOI: 10.1038/nature04514
Nature, 2006, 440, 165-73.

Version: 2024-04-25

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 80 Flooding duration affects the temperature sensitivity of soil extracellular enzyme activities in a lakeshore wetland in Poyang Lake, China. **2023**, 874, 162397 ○
- 79 Residence time of carbon in paddy soils. **2023**, 400, 136707 ○
- 78 Management options influence seasonal CO₂ soil emissions in Mediterranean olive ecosystems. **2023**, 146, 126815 ○
- 77 Impacts of land use conversions on soil organic carbon in a warming-induced agricultural frontier in Northern Ontario, Canada under historical and future climate. **2023**, 404, 136902 ○
- 76 Terrestrial CO₂ exchange diagnosis using a peatland-optimized vegetation photosynthesis and respiration model (VPRM) for the Hudson Bay Lowlands. **2023**, 875, 162591 ○
- 75 Stable oxic-anoxic transitional interface is beneficial to retard soil carbon loss in drained peatland. **2023**, 181, 109024 ○
- 74 Effects of conversion of coastal marshes to aquaculture ponds on sediment anaerobic CO₂ production and emission in a subtropical estuary of China. **2023**, 338, 117813 ○
- 73 An evaluation of topsoil carbon storage in Chinese deserts. **2023**, 872, 162284 ○
- 72 Factors of soil CO₂ emission in boreal forests: evidence from Central Siberia. **2023**, 16, 86-94 ○
- 71 Large scale spatial assessment, modelling and identification of drivers of soil respiration in the Western Himalayan temperate forest. **2023**, 146, 109927 ○
- 70 Soil organic carbon accumulation along a chronosequence of vegetation colonization on debris flow fans in Southwest China. **2023**, 223, 106936 ○
- 69 Temporal and spatial dynamics distribution of organic carbon content of surface soil in coastal wetlands of Yancheng, China from 2000 to 2022 based on Landsat images. **2023**, 223, 106961 ○
- 68 Mineral protection controls soil organic carbon stability in permafrost wetlands. **2023**, 869, 161864 ○
- 67 Partitioning of root, litter and microbial respiration by plant input manipulation in forests. **2023**, 18, 024043 ○
- 66 Sediment organic carbon dynamics response to land use change in diverse watershed anthropogenic activities. **2023**, 172, 107788 ○

- 65 Spatial distribution and driving factors of sediment net nitrogen mineralization in riparian zone of the Three Gorges Reservoir. **2023**, 20, 381-390
- 64 Microbial properties control soil priming and exogenous carbon incorporation along an elevation gradient. **2023**, 431, 116343
- 63 The temperature dependence of microbial community respiration is amplified by changes in species interactions. **2023**, 8, 272-283
- 62 Microbial necromass in cropland soils: A global meta-analysis of management effects. **2023**, 29, 1998-2014
- 61 Soil organic carbon stocks by soil group for afforested soils in Ireland. **2023**, 32, e00615
- 60 Lower Sensitivity of Soil Carbon and Nitrogen to Regional Temperature Change in Karst Forests Than in Non-Karst Forests. **2023**, 14, 355
- 59 CO₂ capture and conversion to syngas via dry reforming of C₃H₈ over a Pt/ZrO₂/TaO catalyst. **2023**, 13, 1650-1665
- 58 Temperature sensitivity of soil organic carbon respiration along a forested elevation gradient in the Rwenzori Mountains, Uganda. **2023**, 20, 719-735
- 57 Multiple factors co-limit short-term in situ soil carbon dioxide emissions. **2023**, 18, e0279839
- 56 Long-term soil warming decreases microbial phosphorus utilization by increasing abiotic phosphorus sorption and phosphorus losses. **2023**, 14,
- 55 Introducing the soil mineral carbon pump. **2023**, 4, 135-136
- 54 Copper Bioavailability and Leaching in Conventional and Organic Viticulture under Environmental Stress. **2023**, 13, 2595
- 53 Comparing Random Forest to Bayesian Networks as nitrogen management decision support systems.
- 52 Chronic Warming and Nitrogen-Addition Alter Soil Organic Matter Molecular Composition Distinctly in Tandem Compared to Individual Stressors. **2023**, 7, 609-622
- 51 Examining soil organic carbon in the mountainous peat swamps of the Zoig*Plateau in China's Qinghai-Tibet Plateau. **2023**, 39, 757-770
- 50 Initial responses of soil chemical properties to simulated warming in Norway spruce (*Picea abies* (L.) H.Karst.) stands in the Western Carpathians. **2023**, 432, 116400
- 49 A northward range shift of sugar maple (*Acer saccharum*) in Eastern Canada should reduce soil carbon storage, with no effect on carbon stability. **2023**, 432, 116403
- 48 Quantifying thermal adaptation of soil microbial respiration.

- 47 Distinct Growth Responses of Tundra Soil Bacteria to Short-Term and Long-Term Warming. **2023**, 89, ○
- 46 Deadwood Biodiversity. **2023**, 167-189 ○
- 45 Temperature sensitivity of oxygen demand varies as a function of organic matter source. 10, ○
- 44 Evaluation of the intrinsic temperature sensitivity of ecosystem respiration in typical ecosystems of an endorheic river basin. **2023**, 333, 109393 ○
- 43 Priming effects induced by degradable microplastics in agricultural soils. **2023**, 180, 109006 ○
- 42 Estimation of global karst carbon sink from 1950s to 2050s using response surface methodology. 1-18 ○
- 41 Five-years of warming did not change the soil organic carbon stock but altered its chemical composition in an alpine peatland. **2023**, ○
- 40 Functional variability in specific root respiration translates to autotrophic differences in soil respiration in a temperate deciduous forest. **2023**, 432, 116414 ○
- 39 Impact of Biochar as a Soil Conditioner to Improve the Soil Properties of Saline Soil and Productivity of Tomato. **2023**, 15, 4832 ○
- 38 High Dissolved Carbon Concentration in Arid Rocky Mountain Streams. **2023**, 57, 4656-4667 ○
- 37 The impact of agricultural management on soil aggregation and carbon storage is regulated by climatic thresholds across a 3000 km European gradient. ○
- 36 Estimation of Carbon Stocks and Stabilization Rates of Organic Matter in Soils of the «Ladoga» Carbon Monitoring Site. **2023**, 13, 807 ○
- 35 Wetting-induced soil CO₂ emission pulses are driven by interactions among soil temperature, carbon, and nitrogen limitation in the Colorado Desert. ○
- 34 Ecological Stoichiometry of Soil Carbon, Nitrogen and Phosphorus in Reclaimed Farmland in Coal Mining Subsidence Area. ○
- 33 Integrating climate change into projections of soil carbon sequestration from regenerative agriculture. **2023**, 2, e0000130 1
- 32 Root functional traits determine the magnitude of the rhizosphere priming effect among eight tree species. ○
- 31 The Quantified and Major Influencing Factors on Spatial Distribution of Soil Organic Matter in Provincial-Scale Farmland: A Case Study of Shandong Province in Eastern China. **2023**, 13, 3738 ○
- 30 Bibliography. **2023**, 571-652 ○

- 29 Soil microbial communities regulate the threshold effect of salinity stress on SOM decomposition in coastal salt marshes. **2023**, 0
- 28 Microbial response to warming and cellulose addition in a maritime Antarctic soil. 0
- 27 Potential of the retention capability of a Neotropical reservoir (Sõ Paulo State, Brazil). 35, 0
- 26 Soil texture and microorganisms dominantly determine the subsoil carbonate content in the permafrost-affected area of the Tibetan Plateau. 14, 0
- 25 Response of macrophyte litter decomposition in global blue carbon ecosystems to climate change. 1
