

# CITATION REPORT

List of articles citing

## Neuroendocrine control of food intake

DOI: 10.1016/j.numecd.2007.06.004

Nutrition, Metabolism and Cardiovascular Diseases,  
2008, 18, 158-68.

**Source:** <https://exaly.com/paper-pdf/44015417/citation-report.pdf>

**Version:** 2024-04-24

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

12	Liver Brain Interactions: Focus on FGF21 a Systematic Review. <b>2022</b> , 23, 13318		3

- 11 Effects of fluoxetine on fish: What do we know and where should we focus our efforts in the future?. **2023**, 857, 159486 ○
- 10 The Interplay between Central and Peripheral Systems in Feed Intake Regulation in European Seabass (*Dicentrarchus labrax*) Juveniles. **2022**, 12, 3287 ○
- 9 Relationships of orexigenic and anorexigenic hormones with body fat distribution in patients with obstructive sleep apnea syndrome. ○
- 8 Food preferences after bariatric surgery: a review update. ○
- 7 Leptin and energy balance: exploring Leptin's role in the regulation of energy intake and energy expenditure. 1-9 ○
- 6 Impact of Sugars on Hypothalamic Satiety Pathways and Its Contribution to Dysmetabolic States. **2023**, 4, 1-10 ○
- 5 Rice Endoplasmic Protein-Derived Peptides, Rice-Ghrelin A and B, Stimulate Ghrelin Release in MGN3-1 Cells and Increase Plasma Acylated Ghrelin and Food Intake in Mice. **2023**, 71, 421-429 ○
- 4 High fat/high sucrose diet worsens metabolic outcomes and widespread hypersensitivity following early life stress exposure in female mice. ○
- 3 The Bidirectional Relationship of NPY and Mitochondria in Energy Balance Regulation. **2023**, 11, 446 ○
- 2 Relationship Between Appetite-Related Peptides and Frailty in Older Adults. 1-9 ○
- 1 Glucose-dependent insulinotropic polypeptide counteracts diet-induced obesity along with reduced feeding, elevated plasma leptin and activation of leptin-responsive and proopiomelanocortin neurons in the arcuate nucleus. ○
