Version: 2024-04-23

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
264	Feature attention evokes task-specific pattern selectivity in V4 neurons. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2012 , 109, 16778-85	11.5	13
263	The selectivity of task-dependent attention varies with surrounding context. 2012 , 32, 12180-91		20
262	Electrophysiological evidence for colour effects on the naming of colour diagnostic and noncolour diagnostic objects. 2012 , 20, 1164-1185		6
261	Parallel, multi-stage processing of colors, faces and shapes in macaque inferior temporal cortex. 2013 , 16, 1870-8		151
260	Spatial neglect and the neural coding of attentional priority. 2013 , 37, 705-22		31
259	Spatial and temporal scales of neuronal correlation in visual area V4. 2013 , 33, 5422-32		72
258	A motion direction preference map in monkey V4. <i>Neuron</i> , 2013 , 78, 376-88	13.9	51
257	Selective tuning for contrast in macaque area V4. 2013 , 33, 18583-96		19
256	The shape of motion perception: global pooling of transformational apparent motion. 2013 , 13, 20		6
255	Motion-sensitive responses in visual area V4 in the absence of primary visual cortex. 2013 , 33, 18740-5		27
254	Two projection streams from macaque V1 to the pale cytochrome oxidase stripes of V2. 2013 , 33, 11530-9		23
253	Receptive field focus of visual area V4 neurons determines responses to illusory surfaces. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2013 , 110, 17095-100	11.5	36
252	Tracking blue cone signals in the primate brain. 2013 , 96, 259-66		7
251	Trade-off between curvature tuning and position invariance in visual area V4. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2013 , 110, 11618-23	11.5	37
250	Multi-scale spatial concatenations of local features in natural scenes and scene classification. <i>PLoS ONE</i> , 2013 , 8, e76393	3.7	1
249	Feedforward object-vision models only tolerate small image variations compared to human. 2014 , 8, 74		21
248	Quantifying the watercolor effect: from stimulus properties to neural models. 2014 , 8, 805		1

247	Contributions of contour frequency, amplitude, and luminance to the watercolor effect estimated by conjoint measurement. 2014 , 14,		13
246	The retinotopic organization of macaque occipitotemporal cortex anterior to V4 and caudoventral to the middle temporal (MT) cluster. 2014 , 34, 10168-91		69
245	Probabilistic and single-subject retinotopic maps reveal the topographic organization of face patches in the macaque cortex. 2014 , 34, 10156-67		76
244	Perceptual learning of simple stimuli modifies stimulus representations in posterior inferior temporal cortex. 2014 , 26, 2187-200		23
243	Visual Network. 2014 , 247-259		3
242	Perceptual color map in macaque visual area V4. 2014 , 34, 202-17		25
241	Functional signalers of changes in visual stimuli: cortical responses to increments and decrements in motion coherence. <i>Cerebral Cortex</i> , 2014 , 24, 110-8	5.1	19
240	Color signals through dorsal and ventral visual pathways. 2014 , 31, 197-209		56
239	V4 neural network model for visual saliency and discriminative local representation of shapes. 2014 ,		1
238	Diagrammatic Representation and Inference. 2014 ,		
237	Meta-analytic connectivity modeling revisited: controlling for activation base rates. <i>NeuroImage</i> , 2014 , 99, 559-70	7.9	31
236	On the 'visual' in 'audio-visual integration': a hypothesis concerning visual pathways. 2014 , 232, 1631-8		11
235	The evolution of a disparity decision in human visual cortex. <i>NeuroImage</i> , 2014 , 92, 193-206	7.9	15
234	The anatomy of cerebral achromatopsia: a reappraisal and comparison of two case reports. 2014 , 56, 138-44		29
233	Misbinding of color and motion in human visual cortex. 2014 , 24, 1354-1360		24
232	Topographic organization of areas V3 and V4 and its relation to supra-areal organization of the primate visual system. 2015 , 32, E014		27
231	Human V4 and ventral occipital retinotopic maps. 2015 , 32, E020		38
230	Controversial issues in visual cortex mapping: Extrastriate cortex between areas V2 and MT in human and nonhuman primates. 2015 , 32, E025		6

229	Scale-invariance in brightness illusions implicates object-level visual processing. 2014 , 4, 3900		3
228	Visual integration in autism. 2015 , 9, 387		7
227	Area V5-a microcosm of the visual brain. 2015 , 9, 21		54
226	Color Constancy Using Double-Opponency. 2015 , 37, 1973-85		56
225	Creating Concepts from Converging Features in Human Cortex. <i>Cerebral Cortex</i> , 2015 , 25, 2584-93	5.1	91
224	Image statistics underlying natural texture selectivity of neurons in macaque V4. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015 , 112, E351-60	11.5	73
