

Neuromodulators, Not Activity, Control Coordinated Ex

Journal of Neuroscience

27, 8709-8718

DOI: [10.1523/jneurosci.1274-07.2007](https://doi.org/10.1523/jneurosci.1274-07.2007)

Citation Report

#	ARTICLE	IF	CITATIONS
1	Using Constraints on Neuronal Activity to Reveal Compensatory Changes in Neuronal Parameters. <i>Journal of Neurophysiology</i> , 2007, 98, 3749-3758.	0.9	57
2	Differential Neurotrophic Regulation of Sodium and Calcium Channels in an Adult Sympathetic Neuron. <i>Journal of Neurophysiology</i> , 2008, 99, 1319-1332.	0.9	10
3	Serotonin Transduction Cascades Mediate Variable Changes in Pyloric Network Cycle Frequency in Response to the Same Modulatory Challenge. <i>Journal of Neurophysiology</i> , 2008, 99, 2844-2863.	0.9	28
4	Channel Density Distributions Explain Spiking Variability in the Globus Pallidus: A Combined Physiology and Computer Simulation Database Approach. <i>Journal of Neuroscience</i> , 2008, 28, 7476-7491.	1.7	113
5	Spectral Analyses Reveal the Presence of Adult-Like Activity in the Embryonic Stomatogastric Motor Patterns of the Lobster, <i>Homarus americanus</i> . <i>Journal of Neurophysiology</i> , 2008, 99, 3104-3122.	0.9	12
6	Parallel Regulation of a Modulator-Activated Current via Distinct Dynamics Underlies Comodulation of Motor Circuit Output. <i>Journal of Neuroscience</i> , 2009, 29, 12355-12367.	1.7	42
7	Compensatory changes in cellular excitability, not synaptic scaling, contribute to homeostatic recovery of embryonic network activity. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2009, 106, 6760-6765.	3.3	46
8	Activity and Neuromodulatory Input Contribute to the Recovery of Rhythmic Output After Decentralization in a Central Pattern Generator. <i>Journal of Neurophysiology</i> , 2009, 101, 372-386.	0.9	31
9	Membrane Capacitance Measurements Revisited: Dependence of Capacitance Value on Measurement Method in Nonisopotential Neurons. <i>Journal of Neurophysiology</i> , 2009, 102, 2161-2175.	0.9	115
10	Membrane Resonance in Bursting Pacemaker Neurons of an Oscillatory Network Is Correlated with Network Frequency. <i>Journal of Neuroscience</i> , 2009, 29, 6427-6435.	1.7	73
11	Geometry and dynamics of activity-dependent homeostatic regulation in neurons. <i>BMC Neuroscience</i> , 2009, 10, .	0.8	2
12	Modulation of stomatogastric rhythms. <i>Journal of Comparative Physiology A: Neuroethology, Sensory, Neural, and Behavioral Physiology</i> , 2009, 195, 989-1009.	0.7	131
13	Computational intelligence in modeling of biological neurons: A case study of an invertebrate pacemaker neuron. , 2009, , .		11
14	Crustacean neuropeptides. <i>Cellular and Molecular Life Sciences</i> , 2010, 67, 4135-4169.	2.4	204
15	Geometry and dynamics of activity-dependent homeostatic regulation in neurons. <i>Journal of Computational Neuroscience</i> , 2010, 28, 361-374.	0.6	31
16	D ₂ receptors receive paracrine neurotransmission and are consistently targeted to a subset of synaptic structures in an identified neuron of the crustacean stomatogastric nervous system. <i>Journal of Comparative Neurology</i> , 2010, 518, 255-276.	0.9	19
17	Identifiable Cells in the Crustacean Stomatogastric Ganglion. <i>Physiology</i> , 2010, 25, 311-318.	1.6	31
18	Computational approaches to neuronal network analysis. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2010, 365, 2397-2405.	1.8	32
