

CITATION REPORT

List of articles citing

Are individual differences in speech reception related to individual differences in cognitive ability? A survey of twenty experimental studies with normal and hearing-impaired adults

DOI: 10.1080/14992020802301142

International Journal of Audiology, 2008, 47 Suppl 2, S53-71.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
479	Aided speech-identification performance in single-talker competition by older adults with impaired hearing. 2009 , 50, 485-94		26
478	Measuring cognitive factors in speech comprehension: the value of using the Text Reception Threshold test as a visual equivalent of the SRT test. 2009 , 50, 507-15		38
477	The emergence of cognitive hearing science. 2009 , 50, 371-84		143
476	Cognitive Hearing Science: the view from hearing impairment and deafness. Editorial. 2009 , 50, 367-9		1
475	Sentence recognition in noise: Variables in compilation and interpretation of tests. <i>International Journal of Audiology</i> , 2009 , 48, 743-57	2.6	50
474	Benefit from spatial separation of multiple talkers in bilateral hearing-aid users: Effects of hearing loss, age, and cognition. <i>International Journal of Audiology</i> , 2009 , 48, 758-74	2.6	53
473	Neuroanatomical characteristics and speech perception in noise in older adults. <i>Ear and Hearing</i> , 2010 , 31, 471-9	3.4	121
472	Improved segregation of simultaneous talkers differentially affects perceptual and cognitive capacity demands for recognizing speech in competing speech. 2010 , 72, 501-16		33
471	Phonemic restoration by hearing-impaired listeners with mild to moderate sensorineural hearing loss. 2010 , 260, 54-62		33
470	Can basic auditory and cognitive measures predict hearing-impaired listeners' localization and spatial speech recognition abilities?. 2011 , 130, 1542-58		71
469	Testing Listening Effort for Speech Comprehension Using the Individuals' Cognitive Spare Capacity. 2011 , 1, e22		12
468	SUN-test (Speech Understanding in Noise): A Method for Hearing Disability Screening. 2011 , 1, e13		9
467	The influence of semantically related and unrelated text cues on the intelligibility of sentences in noise. <i>Ear and Hearing</i> , 2011 , 32, e16-25	3.4	57
466	Spatial selective auditory attention in the presence of reverberant energy: individual differences in normal-hearing listeners. 2011 , 12, 395-405		49
465	[Examination of speech perception and cognitive functioning in the elderly]. 2011 , 59, 689-95		8
464	Abstracts. <i>International Journal of Audiology</i> , 2011 , 50, 717-780	2.6	
463	Older adults expend more listening effort than young adults recognizing speech in noise. <i>Journal of Speech, Language, and Hearing Research</i> , 2011 , 54, 944-58	2.8	139

462	Normal hearing is not enough to guarantee robust encoding of suprathreshold features important in everyday communication. 2011 , 108, 15516-21		150
461	On the use of the distortion-sensitivity approach in examining the role of linguistic abilities in speech understanding in noise. <i>Journal of Speech, Language, and Hearing Research</i> , 2011 , 54, 1702-8	2.8	5
460	Processing load induced by informational masking is related to linguistic abilities. 2012 , 2012, 865731		77
459	Relating binaural pitch perception to the individual listener's auditory profile. 2012 , 131, 2968-86		20
458	The influence of environmental sound training on the perception of spectrally degraded speech and environmental sounds. 2012 , 16, 83-101		17
