

# Moving From Federated to Integrated Architectures in Methods and Tools

Proceedings of the IEEE

98, 603-620

DOI: [10.1109/jproc.2009.2039550](https://doi.org/10.1109/jproc.2009.2039550)

Citation Report

#	ARTICLE	IF	CITATIONS
1	Verification of the FlexRay Transport Protocol for AUTOSAR In-Vehicle Communications. International Journal of Vehicular Technology, 2010, 2010, 1-23.	1.1	7
2	A unifying view of loosely time-triggered architectures. , 2010, , .		23
3	Loosely Time-Triggered Architectures for Cyber-Physical Systems. , 2010, , .		20
4	Fieldbus virtualization for Integrated Modular Avionics. , 2011, , .		7
5	Towards Self-Adaptation in Real-Time, Networked Systems: Efficient Solving of System Constraints for Automotive Embedded Systems. , 2011, , .		21
6	Formal Synthesis of Embedded Control Software: Application to Vehicle Management Systems. , 2011, , .		18
7	A Discussion on the Use of an Integrated Modular Avionics (IMA) Architecture to Simulate an Aerospace Control System. , 0, , .		0
8	An approach to optimization of fault tolerant architectures using HiPâ€HOPS. Software - Practice and Experience, 2011, 41, 1303-1327.	2.5	35
9	Distributed power allocation for vehicle management systems. , 2011, , .		28
10	Timing constraints for runtime adaptation in real-time, networked embedded systems. , 2012, , .		11
11	Methodology for the Design of Analog Integrated Interfaces Using Contracts. IEEE Sensors Journal, 2012, 12, 3329-3345.	2.4	23
12	A Practical Approach to Size Estimation of Embedded Software Components. IEEE Transactions on Software Engineering, 2012, 38, 993-1007.	4.3	11
13	Kernel-level ARINC 653 partitioning for Linux. , 2012, , .		22
14	Supporting ARINC 653-based Dynamic Reconfiguration. , 2012, , .		13
15	Formal Methods Based Acceptance Testing for AUTOSAR Exchangeability. SAE International Journal of Passenger Cars - Electronic and Electrical Systems, 2012, 5, 209-213.	0.3	8
16	Heuristic resource allocation and scheduling method for distributed automotive control systems. International Journal of Automotive Technology, 2013, 14, 611-624.	0.7	10
17	Flexible platform approach for fly-by-wire systems. , 2013, , .		10
18	Let's put the car in your phone!., 2013, , .		2

#	ARTICLE	IF	CITATIONS
19	Deconstructing bus access control policies for Real-Time multicores. , 2013, , .		20
20	Engineering safe autonomous mobile systems of systems using specification (model) based systems architecture & engineering. , 2013, , .		3
21	Modeling and efficient solving of extra-functional properties for adaptation in networked embedded real-time systems. Journal of Systems Architecture, 2013, 59, 1067-1082.	2.5	16
22	A Distributed Run-Time Environment for the Kalray MPPA®-256 Integrated Manycore Processor. Procedia Computer Science, 2013, 18, 1654-1663.	1.2	79
23	Virtualization for safety-critical, deeply-embedded devices. , 2013, , .		5
24	How to engineer tool-chains for automotive E/E architectures?. ACM SIGBED Review, 2013, 10, 6-15.	1.8	7
25	Virtual scheduling for compositional real-time guarantees. , 2013, , .		0
26	The realization of reusability in vehicular software development under AUTOSAR. , 2013, , .		2
27	Identifying the sources of unpredictability in COTS-based multicore systems. , 2013, , .		28
28	Model-based synthesis for real-time embedded systems. , 2014, , .		0
29	A network virtualization approach for performance isolation in controller area network (CAN). , 2014, , .		6
30	Guidelines and challenges for composing and synchronizing real-time software components through virtual platforms in vehicular systems. , 2014, , .		0
31	AHRB: A high-performance time-composable AMBA AHB bus. , 2014, , .		6
32	Deadline-Aware Interrupt Coalescing in Controller Area Network (CAN). , 2014, , .		0
33	Assigning time budgets to component functions in the design of time-critical automotive systems. , 2014, , .		5
34	Resource partitioning for Integrated Modular Avionics: comparative study of implementation alternatives. Software - Practice and Experience, 2014, 44, 1441-1466.	2.5	13
35	Design synthesis and optimization for automotive embedded systems. , 2014, , .		5
36	CHROMOSOME. ACM SIGBED Review, 2014, 11, 36-39.	1.8	10
