

CITATION REPORT

List of articles citing

Auditory processing that leads to conscious perception: a unique window to central auditory processing opened by the mismatch negativity and related responses

DOI: 10.1111/j.1469-8986.2010.01114.x
Psychophysiology, 2011, 48, 4-22.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
349	Toward personalized medicine in the neuropsychiatric field. 2011 , 101, 329-49		13
348	Evidence that the mismatch negativity to pattern violations does not vary with deviant probability. 2011 , 122, 2236-45		12
347	Effects of voice harmonic complexity on ERP responses to pitch-shifted auditory feedback. 2011 , 122, 2408-17		19
346	Effects of a violation of an expected increase or decrease in intensity on detection of change within an auditory pattern. 2011 , 77, 438-45		11
345	[Application of simultaneous auditory evoked potentials and functional magnetic resonance recordings for examination of central auditory system--preliminary results]. 2011 , 65, 171-83		0
344	An Asymmetry in the Automatic Detection of the Presence or Absence of a Frequency Modulation within a Tone: A Mismatch Negativity Study. 2011 , 2, 189		17
343	The extent of processing of near-hearing threshold stimuli during natural sleep. 2011 , 34, 1243-9		10
342	Lasting first impressions: a conservative bias in automatic filters of the acoustic environment. <i>Neuropsychologia</i> , 2011 , 49, 3399-405	3.2	36
341	Only a stimulus onset might initiate the temporal window of integration. 2011 ,		
340	A neurocomputational model of stimulus-specific adaptation to oddball and Markov sequences. 2011 , 7, e1002117		52
339	The role of stimulus cross-splicing in an event-related potentials study. Misleading formant transitions hinder automatic phonological processing. 2012 , 131, 3120-40		11
338	Neurophysiological biomarkers support bipolar-spectrum disorders within psychosis cluster. 2012 , 37, 313-21		35
337	Novelty detection in the human auditory brainstem. 2012 , 32, 1447-52		76
336	Beyond DSM: the role of auditory processing in attention and its disorders. 2012 , 1, 112-20		11
335	Mismatch negativity responses in children with a diagnosis of childhood apraxia of speech (CAS). 2012 , 21, 302-12		24
334	Benefits of multi-domain feature of mismatch negativity extracted by non-negative tensor factorization from EEG collected by low-density array. 2012 , 22, 1250025		44
333	Familiarity of environmental sounds is used to establish auditory rules. 2012 , 23, 320-4		7

332	Auditory MEG mismatch responses modified by visual stimulation accompanying auditory stimulation. 2012 , 44, 247-254		
331	The effect of age on time dependent EEG-synchronization changes during the performance of mental arithmetic task. <i>International Journal of Psychophysiology</i> , 2012 , 85, 429-430	2.9	
330	Age-related changes in the use of regular patterns for auditory scene analysis. 2012 , 289, 98-107		30
329	Auditory deviance detection revisited: evidence for a hierarchical novelty system. <i>International Journal of Psychophysiology</i> , 2012 , 85, 88-92	2.9	100
328	Evidence from auditory and visual event-related potential (ERP) studies of deviance detection (MMN and vMMN) linking predictive coding theories and perceptual object representations. <i>International Journal of Psychophysiology</i> , 2012 , 83, 132-43	2.9	160
327	Mismatch negativity (MMN) reduction in schizophrenia-impaired prediction--error generation, estimation or salience?. <i>International Journal of Psychophysiology</i> , 2012 , 83, 222-31	2.9	77
