

# CITATION REPORT

List of articles citing

## Splines, knots, and penalties

DOI: 10.1002/wics.125

Wiley Interdisciplinary Reviews: Computational  
Statistics, 2010, 2, 637-653.

**Source:** <https://exaly.com/paper-pdf/48419965/citation-report.pdf>

**Version:** 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
131	Comparing penalized splines and fractional polynomials for flexible modelling of the effects of continuous predictor variables. <i>Computational Statistics and Data Analysis</i> , <b>2011</b> , 55, 1540-1551	1.6	6
130	Processing of Eye/Head-Tracking Data in Large-Scale Naturalistic Driving Data Sets. <b>2012</b> , 13, 553-564		47
129	Bayesian analysis of random regression models using B-splines to model test-day milk yield of Holstein cattle in Brazil. <i>Livestock Science</i> , <b>2012</b> , 150, 401-406	1.7	5
128	Smooth incidence maps give valuable insight into Q fever outbreaks in The Netherlands. <b>2012</b> , 7, 127-34		23
127	Testing goodness of fit in regression: a general approach for specified alternatives. <b>2012</b> , 31, 3656-66		4
126	Modelling and Forecasting Gas Flow on Exits of Gas Transmission Networks. <b>2012</b> , 80, 24-39		3
125	Parameter Estimation of Partial Differential Equation Models. <b>2013</b> , 108,		71
124	Semiparametric inference for open populations using the Jolly&Beber model: a penalized spline approach. <b>2013</b> , 83, 1741-1755		3
123	Penalized PCA approaches for B-spline expansions of smooth functional data. <b>2013</b> , 219, 7805-7819		21
122	Joint modelling of extreme ocean environments incorporating covariate effects. <b>2013</b> , 79, 22-31		32
121	Comparative study of different B-spline approaches for functional data. <b>2013</b> , 58, 1568-1579		28
120	Nonparametric Regression. <b>2013</b> , 413-533		1
119	Using the Theory of Spline Function to Implement the Optimal Dispatch for Mechanical Arm. <b>2013</b> , 705, 237-240		
118	Comments on: Short-term forecasting the daily load curve for residential electricity usage in smart grid. <b>2013</b> , 29, 621-623		0
117	Penalized regression, mixed effects models and appropriate modelling. <b>2013</b> , 7,		11
116	Child mortality estimation 2013: an overview of updates in estimation methods by the United Nations Inter-agency Group for Child Mortality Estimation. <b>2014</b> , 9, e101112		49
115	Return level estimation from non-stationary spatial data exhibiting multidimensional covariate effects. <b>2014</b> , 88, 520-532		28

114	Locomotor benefits of being a slender and slick sand swimmer. <b>2015</b> , 218, 440-50		44
113	Bayesian hierarchical age-period-cohort models with time-structured effects: An application to religious voting in the US, 1972-2008. <b>2014</b> , 33, 52-62		20
112	Semivarying coefficient models for capture-recapture data: colony size estimation for the little penguin <i>Eudyptula minor</i> . <b>2014</b> , 255, 43-51		1
111	Global estimation of child mortality using a Bayesian B-spline Bias-reduction model. <b>2014</b> , 8,		46
110	Bayesian Adaptive Smoothing Splines Using Stochastic Differential Equations. <b>2014</b> , 9,		19
109	ProFit revisited. <b>2014</b> , 71, 458-68		37
108	Inégalité sociales de santé au Québec : prévalence de l'incapacité et des maladies chroniques selon l'âge et le niveau de défavorisation en 2010-2011. <b>2015</b> , 41, S34-S43		1
107	Distributions of return values for ocean wave characteristics in the South China Sea using directional seasonal extreme value analysis. <b>2015</b> , 26, 442-450		25
106	Objective Bayesian Model Selection in Generalized Additive Models With Penalized Splines. <i>Journal of Computational and Graphical Statistics</i> , <b>2015</b> , 24, 394-415	1.4	10
105	L- and V-curves for optimal smoothing. <b>2015</b> , 15, 91-111		22
104	Estimation of Storm Peak and Intrastorm Directional Seasonal Design Conditions in the North Sea. <b>2015</b> , 137,		3
103	Using chronological models in late Holocene sea-level reconstructions from saltmarsh sediments. <b>2015</b> , 500-513		6
102	Unraveling the Relationship Between Presidential Approval and the Economy: A Multidimensional Semiparametric Approach. <b>2015</b> , 30, 468-486		9
101	Modulation of orthogonal body waves enables high maneuverability in sidewinding locomotion. <b>2015</b> , 112, 6200-5		50
100	Additive mixed models with approximate Dirichlet process mixtures: the EM approach. <b>2016</b> , 26, 73-92		3
99	Operational Drought Monitoring in Kenya Using MODIS NDVI Time Series. <b>2016</b> , 8, 267		87
98	Multi-dimensional Predictive Analytics for Risk Estimation of Extreme Events. <b>2016</b> ,		
97	Semi-parametric frailty model for clustered interval-censored data. <b>2016</b> , 16, 360-391		2

96	Non-parametric regression on compositional covariates using Bayesian P-splines. <b>2016</b> , 25, 75-88	6
95	Systematic deviation in smooth mixed models for multi-level longitudinal data. <b>2016</b> , 32, 203-217	4
94	Penalized complexity priors for degrees of freedom in Bayesian P-splines. <b>2016</b> , 16, 429-453	10
93	A flexible model for correlated medical costs, with application to medical expenditure panel survey data. <b>2016</b> , 35, 883-94	14
92	Inference in dynamic systems using B-splines and quasilinearized ODE penalties. <b>2016</b> , 58, 691-714	1
91	Bayesian inference in an extended SEIR model with nonparametric disease transmission rate: an application to the Ebola epidemic in Sierra Leone. <b>2016</b> , 17, 779-92	9
90	Parameter estimation and inference in dynamic systems described by linear partial differential equations. <b>2016</b> , 100, 259-287	2
89	Statistics of extreme ocean environments: Non-stationary inference for directionality and other covariate effects. <b>2016</b> , 119, 30-46	9
88	A unified framework of constrained regression. <b>2016</b> , 26, 1-14	22
87	Influence diagnostics for robust P-splines using scale mixture of normal distributions. <b>2016</b> , 68, 589-619	5
86	A Penalized Spline-Based Attitude Model for High-Resolution Satellite Imagery. <b>2016</b> , 54, 1849-1859	9
85	Laplace Variational Approximation for Semiparametric Regression in the Presence of Heteroskedastic Errors. <i>Journal of Computational and Graphical Statistics</i> , <b>2016</b> , 25, 225-245	1.4 2
84	Bayesian P-splines and advanced computing in R for a changepoint analysis on spatio-temporal point processes. <b>2016</b> , 86, 2531-2545	2
83	Parsimonious time series clustering using P-splines. <b>2016</b> , 52, 26-38	21
82	Multiple frailty model for clustered interval-censored data with frailty selection. <i>Statistical Methods in Medical Research</i> , <b>2017</b> , 26, 1308-1322	2.3 2
81	Predicting pregnancy outcomes using longitudinal information: a penalized splines mixed-effects model approach. <b>2017</b> , 36, 2120-2134	1
80	Bayesian Quantile Impairment Threshold Benchmark Dose Estimation for Continuous Endpoints. <b>2017</b> , 37, 2107-2118	4
79	Dielectric function parameterization by penalized splines. <b>2017</b> ,	1

78	Selecting the right number of knots for B-spline parameterization of the dielectric functions in spectroscopic ellipsometry data analysis. <b>2017</b> , 636, 519-526		22
77	Effects of exposure to ambient ultrafine particles on respiratory health and systemic inflammation in children. <b>2018</b> , 114, 167-180		58
76	SMOOTHING POISSON COMMON FACTOR MODEL FOR PROJECTING MORTALITY JOINTLY FOR BOTH SEXES. <b>2018</b> , 48, 509-541		5
75	Sieve maximum likelihood estimation in generalized linear models with an unknown link function. <i>Wiley Interdisciplinary Reviews: Computational Statistics</i> , <b>2018</b> , 10, e1425	1.4	1
74	Fast Bayesian inference using Laplace approximations in a flexible promotion time cure model based on P-splines. <i>Computational Statistics and Data Analysis</i> , <b>2018</b> , 124, 151-167	1.6	7
73	Integrated Reaction Path Processing from Sampled Structure Sequences. <b>2018</b> , 14, 2052-2062		8
72	Functional logistic regression: a comparison of three methods. <b>2018</b> , 88, 250-268		4
71	Revisiting loss aversion: Evidence from professional tennis. <b>2018</b> , 153, 1-18		4
70	A P-spline based clustering approach for portfolio selection. <b>2018</b> , 95, 88-103		29
69	A Comparison of O'Sullivan Penalized Spline and Penalized Spline Based Truncated Power Basis Methods to Predict Ozone Concentrations. <b>2018</b> , 1108, 012072		
68	Modelling inflation in transportation, communication and financial services using B-Spline time series model. <b>2018</b> , 1025, 012104		
67	An Introduction to Nonparametric Regression for Labor Economists. <b>2018</b> , 39, 355-382		5
66	Fast Mapping of the Eloquent Cortex by Learning L2 Penalties. <b>2018</b> , 341-348		
65	Binge drinking is associated with reduced quality of life in young students: A pan-European study. <b>2018</b> , 193, 48-54		7
64	Design of Recursive Digital Filters with Penalized Spline Method. <b>2018</b> , 3-12		
63	Incorporating heterogeneity and macroeconomic variables into multi-state delinquency models for credit cards. <b>2018</b> , 271, 697-709		12
62	Predicting marsh vulnerability to sea-level rise using Holocene relative sea-level data. <b>2018</b> , 9, 2687		42
61	Nonparametric double additive cure survival models: An application to the estimation of the non-linear effect of age at first parenthood on fertility progression. <b>2019</b> , 19, 248-275		1

60	iceTEA: Tools for plotting and analysing cosmogenic-nuclide surface-exposure data from former ice margins. <b>2019</b> , 51, 72-86	29
59	Crude oil price and implied volatility. <b>2019</b> , 36, 168-182	5
58	Spatiotemporal modeling of hydrological return levels: A quantile regression approach. <b>2019</b> , 30, e2522	4
57	Identifying hidden patterns in credit risk survival data using Generalised Additive Models. <b>2019</b> , 277, 366-376	8
56	A review of spline function procedures in R. <b>2019</b> , 19, 46	107
55	Spectroscopic ellipsometry data analysis using penalized splines representation for the dielectric function. <b>2019</b> , 669, 174-180	5
54	Estimation and identification issues in the promotion time cure model when the same covariates influence long- and short-term survival. <b>2019</b> , 61, 275-289	4
53	Inclusion of time-varying covariates in cure survival models with an application in fertility studies. <b>2020</b> , 183, 333-354	0
52	A random forest algorithm to improve the Lee-Carter mortality forecasting: impact on q-forward. <b>2020</b> , 24, 8553-8567	4
51	Digging deep and running dry—the adoption of borewell technology in the face of climate change and urbanization. <b>2020</b> , 51, 685-706	2
50	Multiple smoothing parameters selection in additive regression quantiles. <b>2020</b> , 1471082X2092980	3
49	Boosting functional response models for location, scale and shape with an application to bacterial competition. <b>2020</b> , 1471082X2091758	2
48	A penalized spline fitting method to optimize geometric parameters of arterial centerlines extracted from medical images. <b>2020</b> , 84, 101746	0
47	Use of Upland and Riparian Areas by Wintering Bald Eagles and Implications for Wind Energy. <b>2020</b> , 84, 1578-1589	3
46	Joint penalized spline modeling of multivariate longitudinal data, with application to HIV-1 RNA load levels and CD4 cell counts. <b>2021</b> , 77, 1061-1074	1
45	Assessment of return value estimates from stationary and non-stationary extreme value models. <b>2020</b> , 207, 107406	4
44	Variable selection with P-splines in functional linear regression: Application in graft-versus-host disease. <b>2020</b> , 62, 1670-1686	1
43	Spline-based intrusion detection for VANET utilizing knot flow classification. <b>2020</b> , 3, e155	7

42	A general framework for prediction in penalized regression. <b>2020</b> , 1471082X1989686		1
41	Flexible covariate representations for extremes. <b>2020</b> , 31, e2624		8
40	Improving Blood Vessel Tortuosity Measurements via Highly Sampled Numerical Integration of the Frenet-Serret Equations. <b>2021</b> , 40, 297-309		0
39	Bayesian Gaussian distributional regression models for more efficient norm estimation. <b>2021</b> , 74, 99-117		1
38	Posttransplant Outcomes in Older Patients With Hepatocellular Carcinoma Are Driven by Non-Hepatocellular Carcinoma Factors. <b>2021</b> , 27, 684-698		1
37	A Bayesian joint model for zero-inflated integers and left-truncated event times with a time-varying association: Applications to senior health care. <b>2021</b> , 40, 147-166		1
