

CITATION REPORT

List of articles citing

Nine-year incident diabetes is predicted by fatty liver indices: the French D.E.S.I.R. study

DOI: 10.1186/1471-230x-10-56
BMC Gastroenterology, 2010, 10, 56.

Version: 2024-04-16

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
108	A simple index of lipid overaccumulation is a good marker of liver steatosis. <i>BMC Gastroenterology</i> , 2010 , 10, 98	3	140
107	C-reactive protein and gamma-glutamyltransferase concentrations in relation to the prevalence of type 2 diabetes diagnosed by glucose or HbA1c criteria in Chinese adults in Qingdao, China. 2010 , 2010, 761715		2
106	The Finnish Diabetes Risk Score (FINDRISC) and other non-invasive scores for screening of hepatic steatosis and associated cardiometabolic risk. 2011 , 43, 413-7		11
105	Association between markers of fatty liver disease and impaired glucose regulation in men and women from the general population: the KORA-F4-study. 2011 , 6, e22932		46
104	Systematic review: the diagnosis and staging of non-alcoholic fatty liver disease and non-alcoholic steatohepatitis. 2011 , 33, 525-40		215
103	Why does NAFLD predict type 2 diabetes?. 2011 , 11, 167-72		26
102	Elevated liver function enzymes are related to the development of prediabetes and type 2 diabetes in younger adults: the Bogalusa Heart Study. 2011 , 34, 2603-7		60
101	Combined influence of insulin resistance, overweight/obesity, and fatty liver as risk factors for type 2 diabetes. 2012 , 35, 717-22		145
100	Long-term dietary potential renal acid load during adolescence is prospectively associated with indices of nonalcoholic fatty liver disease in young women. 2012 , 142, 313-9		20
99	Associations of sex hormone-binding globulin and testosterone with diabetes among men and women (the Saku Diabetes study): a case control study. 2012 , 11, 130		25
98	Predicting total, abdominal, visceral and hepatic adiposity with circulating biomarkers in Caucasian and Japanese American women. 2012 , 7, e43502		41
97	Liver and diabetes. A vicious circle. 2013 , 43, 51-64		130
96	Hypertension and vascular dynamics in men and women with metabolic syndrome. 2013 , 61, 12-9		84
95	The Fatty Liver Index has limited utility for the detection and quantification of hepatic steatosis in obese patients. 2013 , 7, 592-9		15
94	Early growth and non-alcoholic fatty liver disease in adulthood-the NAFLD liver fat score and equation applied on the Helsinki Birth Cohort Study. 2013 , 45, 430-7		90
93	Assessment of cardiometabolic risk and prevalence of meeting treatment guidelines among patients with type 2 diabetes stratified according to their use of insulin and/or other diabetic medications: results from INSPIRE ME IAA. 2013 , 15, 629-41		4
92	Non-alcoholic fatty liver disease independently predicts prediabetes during a 7-year prospective follow-up. 2013 , 33, 1406-12		60

91	Influence of non-alcoholic fatty liver disease on the development of diabetes mellitus. 2013 , 28, 142-7	66
90	External validation of the fatty liver index for identifying nonalcoholic fatty liver disease in a population-based study. 2013 , 11, 1201-4	128
89	Review article: the diagnosis of non-alcoholic fatty liver disease -- availability and accuracy of non-invasive methods. 2013 , 37, 392-400	126
88	Assessment of the fatty liver index as an indicator of hepatic steatosis for predicting incident diabetes independently of insulin resistance in a Korean population. 2013 , 30, 428-35	30
87	The association between nonalcoholic fatty pancreas disease and diabetes. 2013 , 8, e62561	95
86	Association of serum adipocyte-specific Fatty Acid binding protein with Fatty liver index as a predictive indicator of nonalcoholic Fatty liver disease. 2013 , 28, 283-7	11
85	The role of skeletal muscle in development of nonalcoholic Fatty liver disease. 2013 , 37, 278-85	48
84	Comparison of fatty liver index with noninvasive methods for steatosis detection and quantification. 2013 , 19, 57-64	77
83	Comparison of liver fat indices for the diagnosis of hepatic steatosis and insulin resistance. 2014 , 9, e94059	88
82	The effects of vitamin D supplementation on hepatic dysfunction, vitamin D status, and glycemic control in children and adolescents with vitamin D deficiency and either type 1 or type 2 diabetes mellitus. 2014 , 9, e99646	40
81	Non-alcoholic fatty liver disease: what the clinician needs to know. 2014 , 20, 12956-80	117
80	Performance and limitations of steatosis biomarkers in patients with nonalcoholic fatty liver disease. 2014 , 40, 1209-22	196
79	Fatty liver and serum cholinesterase are independently correlated with HbA1c levels: cross-sectional analysis of 5384 people. 2014 , 42, 542-53	7
78	Elevated liver enzymes are related to progression to impaired glucose tolerance in Japanese men. 2014 , 31, 552-8	7
77	External validation of the fatty liver index and lipid accumulation product indices, using 1H-magnetic resonance spectroscopy, to identify hepatic steatosis in healthy controls and obese, insulin-resistant individuals. 2014 , 171, 561-9	80
