

CITATION REPORT

List of articles citing

Identification of two distinct macrophage subsets with divergent effects causing either neurotoxicity or regeneration in the injured mouse spinal cord

DOI: 10.1523/jneurosci.3257-09.2009
Journal of Neuroscience, 2009, 29, 13435-44.

Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
1706	Phenomena arising from high dimensionality. 2004 , 59, 159-169		3
1705	Macrophages inhibit neovascularization in a murine model of age-related macular degeneration. 2006 , 3, e310		177
1704	Deposition mechanism of nano-structured single-layered C 36 film on a diamond (100) crystal plane. 2008 , 17, 4260-4267		3
1703	Spinal microvascular expression of PV-1 is associated with inflammation, perivascular astrocyte loss, and diminished EC glucose transport potential in acute SCI. 2010 , 7, 238-50		17
1702	Inflammation in neurological disorders: a help or a hindrance?. 2010 , 16, 408-20		133
1701	B cells and autoantibodies: complex roles in CNS injury. 2010 , 31, 332-8		71
1700	Role of microglia in neurotrauma. 2010 , 7, 366-77		462
1699	Resident macrophages in the cochlear blood-labyrinth barrier and their renewal via migration of bone-marrow-derived cells. 2010 , 342, 21-30		70
1698	Intrinsic response of thoracic propriospinal neurons to axotomy. 2010 , 11, 69		35
1697	The role and therapeutic potential of monocytic cells in Alzheimer's disease. 2010 , 58, 889-900		66
1696	Cellular response after crush injury in adult zebrafish spinal cord. 2010 , 239, 2962-79		86
1695	Endogenous expression of interleukin-4 regulates macrophage activation and confines cavity formation after traumatic spinal cord injury. 2010 , 88, 2409-19		30
1694	Semi-automated Sholl analysis for quantifying changes in growth and differentiation of neurons and glia. 2010 , 190, 71-9		44
1693	AMPA-receptor trafficking and injury-induced cell death. 2010 , 32, 290-7		61
1692	Rescuing vasculature with intravenous angiopoietin-1 and alpha v beta 3 integrin peptide is protective after spinal cord injury. 2010 , 133, 1026-42		93
1691	Preserving Coherence of Coherent State Studied via Weyl-Wigner Correspondence. 2010 , 54, 244-246		1
1690	Comparison of the Josephson voltage standards of the EIM and the BIPM. 2010 , 47, 01009-01009		2

1689	Reimagining Alzheimer's disease--an age-based hypothesis. <i>Journal of Neuroscience</i> , 2010 , 30, 16755-62	6.6	267
1688	Polylaminin, a polymeric form of laminin, promotes regeneration after spinal cord injury. 2010 , 24, 4513-22		28
1687	Mitogen-activated protein kinase-activated protein kinase 2 (MK2) contributes to secondary damage after spinal cord injury. <i>Journal of Neuroscience</i> , 2010 , 30, 13750-9	6.6	46
1686	Intrinsic targeting of inflammatory cells in the brain by polyamidoamine dendrimers upon subarachnoid administration. 2010 , 5, 1317-29		88
1685	Luteolin triggers global changes in the microglial transcriptome leading to a unique anti-inflammatory and neuroprotective phenotype. 2010 , 7, 3		104
