

# CITATION REPORT

List of articles citing

**Obesity-induced hypertension: role of sympathetic nervous system, leptin, and melanocortins**

**DOI: 10.1074/jbc.r110.113175**

**Journal of Biological Chemistry, 2010, 285, 17271-6.**

**Source:** <https://exaly.com/paper-pdf/49688839/citation-report.pdf>

**Version:** 2024-04-20

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

| #   | Paper  | IF | Citations |
|-----|--|----|-----------|
| 359 | Comments on Point:Counterpoint: The dominant contributor to systemic hypertension: Chronic activation of the sympathetic nervous system vs. Activation of the intrarenal renin-angiotensin system. Activated intrarenal renin-angiotensin system is correlated with high blood pressure in humans. <b>2010</b> , 109, 2003 |    | 1         |
| 358 | Clinical evaluation of lipids, lipoproteins and red blood cells sodium and potassium in patients with different grades of hypertension. <b>2010</b> , 43, 942-7  |    | 4         |
| 357 | Positive relationship between plasma leptin levels and hypertension from an epidemiological perspective. <b>2010</b> , 56, 573-4   |    | 8         |
| 356 | Leptin action in the dorsomedial hypothalamus increases sympathetic tone to brown adipose tissue in spite of systemic leptin resistance. <b>2011</b> , 31, 12189-97  |    | 227       |
| 355 | Uncoupling the mechanisms of obesity and hypertension by targeting hypothalamic IKK- $\beta$ and NF- $\kappa$ B. <b>2011</b> , 17, 883-7   |    | 185       |
| 354 | Control of blood pressure, appetite, and glucose by leptin in mice lacking leptin receptors in proopiomelanocortin neurons. <b>2011</b> , 57, 918-26   |    | 101       |
| 353 | Postmenopausal hypertension. <b>2011</b> , 24, 740-9   |    | 123       |
| 352 | Development of melanoma-targeted polymer micelles by conjugation of a melanocortin 1 receptor (MC1R) specific ligand. <b>2011</b> , 54, 8078-84  |    | 35        |
| 351 | [Renal consequences of obesity]. <b>2011</b> , 7, 80-5   |    | 8         |
| 350 | Body mass index, leptin, and ambulatory blood pressure variability in healthy adults. <b>2011</b> , 214, 456-61  |    | 15        |
| 349 | Chronic blood pressure and appetite responses to central leptin infusion in rats fed a high fat diet. <b>2011</b> , 29, 758-62   |    | 18        |
| 348 | Combined amylin-leptin treatment lowers blood pressure and adiposity in lean and obese rats. <b>2011</b> , 35, 1183-92   |    | 23        |
| 347 | Activation of the melanocortin-4 receptor causes enhanced excitation in presympathetic paraventricular neurons in obese Zucker rats. <b>2011</b> , 166, 112-20   |    | 24        |
| 346 | Resistant hypertension in the high-risk metabolic patient. <b>2011</b> , 11, 41-6  |    | 15        |
| 345 | The brain splits obesity and hypertension. <b>2011</b> , 17, 782-3   |    | 9         |
| 344 | Role of genetic variants in the gene encoding lipocalin-2 in the development of elevated blood pressure. <b>2011</b> , 33, 484-91  |    | 7         |
| 343 | Intensified effect of adiposity on blood pressure in overweight and obese children. <b>2011</b> , 58, 818-24   |    | 108       |

|     |  |     |
