

CITATION REPORT

List of articles citing

Genetic correlates of brain aging on MRI and cognitive test measures: a genome-wide association and linkage analysis in the Framingham Study

DOI: 10.1186/1471-2350-8-s1-s15

BMC Medical Genetics, 2007, 8 Suppl 1, S15.

Version: 2024-04-23

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 8 Enhanced drug delivery by a prodrug approach effectively relieves neuroinflammation in mice. **2022**, 310, 121088 ○
- 7 Alu Deletions in LAMA2 and CDH4 Genes Are Key Components of Polygenic Predictors of Longevity. **2022**, 23, 13492 ○
- 6 Genome-Wide Association Study of Executive Function in a Multi-Ethnic Cohort Implicates LINC01362: Results From the Northern Manhattan Study. **2022**, ○
- 5 Identification of genetic risk loci for depression and migraine comorbidity in Han Chinese residing in Taiwan. 13, ○
- 4 Application of orthogonal sparse joint non-negative matrix factorization based on connectivity in Alzheimer's disease research. **2023**, 20, 9923-9947 ○
- 3 Genome-wide Association Studies of Retinal Vessel Tortuosity Identify Numerous Novel Loci Revealing Genes and Pathways Associated With Ocular and Cardiometabolic Diseases. **2023**, 3, 100288 ○
- 2 Linkage and next generation sequencing (NGS) data in six large Danish families with dyslexia. ○
- 1 SORL1 rs1699102 Moderates the Effect of Sex on Language Network. **2023**, 1-13 ○
