

CITATION REPORT

List of articles citing

Cholinergic anti-inflammatory pathway activity and High Mobility Group Box-1 (HMGB1) serum levels in patients with rheumatoid arthritis

DOI: 10.2119/2006-00108.goldstein
Molecular Medicine, 2007, 13, 210-5.

Source: <https://exaly.com/paper-pdf/42530232/citation-report.pdf>

Version: 2024-04-23

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
154	Inhibition of the development of collagen-induced arthritis in Wistar rats through vagus nerve suspension: a 3-month observation. 2008 , 57, 322-8		40
153	The autonomic dysfunction in patients with ankylosing spondylitis: a clinical and electrophysiological study. 2008 , 27, 1267-73		23
152	Acetylcholine regulation of synoviocyte cytokine expression by the alpha7 nicotinic receptor. 2008 , 58, 3439-49		82
151	Shift from toll-like receptor 2 (TLR-2) toward TLR-4 dependency in the erosive stage of chronic streptococcal cell wall arthritis coincident with TLR-4-mediated interleukin-17 production. 2008 , 58, 3753-64		74
150	High-mobility group box protein 1 (HMGB1): an alarmin mediating the pathogenesis of rheumatic disease. 2008 , 10, 209		142
149	High mobility group box-1 protein as a tumor necrosis factor-independent therapeutic target in rheumatoid arthritis. 2008 , 10, 111		8
148	Systemic TNF blockade does not modulate synovial expression of the pro-inflammatory mediator HMGB1 in rheumatoid arthritis patients--a prospective clinical study. 2008 , 10, R33		30
147	Oxaliplatin retains HMGB1 intranuclearly and ameliorates collagen type II-induced arthritis. 2008 , 10, R1		31
146	Sensing danger--Hsp72 and HMGB1 as candidate signals. 2008 , 83, 489-92		39
145	Circulating chromogranin A reveals extra-articular involvement in patients with rheumatoid arthritis and curbs TNF-alpha-elicited endothelial activation. 2009 , 85, 81-7		46
