

CITATION REPORT

List of articles citing

Vascularization in bone tissue engineering: physiology, current strategies, major hurdles and future challenges

DOI: 10.1002/mabi.200900107

Macromolecular Bioscience, 2010, 10, 12-27.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
340	Porcine allograft mandible revitalization using autologous adipose-derived stem cells, bone morphogenetic protein-2, and periosteum. 2010 , 125, 1372-1382		25
339	Primate mandibular reconstruction with prefabricated, vascularized tissue-engineered bone flaps and recombinant human bone morphogenetic protein-2 implanted in situ. 2010 , 31, 4935-43		31
338	Influence of polymer content in Ca-deficient hydroxyapatite-polycaprolactone nanocomposites on the formation of microvessel-like structures. <i>Acta Biomaterialia</i> , 2010 , 6, 3169-77	10.8	23
337	Bioactive Glass and Glass-Ceramic Scaffolds for Bone Tissue Engineering. 2010 , 3, 3867-3910		669
336	Three-dimensional co-cultures of osteoblasts and endothelial cells in DegraPol foam: histological and high-field magnetic resonance imaging analyses of pre-engineered capillary networks in bone grafts. 2011 , 17, 291-9		40
335	Bio-inspired Resorbable Calcium Phosphate-Polymer Nanocomposites for Bone Healing Devices with Controlled Drug Release. 2011 , 225-258		
334	Stem Cell Research and Molecular Markers in Medicine. 2011 , 455-466		
333	Bioactive glass-based scaffolds for bone tissue engineering. 2012 , 126, 195-226		21
332	Mesenchymal stem cells and bone regeneration: current status. 2011 , 42, 562-8		142
331	A modular approach to the engineering of a centimeter-sized bone tissue construct with human amniotic mesenchymal stem cells-laden microcarriers. 2011 , 32, 7532-42		86
330	Vascular and micro-environmental influences on MSC-coral hydroxyapatite construct-based bone tissue engineering. 2011 , 32, 8497-505		32
329	Vascularization is the key challenge in tissue engineering. 2011 , 63, 300-11		748
328	An approach to architecture 3D scaffold with interconnective microchannel networks inducing angiogenesis for tissue engineering. 2011 , 22, 2565-71		19
327	Locally applied vascular endothelial growth factor A increases the osteogenic healing capacity of human adipose-derived stem cells by promoting osteogenic and endothelial differentiation. 2011 , 29, 286-96		106
326	Biomimetic Materials for Bone Tissue Engineering [State of the Art and Future Trends]. 2011 , 13, B135-B150		45
325	Biomaterials that regulate growth factor activity via bioinspired interactions. 2011 , 21, 1754-1768		120
324	Comparably accelerated vascularization by preincorporation of aortic fragments and mesenchymal stem cells in implanted tissue engineering constructs. 2011 , 97, 383-94		10

323	Adipose tissue-derived stem cells display a proangiogenic phenotype on 3D scaffolds. 2011 , 98, 383-93	22
322	The realistic prediction of oxygen transport in a tissue-engineered scaffold by introducing time-varying effective diffusion coefficients. <i>Acta Biomaterialia</i> , 2011 , 7, 3345-53	10.8 17
321	A review of the biological response to ionic dissolution products from bioactive glasses and glass-ceramics. 2011 , 32, 2757-74	1732
320	The pro-angiogenic properties of multi-functional bioactive glass composite scaffolds. 2011 , 32, 4096-108	154
319	Wave front migration of endothelial cells in a bone-implant interface. 2011 , 44, 1980-6	7
318	Optimal scaffold design and effective progenitor cell identification for the regeneration of vascularized bone. 2011 , 2011, 2464-7	11
317	Prolongated survival of osteoblast-like cells on biodegradable scaffolds by heat shock preconditioning. 2011 , 17, 1935-43	10
316	Vascular endothelial growth factor release from alginate microspheres under simulated physiological compressive loading and the effect on human vascular endothelial cells. 2011 , 17, 1777-85	8
315	Osteogenic stimulatory conditions enhance growth and maturation of endothelial cell microvascular networks in culture with mesenchymal stem cells. 2012 , 3, 2041731412443236	17
314	Comparison of platelet-rich plasma and VEGF-transfected mesenchymal stem cells on vascularization and bone formation in a critical-size bone defect. 2012 , 196, 523-33	43
313	Engineering vascularized bone: osteogenic and proangiogenic potential of murine periosteal cells. 2012 , 30, 2460-71	75
312	Perfusion flow enhances osteogenic gene expression and the infiltration of osteoblasts and endothelial cells into three-dimensional calcium phosphate scaffolds. 2012 , 2012, 915620	25
311	Tissue engineered bone grafts based on biomimetic nanocomposite PLGA/amorphous calcium phosphate scaffold and human adipose-derived stem cells. 2012 , 43, 1689-97	70
310	Engineering vascularized bone graft with osteogenic and angiogenic lineage differentiated bone marrow mesenchymal stem cells. 2012 , 36, 1036-46	26
309	From nano- to macro-scale: nanotechnology approaches for spatially controlled delivery of bioactive factors for bone and cartilage engineering. 2012 , 7, 1045-66	47
308	A comparative analysis of the osteogenic effects of BMP-2, FGF-2, and VEGFA in a calvarial defect model. 2012 , 18, 1079-86	61
307	Intrafibrillar silicification of collagen scaffolds for sustained release of stem cell homing chemokine in hard tissue regeneration. 2012 , 26, 4517-29	39
306	Comparison of methods for staining microvessels in bone. 2012 , 87, 428-31	1

305	Whatever their differentiation status, human progenitor derived - or mature - endothelial cells induce osteoblastic differentiation of bone marrow stromal cells. 2012 , 6, e51-60		31
304	Biomimetic poly(ethylene glycol)-based hydrogels as scaffolds for inducing endothelial adhesion and capillary-like network formation. <i>Biomacromolecules</i> , 2012 , 13, 706-13	6.9	34
303	Differential analysis of peripheral blood- and bone marrow-derived endothelial progenitor cells for enhanced vascularization in bone tissue engineering. 2012 , 30, 1507-15		61
302	Mitogenic activity of sulfated chitosan and cellulose derivatives is related to protection of FGF-2 from proteolytic cleavage. <i>Macromolecular Bioscience</i> , 2012 , 12, 740-50	5.5	23
301	In vitro characterizations of mesoporous hydroxyapatite as a controlled release delivery device for VEGF in orthopedic applications. 2012 , 100, 3143-50		19
300	Enhanced bone tissue formation by alginate gel-assisted cell seeding in porous ceramic scaffolds and sustained release of growth factor. 2012 , 100, 3408-15		26
299	Direct-write assembly of 3D silk/hydroxyapatite scaffolds for bone co-cultures. 2012 , 1, 729-35		116
298	Vascularized bone tissue engineering: approaches for potential improvement. 2012 , 18, 363-82		216
297	Matrix composition regulates three-dimensional network formation by endothelial cells and mesenchymal stem cells in collagen/fibrin materials. 2012 , 15, 253-64		197
