Version: 2024-04-24

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
259	Integration of Large Deformation Finite Element and Multibody System Algorithms. 2007 , 2, 351-359		12
258	Nonlinear dynamics of three-dimensional belt drives using the finite-element method. <i>Nonlinear Dynamics</i> , 2007 , 48, 449-466	5	68
257	A comparison of finite elements for nonlinear beams: the absolute nodal coordinate and geometrically exact formulations. 2008 , 20, 51-68		76
256	A geometrically exact beam element based on the absolute nodal coordinate formulation. 2008 , 20, 359-384		81
255	An alternative approach for the analysis of nonlinear vibrations of pipes conveying fluid. <i>Journal of Sound and Vibration</i> , 2008 , 310, 493-511	3.9	37
254	On the correct representation of bending and axial deformation in the absolute nodal coordinate formulation with an elastic line approach. <i>Journal of Sound and Vibration</i> , 2008 , 318, 461-487	3.9	111
253	The influence of cable slackening on the stiffness computation of railway overheads. 2008 , 50, 1213-1223		14
252	Finite Element Modeling of a Slewing Non-linear Flexible Beam for Active Vibration Control with Arrays of Sensors and Actuators. 2009 , 20, 1941-1958		10
251	An Efficient Hybrid Method for Multibody Dynamics Simulation Based on Absolute Nodal Coordinate Formulation. 2009 , 4,		57
250	A Detailed Comparison of the Absolute Nodal Coordinate and the Floating Frame of Reference Formulation in Deformable Multibody Systems. 2009 , 4,		24
249	Continuous Collision Detection of Cubic-Spline-Based Tethers in ROV Simulations. 2009 , 131,		3
248	A Corotational Approach for 3D Absolute Nodal Coordinate Elements. 2009 ,		2
247	A continuum mechanics based derivation of Reissner's large-displacement finite-strain beam theory: the case of plane deformations of originally straight Bernoulli-Euler beams. <i>Acta Mechanica</i> , 2009 , 206, 1-21	2.1	74
246	Simulation of a viscoelastic flexible multibody system using absolute nodal coordinate and fractional derivative methods. 2009 , 21, 281-303		30
245	On the integration of computer aided design and analysis using the finite element absolute nodal coordinate formulation. 2009 , 22, 181-197		41
244	Numerical investigation of the slope discontinuities in large deformation finite element formulations. <i>Nonlinear Dynamics</i> , 2009 , 58, 23-37	5	5
243	A rational finite element method based on the absolute nodal coordinate formulation. <i>Nonlinear Dynamics</i> , 2009 , 58, 565-572	5	30

242	Performance of Curved Beam Elements Using the Absolute Nodal Coordinate Formulation. 2009,		1
241	Non-Linear Strain Description for Two-Dimensional Shear Deformable Beam Element Based on the Absolute Nodal Coordinate Formulation. 2009,		
240	Use of General Nonlinear Material Models in Beam Problems: Application to Belt and Rubber Chains. 2009,		
239	ANCF Finite Element/Multibody System Formulation of the Ligament/Bone Insertion Site Constraints. 2010, 5,		8
238	Uniqueness of the Geometric Representation in Large Rotation Finite Element Formulations. 2010, 5,		12
237	Use of General Nonlinear Material Models in Beam Problems: Application to Belts and Rubber Chains. 2010, 5,		16
236	Study of the ligament tension and cross-section deformation using nonlinear finite element/multibody system algorithms. 2010, 23, 227-248		13
235	Simulation of planar flexible multibody systems with clearance and lubricated revolute joints. <i>Nonlinear Dynamics</i> , 2010, 60, 489-511	5	155
234	Integration of B-spline geometry and ANCF finite element analysis. <i>Nonlinear Dynamics</i> , 2010, 61, 193-206		43
233	Integration of absolute nodal elements into multibody system. <i>Nonlinear Dynamics</i> , 2010, 62, 931-943	5	28
232	Gradient Deficient Curved Beam Element Using the Absolute Nodal Coordinate Formulation. 2010, 5,		31
231	Beam Elements with Trapezoidal Cross Section Deformation Modes Based on the Absolute Nodal Coordinate Formulation. 2010,		13
230	Rational Finite Elements and Flexible Body Dynamics. 2010, 132,		19
229	Comparison of Three-Dimensional Flexible Beam Elements for Dynamic Analysis: Classical Finite Element Formulation and Absolute Nodal Coordinate Formulation. 2010, 5,		47
228	A new procedure for the integration of computer aided design and analysis. 2011,		
227	References. 313-320		
226	Integration of Computer Aided Design and Analysis Using the Absolute Nodal Coordinate Formulation. 2011,		2
225	General Method for Modeling Slope Discontinuities and T-Sections Using ANCF Gradient Deficient Finite Elements. 2011, 6,		9

224	Dynamic modeling of mass-flowing linear medium with large amplitude displacement and rotation. 2011 , 27, 1137-1148		34
223	A modeling of sliding joint on one-dimensional flexible medium. 2011 , 26, 91-106		68
222	Curve-induced distortion of polynomial space curves, flat-mapped extension modeling, and their impact on ANCF thin-plate finite elements. 2011 , 26, 191-211		14
221	A new locking-free formulation for planar, shear deformable, linear and quadratic beam finite elements based on the absolute nodal coordinate formulation. 2011 , 26, 245-263		63
220	A modification of the rigid finite element method and its application to the J-lay problem. <i>Acta Mechanica</i> , 2011 , 220, 183-198	2.1	18
219	Dynamics of variable-length tethers with application to tethered satellite deployment. 2011 , 16, 3411-3424		47
218	A Parallel GPU Implementation of the Absolute Nodal Coordinate Formulation With a Frictional/Contact Model for the Simulation of Large Flexible Body Systems. 2011 ,		5
217	Analysis of beam elements of circular cross section using the absolute nodal coordinate formulation. 2012 , 59, 283-296		22
216	Modeling Slope Discontinuity of Large Size Wind-Turbine Blade Using Absolute Nodal Coordinate Formulation. 2012 ,		4
215	The Simplest 3- and 4-Noded Fully-Parameterized ANCF Plate Elements. 2012 ,		5
214	A GPU Parallelization of the Absolute Nodal Coordinate Formulation for Applications in Flexible Multibody Dynamics. 2012 ,		2
213	Estimation of Dynamic Contact Force Between a Pantograph and Catenary Using the Finite Element Method. 2012 , 7,		13
212	New spatial curved beam and cylindrical shell elements of gradient-deficient Absolute Nodal Coordinate Formulation. <i>Nonlinear Dynamics</i> , 2012 , 70, 1903-1918	5	52
211	Development of a three-dimensional catenary model using cable elements based on absolute nodal coordinate formulation. 2012 , 26, 3933-3941		23
210	Simple formulations of imposing moments and evaluating joint reaction forces for rigid-flexible multibody systems. <i>Nonlinear Dynamics</i> , 2012 , 69, 127-147	5	21
209	Investigation on the choice of boundary conditions and shape functions for flexible multi-body system. 2012 , 28, 180-189		13
208	A quaternion-based formulation of Euler-Bernoulli beam without singularity. <i>Nonlinear Dynamics</i> , 2012 , 67, 1825-1835	5	29
207	Cable installation simulation by using a multibody dynamic model. 2013 , 30, 433-447		11

206	Use of B-spline surface to model large-deformation continuum plates: procedure and applications. <i>Nonlinear Dynamics</i> , 2013 , 72, 243-263	5	15
205	A Continuum Based Three-Dimensional Modeling of Wind Turbine Blades. 2013 , 8,		11
204	Weak form quadrature element analysis of planar slender beams based on geometrically exact beam theory. 2013 , 83, 1309-1325		17
203	A comparative study of joint formulations: application to multibody system tracked vehicles. <i>Nonlinear Dynamics</i> , 2013 , 74, 783-800	5	16
202	A solid-beam finite element and non-linear constitutive modelling. 2013 , 265, 195-212		22
201	Deployment dynamics of a simplified spinning IKAROS solar sail via absolute coordinate based method. 2013 , 29, 132-142		30
200	Three- and four-noded planar elements using absolute nodal coordinate formulation. 2013 , 29, 255-269		16
199	A new curved gradient deficient shell element of absolute nodal coordinate formulation for modeling thin shell structures. <i>Nonlinear Dynamics</i> , 2013 , 74, 153-164	5	16
198	ElastoHydroDynamic lubricated cylindrical joints for rigid-flexible multibody dynamics. 2013 , 114-115, 106-120		101
197	Review on the Absolute Nodal Coordinate Formulation for Large Deformation Analysis of Multibody Systems. 2013 , 8,		97
196	Modelling of structural flexibility in multibody railroad vehicle systems. 2013 , 51, 1027-1058		30
195	Efficient Parallel Simulation of Large Flexible Body Systems With Multiple Contacts. 2013 , 8,		10
194	An Accurate Spatial Discretization and Substructure Method With Application to Moving Elevator Cable-Car Systems Part II: Application. 2013 , 135,		19
193	New Results in Dynamics Stability Problems of Elastic Rods. 2014 , 617, 181-186		9
192	Determination of Pipe Pullback Loads in Horizontal Directional Drilling Using an Advanced Computational Dynamic Model. 2014 , 140, 04014060		5
191	A Matrix-Free Newton-Krylov Parallel Implicit Implementation of the Absolute Nodal Coordinate Formulation. 2014 , 9,		5
190	A High Performance Computing Approach to the Simulation of Fluid-Solid interaction Problems with Rigid and Flexible Components. 2014 , 61, 227-251		12
189	A 3D absolute nodal coordinate finite element model to compute the initial configuration of a railway catenary. 2014 , 71, 234-243		57

188	Modeling and dynamics analysis of helical spring under compression using a curved beam element with consideration on contact between its coils. 2014 , 49, 907-917		11
187	Integration of non-uniform Rational B-splines geometry and rational absolute nodal coordinates formulation finite element analysis. 2014 , 27, 486-495		5
186	A finite element beam model including cross-section distortion in the absolute nodal coordinate formulation. <i>Nonlinear Dynamics</i> , 2014 , 77, 1019-1033	5	39
185	Dynamic simulation of frictional contacts of thin beams during large overall motions via absolute nodal coordinate formulation. <i>Nonlinear Dynamics</i> , 2014 , 77, 1411-1425	5	37
184	State of the Art of ANCF Elements Regarding Geometric Description, Interpolation Strategies, Definition of Elastic Forces, Validation and the Locking Phenomenon in Comparison with Proposed Beam Finite Elements. 2014 , 21, 293-319		38
