CITATION REPORT List of articles citing

Static polarizabilities and optical absorption spectra of gold clusters (Aun, n=214 and 20) from first principles

DOI: 10.1103/physrevb.76.205422 Physical Review B, 2007, 76, .

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
