Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
356	Die Bedeutung von körperlicher Aktivität und körperlichem Training in der Prävention der koronaren Herzkrankheit. 2010 , 5, 165-179		
355	Exercise training in heart failure: from theory to practice. A consensus document of the Heart Failure Association and the European Association for Cardiovascular Prevention and Rehabilitation. 2011 , 13, 347-57		430
354	Prevençió y rehabilitaci3n de la enfermedad cardiovascular: papel de la asistencia primaria. 2011 , 11, 23-29		2
353	Resistance training dose response in combined endurance-resistance training in patients with cardiovascular disease: a randomized trial. 2011 , 92, 1527-33		17
352	[The coronary patient six months after cardiac rehabilitation: rehabilitation evaluation research (RER study)]. 2011 , 60, 252-8		9
351	Improving guideline adherence for cardiac rehabilitation in the Netherlands. 2011 , 19, 285-9		16
350	Present and future of secondary prevention after an acute coronary syndrome. 2011 , 2, 371-9		4
349	A meta-analysis of the effects of exercise training on left ventricular remodeling following myocardial infarction: start early and go longer for greatest exercise benefits on remodeling. 2011 , 12, 92		108
348	Medium-term effects of cardiac rehabilitation in Germany: systematic review and meta-analysis of results from national and international trials. <i>European Journal of Cardiovascular Prevention and Rehabilitation</i> , 2011 , 18, 587-93		17
347	International data on supportive therapies at 1 year in acute coronary syndrome patients undergoing PCI: results from the APTOR study. <i>European Journal of Cardiovascular Prevention and Rehabilitation</i> , 2011 , 18, 518-25		5
346	Prediabetes influences cardiac rehabilitation in coronary artery disease patients. <i>European Journal of Preventive Cardiology</i> , 2012 , 19, 382-8	3.9	8
345	Adherence of heart failure patients to exercise: barriers and possible solutions: a position statement of the Study Group on Exercise Training in Heart Failure of the Heart Failure Association of the European Society of Cardiology. 2012 , 14, 451-8		177
344	Revision of the Dutch clinical algorithm for assessing patient needs in cardiac rehabilitation based on identified implementation problems. <i>European Journal of Preventive Cardiology</i> , 2012 , 19, 504-14	3.9	8
343	Comparable short-term prognosis in diabetic and non-diabetic patients with acute coronary syndrome after cardiac rehabilitation. <i>European Journal of Preventive Cardiology</i> , 2012 , 19, 15-22	3.9	11
342	Participating in cardiac rehabilitation: a systematic review and meta-synthesis of qualitative data. <i>European Journal of Preventive Cardiology</i> , 2012 , 19, 494-503	3.9	184
341	Why do so few patients with heart failure participate in cardiac rehabilitation? A cross-sectional survey from England, Wales and Northern Ireland. <i>BMJ Open</i> , 2012 , 2, e000787	3	44
340	Discontinuation of combined resistance-endurance training increases cardiovascular risk factors. <i>International Journal of Cardiology</i> , 2012 , 156, 229-31	3.2	4

339	Exercise-based cardiac rehabilitation in patients with coronary heart disease: meta-analysis outcomes revisited. 2012 , 8, 729-51		97
338	A qualitative systematic review of influences on attendance at cardiac rehabilitation programs after referral. 2012 , 164, 835-45.e2		72
337	[The Swiss approach for cardiac rehabilitation]. 2012 , 37, 38-43		2
