Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 14 Genome-wide analysis of the polyphenol oxidase gene family reveals that MaPPO1 and MaPPO6 are the main contributors to fruit browning in Musa acuminata. 14, ○
- 13 Biocontrol features of Pseudomonas syringae B-1 against Botryosphaeria dothidea in apple fruit. 14, ○
- 12 Enhancement of disease resistance, growth potential, and biochemical markers in maize plants by inoculation with plant growth-promoting bacteria under biotic stress. ○
- 11 Genome-Wide Identification and Characterization of the PPO Gene Family in Cotton (Gossypium) and Their Expression Variations Responding to Verticillium Wilt Infection. **2023**, 14, 477 ○
- 10 Effect of citric acid and calcium chloride combined with medium high hydrostatic pressure □ medium high temperature on polyphenol oxidase activity and browning in Fuji apple compote. **2023**, ○
- 9 Tyrosinase Immobilization Strategies for the Development of Electrochemical Biosensors Review. **2023**, 13, 760 ○
- 8 Effect of neutral protease overproduction in Bacillus subtilis 168 via site-directed mutation against Meloidogyne incognita infecting eggplant under greenhouse conditions. ○
- 7 Recent Advances of Polyphenol Oxidases in Plants. **2023**, 28, 2158 ○
- 6 Study of Alfalfa Leaf Proteome Response Under Biological Stress Conditions Caused by Alfalfa Leaf Weevil (Hypera Postica Gell.) Feeding Using Polyacrylamide Gel Electrophoresis, Isoelectric Focusing and Two-dimensional Electrophoresis. ○
- 5 Chemical compounds and bioactivities of the extracts from radish (Raphanus sativus) sprouts exposed to red and blue light-emitting diodes during cultivation. ○
- 4 The Effects of Exogenous IAA and BAP on the Metabolism of the Adhesion Zone Cells in Pea Seedling Roots (Pisum sativum L.) in the Initial Periods of Interaction with Rhizobium leguminosarum bv. viceae. **2023**, 59, 65-72 ○
- 3 Optimization of an indirect regeneration system for common bean (Phaseolus vulgaris L.). ○
- 2 Polyphenol oxidases regulate pollen development through modulating flavonoids homeostasis in tobacco. **2023**, 107702 ○
- 1 An Overview of Factors Affecting the Functional Quality of Common Wheat (Triticum aestivum L.). **2023**, 24, 7524 ○
