Version: 2024-04-09

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
375	Incident heart failure is associated with lower whole-grain intake and greater high-fat dairy and egg intake in the Atherosclerosis Risk in Communities (ARIC) study. 2008 , 108, 1881-7		79
374	Breakfast cereal is associated with a lower prevalence of obesity among 10-12-year-old children: the PANACEA study. <i>Nutrition, Metabolism and Cardiovascular Diseases</i> , 2008 , 18, 606-12	4.5	25
373	Dietary fiber intake in relation to coronary heart disease and all-cause mortality over 40 y: the Zutphen Study. 2008 , 88, 1119-25		108
372	A priori-defined dietary patterns and markers of cardiovascular disease risk in the Multi-Ethnic Study of Atherosclerosis (MESA). 2008 , 88, 185-94		200
371	Common risk factors and prevention. 89-104		
370	Intake of wholegrain products is associated with dietary, lifestyle, anthropometric and socio-economic factors in Denmark. 2009 , 12, 1519-30		21
