

CITATION REPORT

List of articles citing

Phase III randomized trial of CED of IL13-PE38QQR vs Gliadel wafers for recurrent glioblastoma

DOI: 10.1093/neuonc/nop054
Neuro-Oncology, 2010, 12, 871-81.

Version: 2024-04-29

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

22 Constant Pressure Convection-Enhanced Delivery Increases Volume Dispersed with Catheter Movement in Agarose. *Journal of Biomechanical Engineering*, **2022**, 2.1 0

21 Convection-enhanced delivery with controlled catheter movement: A parametric finite element analysis. *International Journal for Numerical Methods in Biomedical Engineering*, 2.6 0

20 Glioblastoma: Current Status, Emerging Targets, and Recent Advances. *Journal of Medicinal Chemistry*, **2022**, 65, 8596-8685 8.3 0

19 Nanotherapeutic treatment of the invasive glioblastoma tumor microenvironment. *Advanced Drug Delivery Reviews*, **2022**, 188, 114415 18.5 1

18 Locoregional infusion of IL13R α -specific immunotoxins in children and adults with high-grade glioma. *Therapeutic Delivery*, 3.8

17 Polymeric Nanoparticles in Brain Cancer Therapy: A Review of Current Approaches. *Polymers*, **2022**, 14, 2963 4.5 2

16 Convection-Enhanced Delivery in Children: Techniques and Applications. **2022**, 199-228 0

15 Convection enhanced delivery of EGFR targeting antibody-drug conjugates Serclutamab talirine and Depatux-M in glioblastoma patient derived xenografts.

14 Robot-Assisted Drug Delivery to the Brain. **2022**, 181-192 0

13 Recent Advances in Glioma Cancer Treatment: Conventional and Epigenetic Realms. **2022**, 10, 1448 0

12 Overcoming biophysical barriers with innovative therapeutic delivery approaches. 0

11 Solid Fiber Inside of Capillary and Modified Fusion-Spliced Fiber Optic Microneedle Devices for Improved Light Transmission Efficiency. **2022**, 16, 0

10 Polymer Nanocarriers for Targeted Local Delivery of Agents in Treating Brain Tumors. 0

- 9 Blood-Brain Barrier. **2022**, 2229-2248 ○
- 8 Updates in intraoperative strategies for enhancing intra-axial brain tumor control. **2022**, 24, S33-S41 ○
- 7 Novel cell delivery systems: Intracranial and intrathecal. **2023**, 263-280 ○
- 6 H3K27-altered diffuse midline glioma: a paradigm shifting opportunity in direct delivery of targeted therapeutics. **2023**, 27, 9-17 ○
- 5 Phase II trials in the era of glioblastoma immunotherapy: new mechanisms of action, familiar challenges in trial design and tumor response assessment. ○
- 4 Nanoparticle-based drug delivery across the blood-brain barrier for treating malignant brain glioma. **2023**, 10, 100128 ○
- 3 Advanced Temporally-Spatially Precise Technologies for On-Demand Neurological Disorder Intervention. 2207436 ○
- 2 Recurrent high grade glioma surgery with carmustine wafers implantation: a long-term nationwide retrospective study. ○
- 1 Overcoming the blood brain barrier in glioblastoma: Status and future perspective. **2023**, ○
