Version: 2024-04-17

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

1893	A calculation of surface diffusion coefficients of adsorbates on the (110) plane of tungsten. **1981**, 107, 113-126	45
1892	Dynamics of reactions involving diffusive barrier crossing. **1981**, 74, 4426-4432	154
1891	Towards a microscopic theory of electrostatic precipitation. **1981**, 6, 261-268	1
1890	Hydrodynamic interaction effects on local motions of chain molecules. **1981**, 74, 6922-6925	12
1889	Observability of hysteresis in first-order equilibrium and nonequilibrium phase transitions. **1981**, 23, 2719-2723	58
1888	A model for rotational relaxation and resonance. **1981**, 43, 33-45	68
1887	Hemerythrin's oxygen-binding reaction studied by laser photolysis. **1981**, 78, 2307-9	18

1886	Enzymologie bei Temperaturen unter Null. **1981**, 29, 540-543	
1885	THE EFFECT OF VISCOSITY ON THE PHOTOCYCLE OF BACTERIORHODOPSIN. **1981**, 33, 517-522	70
1884	Classical and quantum mechanics of the damped harmonic oscillator. **1981**, 80, 1-110	549
1883	Nuclear dissipation with residual interactions studied by means of the Mori formalism. **1981**, 299, 231-239	24
1882	Structural fluctuations in proteins. **1981**, 7, 226-227	2
1881	Diffusion in a bistable potential: The functional integral approach. **1981**, 26, 83-111	65
1880	Some properties of stochastic equations for coupled chemical reactions far from equilibrium. **1981**, 25, 73-109	1
1879	Piecewise optimal linearization method for nonlinear stochastic differential equations. **1981**, 25, 127-141	12
1878	Theory of rate constants: Master equation approach. **1981**, 25, 475-489	1
1877	The kinetic boundary layer for the Fokker-Planck equation with absorbing boundary. **1981**, 25, 569-582	79
1876	Diffusion modeling of the Rayleigh piston. **1981**, 26, 539-553	5
1875	A thermal activation model for noise in the dc SQUID. **1981**, 44, 119-147	49
1874	Stochastic processes with nonlinear dissipation: Brownian motion in Oseen's approximation. **1981**, 109, 293-304	2
1873	On fluctuations and relaxation in systems described by a one-dimensional Fokker-Planck equation with a time-dependent potential. **1981**, 108, 233-256	43
1872	The influence of dissipation on the tunnel mechanism of magnetic flux at low temperatures in a superconducting loop closed with a low capacitance superconducting pointcontact. **1981**, 108, 965-966	3
1871	Brownian motion description of activation energies from NMR-relaxation times for rotating molecular-groups. **1981**, 56, 9-14	27
1870	Viscosity dependent radiationless relaxation rate of cyanine dyes. A picosecond laser spectroscopy study. **1981**, 61, 257-269	80
1869	A new variational method to calculate escape rates in bistable systems. **1981**, 82, 313-316	29

1868	On the theory of the rupture of black films. **1981**, 81, 108-115	55
1867	Kinetic theory of adsorption and desorption. **1981**, 44, 101-108	27
1866	Matrix continued fraction solutions of the Kramers equation and their inverse friction expansions. **1981**, 40, 343-352	36
1865	Probability diffusion in non-Markhovian, non-Gaussian molecular ensembles: A theoretical analysis and computer simulation. **1981**, 41, 165-176	10
1864	Langevin model for the rotational diffusion of molecules: Uniaxial rotator in anN-fold potential. **1981**, 45, 39-48	10
1863	Transitional conditions in the kinetics of reactions of decomposition into free radicals. **1981**, 16, 284-287	
1862	The internal dynamics of globular proteins. **1981**, 9, 293-349	418
1861	Stochastic dynamics for molecules with constraints. **1981**, 44, 69-95	177
1860	Non-equilibrium Transitions in Sub/second Harmonic Generation. **1981**, 28, 211-225	244
1859	Correlations, transients, bistability, and phase-transition analogy in two-mode lasers. **1981**, 24, 2050-2074	31
1858	Relaxation studies of ion transport systems in lipid bilayer membranes. **1981**, 14, 513-98	154
1857	Unified approach to multiphoton lasers and multiphoton bistability. **1981**, 24, 2029-2043	52
1856	Nucleation theory of overdamped soliton motion. **1981**, 23, 1397-1410	180
1855	Pair shot noise and zero-point Johnson noise in Josephson junctions. **1981**, 24, 7447-7449	10
1854	Reactive modes in condensed phase reactions. **1981**, 74, 4465-4475	233
1853	Diffusion theory of reaction rates for multiple potential barriers. **1981**, 75, 5969-5971	3
1852	Response to "Overdamped soliton motion" by R. A. Guyer and M. D. Miller. **1981**, 24, 4079-4079	4
1851	Nonequilibrium phase transition in a radiation-driven Josephson junction. **1981**, 23, 1977-1987	7

1850	Diffusion-controlled reactions in the presence of strong electromagnetic fields. **1981**, 74, 4519-4526	6
1849	Extrinsic photoconductivity shadowing (EPS) as a method to study triplet energy migration in molten naphthalene. **1981**, 74, 6965-6974	4
1848	Monte Carlo simulations of the rate of intramolecular end-to-end contact in alkane chains. **1981**, 74, 2441-2449	9
1847	Kinetic equations for desorption. **1981**, 24, 4456-4469	30
1846	Theory of spinodal decomposition in relaxational tricritical models. **1981**, 23, 2334-2345	34
1845	Investigation of polymers in solution by polarized luminescence. **1981**, 1-68	79
1844	Decay of unstable states in macroscopic systems. **1982**, 25, 2444-2447	39
1843	Kramers□theory of chemical kinetics: Curvilinear reaction coordinates. **1982**, 77, 5017-5025	25
1842	Derivation of Kramer's equation, friction coefficient, and macroscopic laws for physisorption. **1982**, 26, 6516-6529	8
1841	Effects of capacitance on noise rounded current-voltage curves of a Josephson tunnel junction. **1982**, 53, 7471-7478	8
1840	Non-Markoffian Theory of Activated Rate Processes. **1982**, 49, 423-426	82
1839	A quantum stochastic Fokker□Planck theory for adiabatic processes in condensed phases. **1982**, 76, 6133-6149	6
1838	Mechanism and rates of conformational transitions in heterogeneous polymers. **1982**, 77, 5714-5724	42
1837	Inertial nonequilibrium in strongly decelerated gas mixtures of disparate molecular weights. **1982**, 25, 1108-1122	19
1836	Global reaction: Diffusion coupling and reciprocity in linear asymmetric kinetic networks. **1982**, 77, 5500-5507	24
1835	Time-resolved measurement of the escape of charge carriers from a Coulombic potential well by diffusional motion. **1982**, 76, 4648-4656	33
1834	Energy diffusion-controlled reactions in solution. **1982**, 77, 3736-3743	123
1833	Onset of diffusion-drift emission regime and the transition from exponential to linear current-voltage characteristic of triangular barrier semiconductor structures. **1982**, 40, 814-816	11

1832	Thermally activated escape rate in presence of long-time memory. **1982**, 26, 1168-1170	195
1831	Thermal fluctuations and lifetime of the nonequilibrium steady state in a hysteretic Josephson junction. **1982**, 25, 519-522	15
1830	Lower and upper bounds for the eigenvalues of the Fokker-Planck equation in detailed balance. **1982**, 25, 2324-2338	34
1829	Validity of Brownian-motion theory of activated processes: Diffusion in solids. **1982**, 25, 2324-2342	13
1828	Lifetime of oscillatory steady states. **1982**, 26, 2805-2816	122
1827	Diffusion in a multiwell potential with spatially varying viscosity. **1982**, 77, 4199-4207	12
1826	Classical Stochastic Diffusion Theory for Desorption of Atoms and Molecules from Solid Surfaces. **1982**, 49, 1847-1850	18
1825	The theory of the Fe2+Fe3+ electron exchange in water. **1982**, 76, 1490-1507	134
1824	On Models of Interactive Dynamical Processes at Surfaces. **1982**, 22, 339-359	14
1823	Recent Developments in Transition State Theory. **1982**, 86, 372-378	35
1822	[39] Effect of viscosity on the photocycle of bacteriorhodopsin. **1982**, 297-305	1
1821	Memory effect on thermally activated escape rates. **1982**, 26, 2996-2999	17
1820	Dynamical polar solvent effects on solution reactions: A simple continuum model. **1982**, 76, 2993-3001	213
1819	Dynamics of Proteins. **1982**, 33, 283-299	116
1818	A theory of desorption and surface processes. **1982**, 114, 118-136	7
1817	Photochemical isomerization in solution. Photophysics of diphenyl butadiene. **1982**, 76, 3553-3562	255
1816	Susceptibilities for the brownian motion in a cosine potential with application to the rotation of a dipole in a constant external field. **1982**, 46, 555-576	35
1815	Brownian motion, the second law and Boltzmann. **1982**, 3, 215-222	3

1814	The kink-pair-formation theory of the snoek-köster relaxation. **1982**, 16, 241-247	36
1813	A Singular Perturbation Approach to Kramers' Diffusion Problem. **1982**, 42, 835-849	76
1812	The role of protein fluctuations in enzyme action: a review. **1982**, 39, 109-46	151
1811	Role of diffusion in ligand binding to macromolecules and cell-bound receptors. **1982**, 40, 33-9	360
1810	Adiabatic polaron theory of electron hopping in crystals: A reaction-rate approach. **1982**, 26, 6918-6935	29
1809	Reduction of the Fokker-Planck Equation with an Absorbing or Reflecting Boundary to the Diffusion Equation and the Radiation Boundary Condition. **1982**, 49, 304-307	57
1808	Kramers' diffusion problem and diffusion across characteristic boundaries. **1982**, 318-345	1
1807	Systematic adiabatic elimination for stochastic processes. **1982**, 48, 31-35	37
1806	Microscopic theory of gas-surface interaction. **1982**, 48, 127-136	57
1805	Stochastic-time description of transitions in unstable and multistable systems. **1982**, 71, 119-154	60
1804	Mantle rheology from a geodynamical standpoint. **1982**, 5, 1-35	7
1803	Charge equilibration in dissipative heavy ion collisions as a semi-quantal process. **1982**, 119, 289-292	2
1802	Renormalized diffusion in systems with periodic variables. **1982**, 49, 63-68	5
1801	Time behaviour of non-linear stochastic processes in the presence of multiplicative noise: From Kramers' to Suzuki's decay. **1982**, 47, 353-363	69
1800	Eigenvalues and eigenfunctions of the Kramers equation. Application to the Brownian motion of a pendulum. **1982**, 110, 106-127	34
1799	The kinetic boundary layer for the Fokker-Planck equation: A Brownian particle in a uniform field. **1982**, 112, 315-330	21
1798	Dynamics of the spin transition in camphor-bound ferric cytochrome P-450 versus temperature, pressure and viscosity. **1982**, 129, 111-7	40
1797	Generalized brownian motion in a double-well potential. **1982**, 87, 451-454	11

1796	Influence of solvent on photochemical isomerization: photophysics of diphenyl butadiene in polar solvents. **1982**, 93, 322-326	125
1795	A simple stochastic model for the onset of turbulence in Rayleigh-Bĥard convection. **1982**, 5, 322-334	30
1794	Diffusion over barriers: Eigenanalysis of the Smoluchowski equation for bistable potentials. **1982**, 111, 65-84	9
1793	Stationary solution of the Fokker-Planck equation for the brownian motion of an oscillator in an external force. **1982**, 110, 321-328	1
1792	Numerical solution of fokker/planck/kramers equations. **1982**, 23, 143-178	2
1791	Kinetic equations for physisorption; With some remarks on the compensation effect. **1982**, 11-12, 793-802	1
1790	Role of reptation in the rate of crystallization of polyethylene fractions from the melt. **1982**, 23, 656-670	204
1789	Generalized expressions for interfacial resistance to mass transfer in two-phase systems. **1982**, 88, 487-501	2
1788	On the influence of dissipation on the transition mechanism of magnetic flux at low temperatures in a superconducting loop closed with a low-capacitance superconducting point contact. **1982**, 112, 15-23	13
1787	Instabilities and inhomogeneous gap states in superconductors. **1982**, 109-110, 1677-1692	
1786	Stochastic processes: Time evolution, symmetries and linear response. **1982**, 88, 207-319	511
1785	Fast fission phenomenon, deep inelastic reactions and compound nucleus formation described within a dynamical macroscopic model. **1982**, 383, 392-420	56
1784	A theoretical approach to the decay of unstable states providing a correct description both of short and long time behaviour. **1982**, 88, 117-120	17
1783	Lifetime of a metastable state at low noise. **1982**, 88, 162-164	24
1782	On the brownian movement of a rotator in a cosine potential. **1982**, 88, 331-334	19
1781	Solvent influence on photochemical isomerizations: Photophysics of DODCI. **1982**, 65, 59-70	139
1780	Influence of solvent viscosity on excited state lifetime and fluorescence quantum yield of dye molecules. **1982**, 66, 351-355	31
1779	Theory of time-dependent geminate recombination. **1982**, 12, 13-25	5

1778	Diffusion theory of chemical reactions. **1982**, 22, 664-672	1
