

CITATION REPORT

List of articles citing

PsychoPy--Psychophysics software in Python

DOI: 10.1016/j.jneumeth.2006.11.017

Journal of Neuroscience Methods, 2007, 162, 8-13.

Source: <https://exaly.com/paper-pdf/42733448/citation-report.pdf>

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
2263	Perceptual learning in the absence of task or stimulus specificity. 2007 , 2, e1323		21
2262	Selective mechanisms for simple contours revealed by compound adaptation. 2008 , 8, 11.1-10		23
2261	Masking exposes multiple global form mechanisms. 2008 , 8, 16.1-10		9
2260	Vision egg: an open-source library for realtime visual stimulus generation. 2008 , 2, 4		186
2259	Generating Stimuli for Neuroscience Using PsychoPy. 2008 , 2, 10		656
2258	A primer of visual stimulus presentation software. 2009 , 3, 163-4		2
2257	Another angle on rat somatosensory thalamic barreloids. 2009 , 3, 164-5		
2256	An eye-tectum preparation allowing routine whole-cell recordings of neuronal responses to visual stimuli in frog. <i>Journal of Neuroscience Methods</i> , 2009 , 180, 22-8	3	6
2255	PsyToolkit: a software package for programming psychological experiments using Linux. 2010 , 42, 1096-104		226
2254	The spatial characteristics of plaid-form-selective mechanisms. 2010 , 50, 796-804		10
2253	Relating spatial and temporal orientation pooling to population decoding solutions in human vision. 2010 , 50, 2274-83		13
2252	Spatial frequency discrimination learning in normal and developmentally impaired human vision. 2010 , 50, 2445-54		26
2251	Pyff - a pythonic framework for feedback applications and stimulus presentation in neuroscience. 2010 , 4, 179		33
2250	Global shape processing: which parts form the whole?. 2010 , 10, 16		19
2249	Perceptual Issues Improve Haptic Systems Performance. 2010 ,		2
2248	Ameliorating the combinatorial explosion with spatial frequency-matched combinations of V1 outputs. 2010 , 10, 7		5
2247	Better mood and better performance. Learning rule-described categories is enhanced by positive mood. 2010 , 21, 1770-6		87

2246	Investigating spatial specificity and data averaging in MEG. 2010 , 49, 525-38	38
2245	A comparison of fMRI adaptation and multivariate pattern classification analysis in visual cortex. 2010 , 49, 1632-40	50
2244	Presentation and validation of the Radboud Faces Database. 2010 , 24, 1377-1388	1291
2243	Real-time functional magnetic resonance imaging neurofeedback for treatment of Parkinson's disease. 2011 , 31, 16309-17	186
2242	Vishnoo [An open-source software for vision research. 2011 ,	8
2241	Emergence of perceptual Gestalts in the human visual cortex: the case of the configural-superiority effect. 2011 , 22, 1296-303	34
2240	A perceptual discrimination task abnormally facilitates reflexive saccades in Parkinson's disease. 2011 , 33, 2091-100	15
2239	VSIImG: A high frame rate bitmap based display system for neuroscience research. 2011 , 74, 1762-1768	1
2238	Gaze-contingent simulation of retinopathy: some potential pitfalls and remedies. 2011 , 51, 997-1012	46
2237	The timing of binding and segregation of two compound aftereffects. 2011 , 51, 1047-57	4
2236	Perceiving spatial relations via attentional tracking and shifting. 2011 , 21, 1135-9	11
2235	Mantra: an open method for object and movement tracking. 2011 , 43, 1182-93	2
2234	Bottom-up effects modulate saccadic latencies in well-known eye movement paradigm. 2011 , 75, 272-8	1
2233	The pattern of learned visual improvements in adult amblyopia. 2011 , 52, 7195-204	31
2232	Neural computations governing spatiotemporal pooling of visual motion signals in humans. 2011 , 31, 4917-25	15
2231	Can human amblyopia be treated in adulthood?. 2011 , 19, 99-109	26
2230	The effects of concurrent verbal and visual tasks on category learning. 2011 , 37, 588-607	20
2229	Perceptual learning reconfigures the effects of visual adaptation. 2012 , 32, 13621-9	23

2228	On the measurement of criterion noise in signal detection theory: the case of recognition memory. 2012 , 119, 457-79		22
2227	Perceptual learning reduces crowding in amblyopia and in the normal periphery. 2012 , 32, 474-80		81
2226	Sonification Discriminability and Perceived Urgency. 2012 , 56, 1298-1302		2
2225	20Hz membrane potential oscillations are driven by synaptic inputs in collision-detecting neurons in the frog optic tectum. 2012 , 528, 196-200		5
2224	Symmetry perception and affective responses: a combined EEG/EMG study. 2012 , 50, 3250-61		64
2223	Estimating the speed of <i>Drosophila</i> locomotion using an automated behavior detection and analysis system. 2012 , 6, 205-10		2
2222	Spatial probability cuing and right hemisphere damage. 2012 , 80, 352-60		18
2221	An inexpensive Arduino-based LED stimulator system for vision research. <i>Journal of Neuroscience Methods</i> , 2012 , 211, 227-36	3	77
2220	The Role of Number Notation: Sign-Value Notation Number Processing is Easier than Place-Value. 2012 , 3, 463		7
2219	Cholinergic enhancement reduces orientation-specific surround suppression but not visual crowding. 2012 , 6, 61		20
2218	Emotion and Explicit Verbal Memory: Evidence Using Malay Lexicon. 2012 , 8,		1
2217	Surround facilitation for rapid motion perception. 2012 , 12,		4
2216	Transfer of perceptual learning between different visual tasks. 2012 , 12, 4		29
2215	OpenSesame: an open-source, graphical experiment builder for the social sciences. 2012 , 44, 314-24		1053
2214	Spatial localisation in autism: evidence for differences in early cortical visual processing. 2013 , 4, 4		12
2213	GazeParser: an open-source and multiplatform library for low-cost eye tracking and analysis. 2013 , 45, 684-95		20
2212	7 Tesla compatible in-bore display for functional magnetic resonance imaging. 2013 , 26, 371-5		6
2211	How low can you go: spatial frequency sensitivity in a patient with pure alexia. 2013 , 126, 188-92		14

2210	Presentation and AcqKnowledge: an application of software to study human emotions and individual differences. 2013 , 110, 89-98	8
2209	Repetition suppression and multi-voxel pattern similarity differentially track implicit and explicit visual memory. 2013 , 33, 14749-57	73
2208	. 2013 ,	
2207	Consequences of polar form coherence for fMRI responses in human visual cortex. 2013 , 78, 152-8	10
2206	Priming and statistical learning in right brain damaged patients. 2013 , 51, 2526-33	22
2205	A perceptual discrimination task results in greater facilitation of voluntary saccades in Parkinson's disease patients. 2013 , 37, 163-72	9
2204	A case of color-taste synesthesia. 2013 , 19, 282-94	2
2203	Evaluation of Depth of Field for depth perception in DVR. 2013 ,	8
2202	Agency Effects in Human-Computer Interaction. 2013 , 29, 798-813	14
2201	Configural Gestalts remain nothing more than the sum of their parts in visual agnosia. 2013 , 4, 493-7	10
2200	Conditional probability modulates visual search efficiency. 2013 , 7, 683	2
2199	Luminance cues constrain chromatic blur discrimination in natural scene stimuli. 2013 , 13, 14	6
2198	Biomimetic and Biohybrid Systems. 2013 ,	5
2197	A Biomimetic Neuronal Network-Based Controller for Guided Helicopter Flight. 2013 , 299-310	1
2196	Electrophysiological responses to visuospatial regularity. 2013 , 50, 1045-55	26
2195	Implementation of a beam forming technique in real-time magnetoencephalography. 2013 , 12, 331-41	7
2194	Visual search for feature singletons: multiple mechanisms produce sequence effects in visual search. 2013 , 13,	18
2193	A Weber-like law for perceptual learning. 2013 , 3, 1158	26

2192	Females' Duration Estimates of Briefly-Viewed Male, but Not Female, Photographs Depend on Attractiveness. 2013 , 11, 147470491301100	6
2191	Perceptual Dual-Task Training via Simulation for Veterinary Students. 2013 , 57, 1780-1784	
2190	Implicit Association of Symmetry with Positive Valence, High Arousal and Simplicity. 2013 , 4, 317-327	37
2189	Splitting attention reduces temporal resolution from 7 Hz for tracking one object to . 2013 , 13, 12	62
2188	The eyes like their targets on a stable background. 2013 , 13,	1
2187	Is it just motion that silences awareness of other visual changes?. 2013 , 13, 17	4
2186	A synchronous surround increases the motion strength gain of motion. 2013 , 13, 12	2
2185	Do changes in the pace of events affect one-off judgments of duration?. 2013 , 8, e59847	5
2184	Is conscious stimulus identification dependent on knowledge of the perceptual modality? Testing the "source misidentification hypothesis". 2013 , 4, 116	15
2183	In pursuit of off-task thought: mind wandering-performance trade-offs while reading aloud and color naming. 2013 , 4, 360	40
2182	The IAT shows no evidence for Kandinsky's color-shape associations. 2013 , 4, 616	14
2181	Amygdala, pulvinar, and inferior parietal cortex contribute to early processing of faces without awareness. 2013 , 7, 241	46
2180	The effect of aging on crowded letter recognition in the peripheral visual field. 2014 , 55, 5039-45	14
2179	Frequent words do not break continuous flash suppression differently from infrequent or nonexistent words: implications for semantic processing of words in the absence of awareness. 2014 , 9, e104719	26
2178	The MPI emotional body expressions database for narrative scenarios. 2014 , 9, e113647	16
2177	Primed to be inflexible: the influence of set size on cognitive flexibility during childhood. 2014 , 5, 101	6
2176	Veridical mapping in savant abilities, absolute pitch, and synesthesia: an autism case study. 2014 , 5, 106	26
2175	A perceptual pitch boundary in a non-human primate. 2014 , 5, 998	6

2174	Normative perceptual estimates for 91 healthy subjects age 60-75: impact of age, education, employment, physical exercise, alcohol, and video gaming. 2014 , 5, 1137	5
2173	Perceived displacement explains wolfpack effect. 2014 , 5, 1423	
2172	Real-time fMRI brain-computer interface: development of a "motivational feedback" subsystem for the regulation of visual cue reactivity. 2014 , 8, 392	40
2171	Merging functional and structural properties of the monkey auditory cortex. 2014 , 8, 198	10
2170	Examining visual complexity and its influence on perceived duration. 2014 , 14, 3	37
2169	The pupillary light response reflects exogenous attention and inhibition of return. 2014 , 14, 7	43
2168	Visual symmetry in objects and gaps. 2014 , 14, 12	32
2167	Object tracking: absence of long-range spatial interference supports resource theories. 2014 , 14, 1	17
2166	Contour inflections are adaptable features. 2014 , 14,	1
2165	Memory-guided tracking through physical space and feature space. 2014 , 14, 10	13
2164	Characterizing the role of disparity information in alleviating visual crowding. 2014 , 14, 8	11
2163	The roles of the central executive and visuospatial storage in mental arithmetic: a comparison across strategies. 2014 , 67, 936-54	27
2162	Parietal neural prosthetic control of a computer cursor in a graphical-user-interface task. 2014 , 11, 066014	4
2161	The fusion of mental imagery and sensation in the temporal association cortex. 2014 , 34, 13684-92	28
2160	Music causes deterioration of source memory: evidence from normal ageing. 2014 , 67, 2381-91	8
2159	"Please tap the shape, anywhere you like": Shape skeletons in human vision revealed by an exceedingly simple measure. 2014 , 25, 377-86	60
2158	Sleep underpins the plasticity of language production. 2014 , 25, 1457-65	40
2157	Diurnal changes in the perception of emotions in music: Does the time of day matter?. 2014 , 18, 256-274	2

2156	Shape shifting: Local landmarks interfere with navigation by, and recognition of, global shape. 2014 , 40, 492-510	8
2155	Regions of mid-level human visual cortex sensitive to the global coherence of local image patches. 2014 , 26, 1764-74	2
2154	Differences in perceptual latency estimated from judgments of temporal order, simultaneity and duration are inconsistent. 2014 , 5, 559-71	16
2153	Temporal discrimination deficits as a function of lag interference in older adults. 2014 , 24, 1189-96	28
2152	Spatial discrimination deficits as a function of mnemonic interference in aged adults with and without memory impairment. 2014 , 24, 303-14	51
2151	Making room for negative emotions about the national past: An explorative study of effects of parrhesia on Italian colonial crimes. 2014 , 43, 126-138	15
2150	Burst spectrum as a cue for the stop voicing contrast in American English. 2014 , 136, 2762-72	24
2149	Encoding of configural regularity in the human visual system. 2014 , 14,	8
2148	Characterizing the effects of multidirectional motion adaptation. 2014 , 14, 2	1
2147	Midline frontal cortex low-frequency activity drives subthalamic nucleus oscillations during conflict. 2014 , 34, 7322-33	98
2146	Social influence and perceptual decision making: a diffusion model analysis. 2014 , 40, 217-31	40
2145	BOLDSync: a MATLAB-based toolbox for synchronized stimulus presentation in functional MRI. <i>Journal of Neuroscience Methods</i> , 2014 , 223, 123-32	3 4
2144	Altered pre-reflective sense of agency in autism spectrum disorders as revealed by reduced intentional binding. 2014 , 44, 343-52	27
2143	On the asymmetric effects of mind-wandering on levels of processing at encoding and retrieval. 2014 , 21, 728-33	25
2142	Comparison of functional near-infrared spectroscopy and electrodermal activity in assessing objective versus subjective risk during risky financial decisions. 2014 , 84, 833-42	39
2141	Conflict tasks and the diffusion framework: Insight in model constraints based on psychological laws. 2014 , 72, 162-95	38
2140	Expyriment: a Python library for cognitive and neuroscientific experiments. 2014 , 46, 416-28	56
2139	PyGaze: an open-source, cross-platform toolbox for minimal-effort programming of eyetracking experiments. 2014 , 46, 913-21	142

2138	Fourier decomposition of spatial localization errors reveals an idiotropic dominance of an internal model of gravity. 2014 , 105, 177-88	8
2137	Conceptual knowledge of emotions includes somatosensory component: Evidence from modality-switch cost effect. 2014 , 26, 322-332	3
2136	Auditory clicks distort perceived velocity but only when the system has to rely on extraretinal signals. 2014 , 67, 455-73	6
2135	Dimensions of anthropomorphism. 2014 ,	26
2134	Prior probability and feature predictability interactively bias perceptual decisions. 2014 , 61, 210-21	35
2133	Modeling source-memory overdistribution. 2014 , 76, 216-236	13
2132	Object-centered orienting and IOR. 2014 , 76, 2249-55	2
2131	Seeing and liking: biased perception of ambiguous figures consistent with the "inward bias" in aesthetic preferences. 2014 , 21, 1444-51	10
2130	Repetition strengthens target recognition but impairs similar lure discrimination: evidence for trace competition. 2014 , 21, 342-6	24
2129	On the link between mind wandering and task performance over time. 2014 , 27, 14-26	71
2128	Effects of background suppression on the sensitivity of dual-echo arterial spin labeling MRI for BOLD and CBF signal changes. 2014 , 103, 316-322	22
2127	NEDE: an open-source scripting suite for developing experiments in 3D virtual environments. <i>Journal of Neuroscience Methods</i> , 2014 , 235, 245-51	3 17
2126	StimSync: open-source hardware for behavioral and MRI experiments. <i>Journal of Neuroscience Methods</i> , 2014 , 227, 90-9	3 4
2125	Time reproduction during high and low attentional tasks in Alzheimer's Disease. "A watched kettle never boils". 2014 , 88, 1-5	12
2124	The relationship between sympathetic nervous activity and cerebral hemodynamics and oxygenation: a study using skin conductance measurement and functional near-infrared spectroscopy. 2014 , 270, 95-107	29
2123	The Psychology Experiment Building Language (PEBL) and PEBL Test Battery. <i>Journal of Neuroscience Methods</i> , 2014 , 222, 250-9	3 443
2122	Electrophysiological analysis of the affective congruence between pattern regularity and word valence. 2014 , 58, 107-17	15
2121	Is theta burst stimulation applied to visual cortex able to modulate peripheral visual acuity?. 2014 , 9, e99429	8

2120	A framework for streamlining research workflow in neuroscience and psychology. 2013 , 7, 52	9
2119	A high-resolution 7-Tesla fMRI dataset from complex natural stimulation with an audio movie. 2014 , 1, 140003	97
2118	The cognitive status of st \bar{d} . 2015 , 38, 163-187	1
2117	Painting Flavor. 2015 , 1-13	
2116	The attentional cost of receiving a cell phone notification. 2015 , 41, 893-897	125
2115	Effects of task and task-switching on temporal inhibition of return, facilitation of return, and saccadic momentum during scene viewing. 2015 , 41, 1300-1314	4
2114	Stochastic or systematic? Seemingly random perceptual switching in bistable events triggered by transient unconscious cues. 2015 , 41, 929-39	5
2113	The validity of the Risk-Sophistication-Treatment Inventory (RSTI-A): Initial evidence in support of a measure designed for juvenile evaluations.. 2015 , 21, 205-212	
2112	Sore losers? A reexamination of the frustration-aggression hypothesis for colocated video game play.. 2015 , 4, 126-137	36
2111	Awareness of voluntary and involuntary causal actions and their outcomes.. 2015 , 2, 237-252	20
2110	Functional magnetic resonance spectroscopy of glutamate in schizophrenia and major depressive disorder: anterior cingulate activity during a color-word Stroop task. 2015 , 1, 15028	43
2109	A high resolution 7-Tesla resting-state fMRI test-retest dataset with cognitive and physiological measures. 2015 , 2, 140054	30
2108	Scaling of the extrastriate neural response to symmetry. 2015 , 117, 1-8	30
2107	Does Preference for Abstract Patterns Relate to Information Processing and Perceived Duration?. 2015 , 6, 2041669515604436	6
2106	Effects of walking on bilateral differences in spatial attention control: a cross-over design. 2015 , 5, 12	1
2105	The role of tonal onglides in German nuclear pitch accents. 2015 , 58, 114-28	15
2104	Scene coherence can affect the local response to natural images in human V1. 2015 , 42, 2895-903	3
2103	The real-time comprehension of WH-dependencies in a WH-agreement language. 2015 , 91, 109-144	6

2102	Auditory recognition of familiar and unfamiliar subjects with wind turbine noise. 2015 , 12, 4306-20	6

806 Introduction. **2020**, 1-26

805 Personality and Individual Differences. **2020**, 96-114

804 Safety and Security. **2020**, 138-162

803 Conclusion. **2020**, 163-186

802 Index. **2020**, 253-266

801 Influence of culture on visual working memory: evidence of a cultural response bias for remote Australian Indigenous children. **2020**, 4, 323-341 3

800 Area, not number, dominates estimates of visual quantities. **2020**, 10, 13407 10

799 Visual motion information modulates tactile roughness perception. **2020**, 10, 13929

798 Cognitive aging and verbal labeling in continuous visual memory. **2020**, 48, 1196-1213 3

797 Decoding and encoding models reveal the role of mental simulation in the brain representation of meaning. **2020**, 7, 192043 4

796 Effects of reward magnitude frames on measures of delay discounting in a hypothetical money scenario. **2020**, 114, 193-202 1

795 Stop the clock because I can't stop: time pressure, but not monitoring pressure, impairs response inhibition performance. **2020**, 32, 627-644 1

794 A Subjective Quality Assessment Database for Mobile Video Coding. **2020**,

793 Subjective Study of Perceptual Quality for Micro-Video Applications. **2020**, 1

792 Development and validation of the Korean version of the Reading the Mind in the Eyes Test. **2020**, 15, e0238309 5

791 Does physical exercise and congruent visual stimulation enhance perceptual learning?. **2020**, 40, 680-691 2

790 The Neurosciences of Health Communication: An fNIRS Analysis of Prefrontal Cortex and Porn Consumption in Young Women for the Development of Prevention Health Programs. **2020**, 11, 2132 1

789 Speech-in-noise detection is related to auditory working memory precision for frequency. **2020**, 10, 13997 7

- 29 Exploration of Speech Induced Suppression using Functional Near-Infrared Spectroscopy (fNIRS). ○
- 28 Causal Effects of Pupil Size on Visual Processing. ○
- 27 Interaction between spatial perception and temporal perception enables preservation of cause-effect relationship: Visual psychophysics and neuronal dynamics. **2023**, 20, 9101-9134 ○
- 26 Can object identification difficulty be predicted based on disfluencies and eye-movements in connected speech?. **2023**, 18, e0281589 ○
- 25 Fast layer-fMRI VASO with short stimuli and event-related designs at 7T. ○
- 24 The spectral profile of cortical activation during a visuospatial mental rotation task and its correlation with working memory. 17, ○
- 23 Asymmetric retinal direction tuning predicts optokinetic eye movements across stimulus conditions. 12, ○
- 22 Connectome-based predictive modeling shows sex differences in brain-based predictors of memory performance. 2, ○
- 21 The activation of embedded (pseudo-)stems in auditory lexical processing: implications for models of spoken word recognition. 1-17 ○
- 20 The Primacy of Experience in Language Processing: Semantic Priming Is Driven Primarily by Experiential Similarity. ○
- 19 Patient-tailored transcranial direct current stimulation to improve stroke rehabilitation: study protocol of a randomized sham-controlled trial. **2023**, 24, ○
- 18 An epigenetic mechanism for differential maturation of amygdala-prefrontal connectivity in childhood socio-emotional development. **2023**, 13, ○
- 17 Risk Sexual Behaviors in Uruguayan Adolescents: the Role of Self-Regulation and Sex-Gender. ○
- 16 Habituation to visual onsets is affected by local and global distractors rate. ○
- 15 Reducing default mode network connectivity with mindfulness-based fMRI neurofeedback: a pilot study among adolescents with affective disorder history. ○
