

CITATION REPORT

List of articles citing

Evaluation methods and development of a new glare prediction model for daylight environments with the use of CCD cameras

DOI: 10.1016/j.enbuild.2006.03.017
Energy and Buildings, 2006, 38, 743-757.

Version: 2024-04-26

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

21	A Study on the Optimization of Atrium Daylight and Energy Performance through Skylight and Shading Design in Commercial Buildings in Cold Zones. 2023 , 13, 228	○

- 20 Test and analysis of glare effect of incoherent directional beam. **2023**, ○
- 19 ESTIMATION OF VISUAL CHARACTERISTIC VALUES BASED ON BCD LUMINANCE ESTIMATION METHODS REFLECTING OPTICAL CHARACTERISTICS. **2023**, 88, 148-153 ○
- 18 Simulation of daylight availability, visual comfort and view clarity for a novel window system with switchable blinds in classrooms. **2023**, 235, 110243 ○
- 17 Daylighting performance and discomfort glare assessment of granular aerogel glazing system: A full-scale comparative experiment. **2023**, 236, 110297 ○
- 16 Designerly approach to skylight configuration based on daylight performance; toward a novel optimization process. **2023**, 286, 112970 ○
- 15 Field validation of isotropic analytical models for simulating fabric shades. **2023**, 236, 110223 ○
- 14 Enhancing visual comfort with Miura-ori-based responsive facade model. **2023**, 69, 106241 ○
- 13 Daylighting performance assessment of traditional skywell dwellings: A case study in Fujian, China. **2023**, 68, 106028 ○
- 12 A study of daylight glare evaluation with prism daylighting redirecting fenestrations. **2023**, 71, 106428 ○
- 11 Optimal design of inhomogeneous semi-transparent photovoltaic windows based on daylight performance and visual characters. **2023**, 283, 112808 ○
- 10 Lighting and visual comfort performance of commercially available tubular daylight devices. **2023**, 251, 420-437 ○
- 9 A Study of Daylight Glare Evaluation with Prism Daylighting Redirecting Fenestrations. ○
- 8 Stimulus Range Effect in Discomfort Glare Studies. **2022**, 40-46 ○
- 7 A joint validation study on camera-aided illuminance measurement. 147715352311541 ○
- 6 View access index: The effects of geometric variables of window views on occupants's satisfaction. **2023**, 234, 110132 ○
- 5 Deslumbramiento molesto en textiles: métricas basadas en efecto de saturación y/o contraste. **2023**, 75, e484 ○
- 4 Perceived glare from the sun behind tinted glazing: Comparing blue vs. color-neutral tints. **2023**, 234, 110146 ○
- 3 A simulation-based approach for evaluating indoor environmental quality at the early design stage. 1-15 ○

- 2 Research on Light Comfort of Waiting Hall of High-Speed Railway Station in Cold Region Based on Interpretable Machine Learning. **2023**, 13, 1105 ○
- 1 Solving the comfort-retrofit conundrum through post-occupancy evaluation and multi-objective optimisation. 014362442311743 ○
