

CITATION REPORT

List of articles citing

On the functional nature of the N400: Contrasting effects related to visual word recognition and contextual semantic integration

DOI: 10.1080/17588920903373952
Cognitive Neuroscience, 2010, 1, 1-7.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
