Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
148	The Framingham Heart Study, on its way to becoming the gold standard for Cardiovascular Genetic Epidemiology?. <i>BMC Medical Genetics</i> , 2007 , 8, 63	2.1	25
147	The Framingham Heart Study 100K SNP genome-wide association study resource: overview of 17 phenotype working group reports. <i>BMC Medical Genetics</i> , 2007 , 8 Suppl 1, S1	2.1	152
146	Association of chromosome 9p21 SNPs with cardiovascular phenotypes in morbid obesity using electronic health record data. 2008 , 2, 33-43		17
145	Genetic and functional association of FAM5C with myocardial infarction. <i>BMC Medical Genetics</i> , 2008 , 9, 33	2.1	28
144	Genetic epidemiology of subclinical cardiovascular disease in the diabetes heart study. 2008 , 72, 598-610		35
143	Susceptibility genes & modifiers for cardiac arrhythmias. 2008 , 98, 289-300		12
142	The genetic basis of coronary artery disease: from candidate genes to whole genome analysis. 2008 , 18, 157-62		25
141	The year in arrhythmias 2007: Part II. 2008 , 5, 867-71		
140	A common single nucleotide polymorphism alters the synthesis and secretion of neuropeptide Y. 2008 , 28, 14428-34		34
139	Athsq1 is an atherosclerosis modifier locus with dramatic effects on lesion area and prominent accumulation of versican. 2008 , 28, 2180-6		24
138	Heritability and linkage study on heart rates in a Mongolian population. 2008 , 40, 558-64		4
137	Hereditary determinants of human hypertension: strategies in the setting of genetic complexity. 2008 , 51, 1456-64		45
136	Genetics of stroke: a review of recent advances. 2008 , 8, 495-513		47
135	Association of variation in the chromosome 9p21 locus with myocardial infarction versus chronic coronary artery disease. 2008 , 1, 85-92		64
134	Can fishing for new genes catch patients at risk of coronary artery disease?. 2008 , 54, 453-5		1
133	Association between ESR2 genetic variants and risk of myocardial infarction. 2008 , 54, 1183-9		34
132	Update on the genetics of stroke and cerebrovascular disease 2007. 2008 , 39, 252-4		5

131	Family study designs in the age of genome-wide association studies: experience from the Framingham Heart Study. 2008 , 19, 144-50		11
