

CITATION REPORT

List of articles citing

Negative confounding in the evaluation of toxicity: the case of methylmercury in fish and seafood

DOI: 10.1080/10408440802273164

Critical Reviews in Toxicology, 2008, 38, 877-93.

Version: 2024-04-19

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
