

CITATION REPORT

List of articles citing

High-pressure Food Processing

DOI: 10.1177/1082013208098812

Food Science and Technology International, 2008, 14, 413-418

Source: <https://exaly.com/paper-pdf/44348637/citation-report.pdf>

Version: 2024-04-20

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
107	High Pressure Processing of Meat, Meat Products and Seafood. 2010 , 2, 256-273		172
106	High hydrostatic pressure processing of fruit juices and smoothies: research and commercial application. 2010 , 34-72		5
105	Storage stability of lycopene in tomato juice subjected to combined pressure-heat treatments. 2010 , 58, 8305-13		56
104	Tecnologie di packaging per la qualità degli alimenti. 2010 , 319-388		
103	Monitoring the effects of high pressure processing and temperature on selected beef quality attributes. 2010 , 86, 629-34		79
102	Combined pressure-temperature effects on carotenoid retention and bioaccessibility in tomato juice. 2011 , 59, 7808-17		73
101	Heat Treatment of Milk Non-Thermal Technologies: High Pressure Processing. 2011 , 732-737		2
100	Microbiological food safety assessment of high hydrostatic pressure processing: A review. 2011 , 44, 1251-1260	54	
99	Combined pressure-temperature effects on the chemical marker (4-hydroxy-5-methyl-3(2H)-furanone) formation in whey protein gels. 2011 , 44, 2141-2146		14
98	Influence of HPP conditions on selected beef quality attributes and their stability during chilled storage. 2011 , 87, 274-81		49
97	Data analysis of the inactivation of foodborne microorganisms under high hydrostatic pressure to establish global kinetic parameters and influencing factors. 2011 , 74, 2097-106		17
96	Partial characterization of heat-stable, antilisterial and cell lytic bacteriocin of <i>Pediococcus pentosaceus</i> CFR SIII isolated from a vegetable source. 2011 , 61, 323-330		13
95	Microbial decontamination of food by high pressure processing. 2012 , 370-406		10
94	Packaging materials for non-thermal processing of food and beverages. 2012 , 323-334		4
93	Lycopene degradation, isomerization and in vitro bioaccessibility in high pressure homogenized tomato puree containing oil: effect of additional thermal and high pressure processing. 2012 , 135, 1290-7		74
92	Effect of high pressure, temperature, and storage on the color of porcine longissimus dorsi. 2012 , 92, 374-81		48
91	Modeling the high pressure inactivation kinetics of <i>Listeria monocytogenes</i> on RTE cooked meat products. 2012 , 16, 305-315		51

90	Emerging technologies for microbial control in food processing. 2012 , 363-411	9
89	High-Pressure Processing of Fluid Foods. 2012 , 109-133	9
88	Modeling the Kinetics of Microbial and Quality Attributes of Fluid Food During Novel Thermal and Non-Thermal Processes. 2012 , 433-471	7
87	Bacteriophage performance against Staphylococcus aureus in milk is improved by high hydrostatic pressure treatments. 2012 , 156, 209-13	32
86	Impact of yeast on the aroma and flavour of Oregon Pinot Noir wine. 2012 , 18, 131-137	10
85	Isomerisation of carrot β -carotene in presence of oil during thermal and combined thermal/high pressure processing. 2013 , 138, 1515-20	13
84	High pressure processing controls microbial growth and minimally alters the levels of health promoting compounds in grapefruit (Citrus paradisi Macfad) juice. 2013 , 18, 7-14	35
83	Influence of HPP conditions on selected lamb quality attributes and their stability during chilled storage. 2013 , 19, 66-72	24
82	Estimating pressure induced changes in vegetable tissue using in situ electrical conductivity measurement and instrumental analysis. 2013 , 114, 47-56	22
81	Inhibition of Listeria monocytogenes in full- and low-sodium frankfurters at 4, 7, or 10°C using spray-dried mixtures of organic acid salts. 2013 , 76, 1557-67	5
80	Non-thermal processing technologies to improve the safety of nuts. 2013 , 35-55	1
79	Recent Developments in High Pressure Processing of Foods. 2013 ,	13
78	Alternative Seafood Preservation Technologies: Ionizing Radiation and High Pressure Processing. 2014 ,	5
77	Oxidative stability of fish oil-in-water emulsions under high-pressure treatment. 2014 , 49, 1441-1448	7
76	Thermal and High-Pressure Inactivation Kinetics of Avidin. 2014 , 38, 1830-1839	7
75	The Effect of High Pressure Processing on the Integrity of Polymeric Packaging [Analysis and Categorization of Occurring Defects. 2014 , 27, 83-103	16
74	Effect of High Pressure Processing on the Thermal and Mechanical Properties of Polyethylene Films Measured by Dynamical Mechanical and Tensile Analyses. 2014 , 27, 169-178	9
73	Advanced retorting, microwave assisted thermal sterilization (MATS), and pressure assisted thermal sterilization (PATS) to process meat products. 2014 , 98, 420-34	75

72	Reduction of Furan Formation by High-Pressure High-Temperature Treatment of Individual Vegetable Purées. 2014 , 7, 2679	23
71	Effect of single- and two-cycle high hydrostatic pressure treatments on water properties, physicochemical and microbial qualities of minimally processed squids (<i>todarodes pacificus</i>). 2015 , 80, E1012-20	21
70	Application of High Pressure Processing for Obtaining Fresh-Like Fruit Smoothies. 2015 , 8, 2470-2482	26
69	Quality changes in high pressure processed ginger paste under refrigerated storage. 2015 , 10, 18-25	11
68	Principles and application of high pressure-based technologies in the food industry. 2015 , 6, 435-62	212
67	Consumer Sensory Characterization of Cooked Ham Using the Check-All-That-Apply (CATA) Methodology. 2015 , 7, 265-273	22
66	Furan formation as a function of pressure, temperature and time conditions in spinach purée. 2015 , 64, 565-570	12
65	High pressure as an alternative processing step for ham production. 2016 , 118, 22-7	18
64	High-pressure processing of meat and meat products. 2016 , 37-101	8
63	Effect of high-pressure processing of bovine colostrum on immunoglobulin G concentration, pathogens, viscosity, and transfer of passive immunity to calves. 2016 , 99, 8575-8588	7
62	High Pressure Processing in Food Industry [Characteristics and Applications. 2016 , 10, 377-383	48
61	Processing, Packaging, and Storage of Tomato Products: Influence on the Lycopene Content. 2016 , 8, 52-75	40
60	Fundamentals and Applications of High-Pressure Processing Technology. 2016 , 3-17	13
59	Microbiological Aspects of High-Pressure Processing of Food: Inactivation of Microbial Vegetative Cells and Spores. 2016 , 271-294	11
58	Compression Heating of Selected Polymers During High-Pressure Processing. 2017 , 40, e12417	3
57	Stabilization of red fruit-based smoothies by high-pressure processing. Part A. Effects on microbial growth, enzyme activity, antioxidant capacity and physical stability. 2017 , 97, 770-776	15
56	The hurdle effect of osmotic pretreatment and high-pressure cold pasteurisation on the shelf-life extension of fresh-cut tomatoes. 2017 , 52, 916-926	18
55	Landmarks in the historical development of twenty first century food processing technologies. 2017 , 97, 318-339	173

54	Tracking the behavior of Maillard browning in lysine/arginine-sugar model systems under high hydrostatic pressure. 2017 , 97, 5168-5175	11
53	A review of fresh lamb chilling and preservation. 2017 , 146, 41-47	18
52	Prunus Fruit Juices. 2017 , 59-77	
51	Effects of combined high pressure (HPP), pulsed electric field (PEF) and sonication treatments on inactivation of <i>Listeria innocua</i> . 2018 , 233, 49-56	26
50	Application of molecular dynamic simulation to study food proteins: A review. 2018 , 58, 2779-2789	29
49	The effect of pressure-assisted heating on the water holding capacity of chicken batters. 2018 , 45, 280-286	14
48	Non-thermal Technologies: High Pressure Processing. 2018 ,	
47	Investigation of the effects of high pressure processing on the process of rigor in pork. 2018 , 145, 455-460	14
46	The protective effect of food matrices on <i>Listeria lytic</i> bacteriophage P100 application towards high pressure processing. 2018 , 76, 416-425	16
45	Rheological characterization of the thermal gelation of cowpea protein isolates: Effect of pretreatments with high hydrostatic pressure or calcium addition. 2019 , 115, 108472	7
44	Activation and inactivation mechanisms of polyphenol oxidase during thermal and non-thermal methods of food processing. 2019 , 117, 170-182	49
43	Nonthermal food processing/preservation technologies. 2019 , 141-169	4
42	Antimicrobial random peptide cocktails: a new approach to fight pathogenic bacteria. 2019 , 55, 2007-2014	37
41	Innovation of Food Physical Processing Technology in China. 2019 , 1-32	1
40	Advances in Food Processing Technology. 2019 ,	4
39	Searching for high pressure processing parameters for <i>Escherichia coli</i> O157:H7, <i>Salmonella enterica</i> and <i>Listeria monocytogenes</i> reduction in Concord grape juice. 2019 , 122, 170-180	6
38	Review on high-pressure processing of foods. 2019 , 5, 1568725	33
37	A nano-carrier platform for the targeted delivery of nature-inspired antimicrobials using Engineered Water Nanostructures for food safety applications. 2019 , 96, 365-374	27

36	Effect of high pressure treatment on the color of fresh and processed meats: A review. 2019 , 59, 228-252	30
35	The combined effect of high pressure processing and dimethyl dicarbonate to inactivate foodborne pathogens in apple juice. 2020 , 51, 779-785	8
34	Challenging a range of high pressure processing parameters to inactivate pathogens in orange juice. 2020 , 40, 537-542	3
33	High pressure processing of apple juice: the most effective parameters to inactivate pathogens of reference. 2020 , 122, 3969-3979	3
